Serving The City Democracy And The Urban Crisis:

Environmental Activism and the Urban Crisis Robert Gioielli, 2015-09 Environmental Activism and the Urban Crisis focuses on the wave of environmental activism and grassroots movements that swept through America's older industrial cities during the late 1960s and early 1970s. Robert Gioielli offers incisive case studies of Baltimore, St. Louis, and Chicago to show how urban activism developed as an impassioned response to a host of racial, social, and political conflicts. As deindustrialization, urban renewal, and suburbanization caused the decline of the urban environment, residents, primarily African Americans and working class whites, organized to protect their families and communities from health threats and environmental destruction. Gioielli examines various groups' activism in response to specific environmental problems caused by the urban crisis in each city. In doing so, he forms concrete connections between environmentalism, the African American freedom struggle, and various urban social movements such as highway protests in Baltimore and air pollution activism in Chicago. Eventually, the efforts of these activists paved the way for the emergence of a new movement: environmental justice.

Reinventing Detroit Michael Peter Smith, 2017-09-29 This book addresses the questions of what went wrong with Detroit and what can be done to reinvent the Motor City. Various answers to the former deindustrialization, white flight, and a disappearing tax base are now well understood. Less discussed are potential paths forward stemming from alternative explanations of Detroit's long-term decline and reconsideration of the challenges the city currently faces. Urban crisis, socioeconomic, fiscal, and political, has seemingly narrowed the range of possible interventions. Growth-oriented redevelopment strategies have not reversed Detroit's decline, but in the wake of crisis, officials have increasingly funnelled limited public resources into the city's commercial core via an implicit policy of urban triage. The crisis has also led to the emergency management of the city by extra-democratic entities. As a disruptive historical event, Detroit's crisis is a moment teeming with political possibilities. The critical rethinking of Detroit's past, present, and future is essential reading for both urban studies scholars and the general public.

Community Development and Public Administration Theory Ashley E. Nickels, Jason D. Rivera, 2018-04-17 The concept of community development is often misunderstood, holding different meanings across different academic disciplines. Moreover, the concept of community development has been historically abstracted, not only in the way the concept has been conceptualized in academic studies but also by the way in which practitioners use the term in the vernacular. Departing from traditional definitions of community development, this volume applies the New Public Service (NPS) perspective of Public Administration to community development to illustrate how public administrators and public managers can engage in community development planning and implementation that results in more equitable and sustainable long-term outcomes. This book will be of interest to practitioners and researchers in public administration, management, public administration theory, community development, economic development, urban sociology, urban politics, and urban planning.

The Throes of Democracy Doctor Bryan McCann, 2013-04-04 In the 1980s, Brazil

emerged from two decades of military dictatorship and embarked on an experiment in full democracy for the first time in the nation's history. Since then Brazilians have sought to live up to the ideals of this experiment while negotiating dramatic economic and cultural transformations. In *The Throes of Democracy* Bryan McCann gives a panoramic view of this process exploring the relationships between the rise of the political left, the escalation of urban violence, the agribusiness boom and the spread of pentecostal evangelization. Brazil remains a land marked by deep inequality but in the last two decades the structure of that inequality has changed substantially. This is a country which remains an endlessly vital source of popular culture now bubbling forth from different corners of the map. In explaining these transformations this book provides a fascinating introduction to one of the 21st century's most significant countries.

[Crisis Cities](#) Kevin Fox Gotham, Miriam Greenberg, 2014-04-03 *Crisis Cities* blends critical theoretical insight with a historically grounded comparative study to examine the redevelopment efforts following the 9/11 and Hurricane Katrina disasters. Based on years of research in the two cities Gotham and Greenberg contend that New York and New Orleans have emerged as paradigmatic crisis cities representing a free market approach to post disaster redevelopment that is increasingly dominant for crisis stricken cities around the world. This mode of urbanization emphasizes the privatization of disaster aid, devolution of recovery responsibility to the local state, use of tax incentives and federal grants to spur market centered redevelopment and utopian branding campaigns to market the redeveloped city for business and tourism. Meanwhile it eliminates low income and public benefit standards that once underlay emergency provisions. Focusing on the pre and post history of disaster Gotham and Greenberg show how this approach exacerbates the uneven landscapes of risk and resiliency that helped produce crisis in the first place while potentially reproducing the conditions for future crisis. At the same time they highlight the expanding coalitions that formed following 9/11 and Katrina to contest these inequities and envision a more just and sustainable urban future.

Public Health Service Publication, 1969 **Urban Emergency (Mis)Management and the Crisis of Neoliberalism**, 2021-08-24 This volume places the Flint Michigan water contamination disaster in the context of a broader crisis of neoliberal governance in the United States. Authors from a range of disciplines including sociology, criminal justice, anthropology, history, communications and jurisprudence examine the failures in Flint but with an emphasis upon comparison, calling attention to similar trajectories for cities like Detroit and Pontiac in Michigan and Stockton in California. While the studies collected here emphasize policy failures, class conflict and racial oppression, they also attend to the resistance undertaken by Flint residents, Michiganders and U.S. activists as they fought for environmental and social justice. Contributors include Terressa A. Benz, Jon Carroll, Graham Cassano, Daniel J. Clark, Katrinell M. Davis, Michael Doan, David Fasenfest, A. E. Garrison, Peter J. Hammer, Ami Harbin, Shea Howell, Jacob Lederman, Raoul S. Lievanos, Benjamin J. Pauli and Julie Sze.
