Set Off In The Construction Industry:

Set Off in the Construction Industry Neil F. Jones, 1991 **Set-off Defences in International Commercial Arbitration** Christiana Fountoulakis, 2010-12-22 The book deals with set off in international arbitration proceedings In these proceedings set off is frequently the tool relied upon to resist a claim At the same time the legal intricacies make it hard to use The first part of the book provides a survey of set off including its definition significance and functions The second part offers a thorough comparative analysis of selected European laws of set off and reveals the dramatic differences between them The third and last part of the book deals with the problematic consequences of these differences and shows the limits and the inadequacy of the traditional choice of law doctrines While demonstrating how to overcome the practical hurdles of the present situation the third part also offers normative alternatives that should provide significant help in the adjudication of commercial disputes This title is included in Bloomsbury Professional's International Arbitration online service **A Commentary on "construction Contracts"** Raymond Joyce, 1996 This Housing Grants Construction and Regeneration Act 1996 which received Royal Assent during July 1996 will fundamentally change the way in which construction contracts are to administered and managed Part 2 of the Act which seeks to regulate the agreements entered into by parties involved with construction projects raises many questions for anyone responsible for construction contracts not least what is a construction contract This book presents a section by section commentary and critical review of Part 2 of the Act It identifies the main provisions and highlights the difficult issues to be addressed when negotiating drafting and administering construction contracts *Construction Conflict Management and Resolution* P. Fenn, R. Gameson, 2003-09-02 This book brings together over 40 papers presented at the 1992 International Construction Conflict Management Resolution Conference held in Manchester UK Six themes are covered including alternative dispute resolution conflict management claims procedures litigation and arbitration international construction and education and the future With papers from arbitrators architects barristers civil engineers chartered surveyors and solicitors this book represents the first multi disciplinary body of knowledge on Construction Conflict and will act as a unique source of reference for both legal and construction professionals *Construction Adjudication* John Riches, Christopher Dancaster, 2008-04-15 Adjudication has been the main means of settling construction disputes since it was first introduced by the Housing Grants Construction and Regeneration Act 1996 and a substantial body of case law has now built up This book established itself as the key authority on adjudication when it was first published It has now been revised to reflect the authors experience of adjudication in practice and to cover the large number of court decisions It features useful appendices on adjudication materials **The New Engineering Contract** Arthur McInnis, 2001 The introduction of the New Engineering Contract NEC encourages a systematic approach to contracting which is multidisciplinary in nature and fully interlocked in form The NEC is intended by its supporters to be more flexible and easier to use than any current leading traditional standard forms of contract It is believed that these

features reduce adversariality and disputes The NEC seeks to achieve this aim primarily through co operative management techniques and incentives built into the NEC s procedures This commentary analyses and evaluates these and related claims of innovation The New Engineering Contract A legal commentary examines the background to the NEC its design objectives structure procedures and likely judicial interpretation to determine whether it improves upon the traditional standard forms of contract Special attention is given in the commentary to the development and the significance of the principles underlying preparation of the NEC as well as the arguments in favour of and against them Throughout the detailed commentary upon the NEC clauses comparisons to the traditional forms are also made to highlight unique features and principles of general application The conclusion reached is that the NEC does make a significant contribution to the development of standard forms of contract addresses many of their short comings and offers one of the best models for their future development direction and design The commentary draws upon the body of the project management literature and legal analysis to support its conclusions The New Engineering Contract A legal commentary will be essential reading for lawyers barristers and solicitors as well as engineers and project managers
