Dialectical Rhetoric Bruce McComiskey, 2015-06-26 In *Dialectical Rhetoric* Bruce McComiskey argues that the historical conflict between rhetoric and dialectic can be overcome in ways useful to both composition theory and the composition classroom Historically dialectic has taken two forms in relation to rhetoric First it has been the logical development of linear propositions leading to necessary conclusions a one dimensional form that was the counterpart of rhetorics in which philosophical metaphysical and scientific truths were conveyed with as little cognitive interference from language as possible Second dialectic has been the topical development of opposed arguments on controversial issues and the judgment of their relative strengths and weaknesses usually in political and legal contexts a two dimensional form that was the counterpart of rhetorics in which verbal battles over competing probabilities in public institutions revealed distinct winners and losers The discipline of writing studies is on the brink of developing a new relationship between dialectic and rhetoric one in which dialectics and rhetorics mediate and negotiate different arguments and orientations that are engaged in any rhetorical situation This new relationship consists of a three dimensional hybrid art called dialectical rhetoric whose method is based on five topoi deconstruction dialogue identification critique and juxtaposition Three dimensional dialectical rhetorics function effectively in a wide variety of discursive contexts including digital environments since they can invoke contrasts in stagnant contexts and promote associations in chaotic contexts *Dialectical Rhetoric* focuses more attention on three dimensional rhetorics from the rhetoric and composition community

The Lure of Literacy Michael

Harker,2014-12-03 readers of LiCS will find a strong argument for how understandings of literacy are fundamental to the work that compositionists do making this book useful not only to those doing similar work but also to be shared with colleagues who have less familiarity with literacy studies *The Lure of Literacy* presents a model of how theories of literacy can be applied to the debates that beset compositionists again and again offering a way out of their unproductive cycles Literacy in Composition *The Lure of Literacy* promises to transcend the stale and unproductive debate on freshman composition that has gripped English studies for more than a century It is the first book to chart the origin of the discussion from the early twentieth century to the advent of the New Literacy Studies Michael Harker recontextualizes proposals to abolish compulsory composition and reimagines pedagogical conditions in English studies in order to present a different model for first year writing This new model for compulsory composition programs focuses on students attitudes about composition and interrogates the very idea of literacy itself

Lost Texts in Rhetoric and Composition Deborah H.

Holdstein,2023-05-03 A project of recovery and reanimation *Lost Texts in Rhetoric and Composition* foregrounds a broad range of publications that deserve renewed attention Contributors to this volume reclaim these lost texts to reenvision the rhetorical tradition itself Authors discussed include not only twentieth century American compositionists but also a linguist a poet a philosopher a painter a Renaissance rhetorician and a nineteenth century pioneer of comics the collection also features some less studied works by authors who remain well known These texts will give rise to new conversations about

current ideas in rhetoric and composition This volume contains discussion of the following authors and titles Judah Messer Leon The Book of the Honeycomb s Flow Angel DeCora Sterling Andrus Leonard English Composition as a Social Problem Rodolphe T pffer William James Kenneth Burke Adrienne Rich Ann E Berthoff John Mohawk Western Peoples Natural Peoples William Vande Kopple William Irmscher Beat Not the Poor Desk Walter J Ong Geneva Smitherman Thomas Zebroski Linda Brodkey Craig S Womack Deborah Cameron James Slevin Marilyn Sternglass and William E Coles Jr *The Two Cultures of English* Jason Maxwell,2019-01-08 The Two Cultures of English examines the academic discipline of English in the final decades of the twentieth century and the first years of the new millennium During this period longstanding organizational patterns within the discipline were disrupted With the introduction of French theory into the American academy in the 1960s and 1970s both literary studies and composition studies experienced a significant reorientation The introduction of theory into English studies not only intensified existing tensions between those in literature and those in composition but also produced commonalities among colleagues that had not previously existed As a result the various fields within English began to share an increasing number of investments at the same time that institutional conflicts between them became more intense than ever before Through careful reconsiderations of some of the key figures who shaped and were shaped by this new landscape including Michel Foucault Kenneth Burke Paul de Man Fredric Jameson James Berlin Susan Miller John Guillory and Bruno Latour the book offers a more comprehensive map of the discipline than is usually understood from the perspective of either literature or composition alone Possessing a clear view of the entire discipline is essential today as the contemporary corporate university pushes English studies to abandon its liberal arts tradition and embrace a more vocational curriculum This book provides important conceptual tools for responding to and resisting in this environment

Contemporary Composition Studies Edith Babin,Kimberly Harrison,1999-12-30 Composition studies is a rapidly growing and constantly changing field At present however graduate students new to the field and writing teachers who want to make new connections between theory and practice have little choice of current reference works that define key terms in composition studies and provide information about the scholars and researchers who have shaped and are shaping the discipline This book supplies this information in an easily accessible format and places both scholars and terms in the context of the field s development Included are alphabetically arranged entries for 108 individuals who have developed the field and 128 terms central to the discipline The first part of the book provides entries for leaders in composition studies Each entry identifies the areas in which the scholar has contributed most influentially to the field and provides both a chronological overview of the person s contributions and a bibliography of representative works The second part includes entries for terms that are problematic both for newcomers and for those already familiar with the discipline The entries for the terms show how the disciplinary context has shaped the ways in which they have been used The entries also indicate how established thinkers in composition studies and other disciplines have explained or defined the terms provide examples of the terms in

context and list scholars often associated with them An appendix includes entries for scholars from other disciplines who have contributed to the field

On Literacy and Its Teaching Gail E. Hawisher, Anna O. Soter, 1990-07-05 This book recognizes and embraces the complexities of modern English teaching It presents English teachers and teacher educators with a critical view of current professional issues and concerns in the belief that these groups need and want to participate in curricular and professional reform movements that affect them and their students The book examines such issues as the interconnectedness of the study of language literature and composition curricular problems in language instruction in teacher education the relationship between our traditional notions of literature study and our emerging view of literacy in the contemporary information age and the ways in which current theory and research can be translated into innovative designs for the teaching of written composition On Literacy and Its Teaching is a powerful response to the current challenge for innovation and change in English teacher education With its broad scope it provides a balanced overview and timely analysis of the field of English Education
