Set-off Defences in International Commercial Arbitration Christiana Fountoulakis, 2010-12-22 The book deals with set off in international arbitration proceedings In these proceedings set off is frequently the tool relied upon to resist a claim At the same time the legal intricacies make it hard to use The first part of the book provides a survey of set off including its definition significance and functions The second part offers a thorough comparative analysis of selected European laws of set off and reveals the dramatic differences between them The third and last part of the book deals with the problematic consequences of these differences and shows the limits and the inadequacy of the traditional choice of law doctrines While demonstrating how to overcome the practical hurdles of the present situation the third part also offers normative alternatives that should provide significant help in the adjudication of commercial disputes This title is included in Bloomsbury Professional's International Arbitration online service

[EU Insolvency Law](#) McCormack, Gerard, 2022-09-21 This comprehensive book provides a clear analysis of the main features of the European Insolvency Regulation 2015/848 within the context of previous EU initiatives as well as addressing the contrasting objectives of universalism and territorialism which underpin cross border insolvency law It measures the EU regulations against the UNCITRAL Model Law on Cross Border Insolvency and compares this with how the Model Law has

been implemented elsewhere such as in the US and the UK **International Insolvency Law** Professor Paul Omar, 2013-02-28 International insolvency is a newly established branch of the study of insolvency that owes much to the phenomenon of cross border incorporations and conduct of business in more than one jurisdiction It is largely an offspring of globalization Paul Omar examines the development of domestic rules dealing with cross border instances and the many international projects in the field Commercial Agreements Jeremy Leong, 2024-07-05 Presenting a unique conceptual framework for interpreting and improving commercial agreements this book marries a sound theoretical foundation with practical strategies for negotiating drafting advising on and litigating such agreements **The European Insolvency Regulation and Implementing Legislations** Gilles Cuniberti, Antonio Leandro, 2024-05-02 This authoritative Commentary provides an in depth evaluation of the legislation regulating cross border insolvency within the European Union Bringing together a diverse team of legal scholars and practitioners from across the EU Member States it delivers incisive dissections of the European Insolvency Regulation EIR provisions which define the jurisdiction of the courts of EU Member States in insolvency proceedings as well as the national law that should be applied and provide for the automatic recognition of other Member State s judgements along with a regime of coordination between proceedings opened in different Member States

A Guide to the UNCITRAL Arbitration Rules Clyde Croft, Christopher Kee, Jeff Waincymer, 2013-04-25 The first version of the UNCITRAL Arbitration Rules was endorsed by the General Assembly of the United Nations in December 1976 Now considered one of UNCITRAL s greatest successes the rules have had an extraordinary impact on international arbitration as both instruments in their own right and as guides for others The Iran US Claims Tribunal for example employs a barely modified version of the rules for all claims and many multilateral and bilateral foreign investment treaties adopt the UNCITRAL Rules as an arbitral procedure The Rules are so pervasive and the consequences of the new version potentially so significant that they cannot be ignored This commentary on the Rules brings the official documents together in one volume and includes the insights and experiences of the Working Group that are not included in the official reports **Secured Credit and the Harmonisation of Law** Gerard McCormack, 2011-01-01 This book will be of great interest to practitioners policymakers and academics as well as students particularly postgraduate students of law and business throughout the world

Covenants and Third-Party Creditors Daniela Matri, 2017-10-17 This book adds to the debate on the effects of covenants on third party creditors externalities which have recently become a focus of discussion in the contexts of bankruptcy law corporate law and corporate governance The general thrust of the debate is that negative effects on third party creditors predominate because banks act in their own self interest After systematising the debated potential positive and negative externalities of covenants the book empirically examines these externalities It investigates the banks factual conduct and its effects on third party creditors in Germany and the US The study s most significant outcome is that it disproves the assumption that banks disregard third party creditors interests These findings are then interpreted with the tools of

economic analysis particularly with the concept of common pool resources CPRs Around the aggregated value of the debtor company's asset pool as CPR exists an n person prisoner's dilemma between banks and third party creditors No creditor knows when and under what conditions the other creditor will appropriate funds from the debtor company's asset pool This coordination problem is traditionally addressed by means of bankruptcy law and collaterals However the incentive structure that surrounds the bilateral private governance system created by covenants and an event of default clause a CPR private governance system is found to also be capable of tackling this problem Moreover the interaction between the different regulation spheres bankruptcy law collateral and the CPR private governance system has important implications for both the aforementioned discussions as well as the legal treatment of covenants and event of default clauses Covenants alone cannot be seen as an alternative to institutional regulation the complete CPR private governance system and its interaction with institutional regulation must also be taken into consideration In addition their function must first find more acceptance and respect in the legal treatment of covenants and event of default clauses The CPR private governance system fills a gap in the regulation of the tragedy of the commons by bankruptcy law and collateral This has particularly important implications for the German 138 BGB 826 BGB and ad hoc duties to disclose insider information
