Setting Boundaries The Anthropology Of Spatial And Social Organization:

Setting Boundaries Deborah Pellow, 1996-01-19 Proxemic studies concentrate on the structure and organization of space its design and use allocation and the relations encoded in it as aspects of cultural communication Space is perceived through the senses and since cultures use the senses differently they create boundaries differently Pellow in her edited collection of boundary studies focuses on the social conception and production of boundedness The essays by 10 scholars eight of them anthropologists explore the nature of boundaries in terms of change space and place society and culture politics class urbanization housing and secular and spiritual life *Managing Boundaries in Organizations* N. Paulsen, T.

Hernes, 2003-05-09 Drawing together an international group of scholars this book provides fresh and provocative perspectives on boundaries in organizations The emergence management and transformation of organizational boundaries is intrinsic to modern organization and poses one of the most persistent and potentially rewarding challenges to researchers and managers alike The book offers the latest insights into the nature of boundaries how they may be interpreted and studied as well as implications for managing The chapters include theoretical perspectives and cases from Europe Canada the USA Australia the Middle East and Africa **The Spatial Factor In African History** Allen M. Howard, Richard Matthew

Shain, 2005 In this collection authors apply spatial analysis to case studies of social economic and political dynamics in West Central and East Africa during the nineteenth and twentieth century Also included is a lengthy essay re interpreting tropical Africa 1800 1930 using spatial theory **The Spatial Construction of Organization** Tor Hernes, 2004-01-01 An important challenge to organization theory is to search for constructs that explain how contexts for work emerge evolve persist and change This book explores the concept of space as representing a wide variety of contexts Organization as a process as distinguished from organization as an entity is seen as the construction of space where space is the outcome of human action and interaction as well as providing a context for actions and interaction The book shows how different forms of space lie at the base of a number of developments in organization theory It then takes the step to show how contemporary developments in social science represented by works by writers such as Giddens Luhmann Latour and Bourdieu can be used to establish a dynamic understanding of organization as space Insights from these discussions are used to establish a unique and coherent way of understanding complexities of modern organization *Local Autonomy as a Human Right* Joshua B.

Forrest, 2021-08-27 *Local Autonomy as a Human Right* contends that local communities struggle to preserve their territorial autonomy over time despite changes to the broader political and geographic contexts within which they are embedded Forrest argues that this both reflects and is evidence of a worldwide embrace of local control as a key political and social value indeed of such importance that it should be embraced and codified as a human right This study weaves together evidence grounded in a variety of disciplines history geography comparative politics sociology public policy anthropology international jurisprudence rural studies urban studies to make clear that a presumed inherent moral right to local self

determination has been manifested in many different historical and social contexts This book constructs a compelling argument favoring a human right to local autonomy It identifies practical factors that help to account for the relative success of communities that are able to assert local control over time Here particular attention is paid to whether localities are able to generate policy and organizational capacity Forrest suggests that a focus on local policy and organizational capacity can help to explain why some communities attempting to assert greater local control are more successful than others Local Autonomy as a Human Right contributes to scholarly debates regarding the varied impacts of globalization with the place based perspective and moral emphasis on territorial centered rights put forth herein offering a necessary counter narrative to the often presumed predominance of global forces

Cities Made of Boundaries Benjamin N. Vis, 2018-09-17 Cities Made of Boundaries presents the theoretical foundation and concepts for a new social scientific urban morphological mapping method Boundary Line Type BLT Mapping Its vantage is a plea to establish a frame of reference for radically comparative urban studies positioned between geography and archaeology Based in multidisciplinary social and spatial theory a critical realist understanding of the boundaries that compose built space is operationalised by a mapping practice utilising Geographical Information Systems GIS Benjamin N Vis gives a precise account of how BLT Mapping can be applied to detailed historical reconstructed contemporary and archaeological urban plans exemplified by sixteenth to twenty first century Winchester UK and Classic Maya Chunchucmil Mexico This account demonstrates how the functional and experiential difference between compact western and tropical dispersed cities can be explored The methodological development of Cities Made of Boundaries will appeal to readers interested in the comparative social analysis of built environments and those seeking to expand the evidence base of design options to structure urban life and development

In Search of Paradise Li Zhang, 2012-09-15 A new revolution in homeownership and living has been sweeping the booming cities of China This time the main actors on the social stage are not peasants migrants or working class proletariats but middle class professionals and entrepreneurs in search of a private paradise in a society now dominated by consumerism No longer seeking happiness and fulfillment through collective sacrifice and socialist ideals they hope to find material comfort and social distinction in newly constructed gated communities This quest for the good life is profoundly transforming the physical and social landscapes of urban China Li Zhang who is from Kunming the capital of Yunnan province turns a keen ethnographic eye on her hometown She combines her analysis of larger political and social issues with fine grained details about the profound spatial cultural and political effects of the shift in the way Chinese urban residents live their lives and think about themselves In Search of Paradise is a deeply informed account of how the rise of private homeownership is reconfiguring urban space class subjects gender selfhood and ways of life in the reform era New seemingly individualistic lifestyles mark a dramatic move away from yearning for a social utopia under Maoist socialism Yet the privatization of property and urban living have engendered a simultaneous movement of public engagement among homeowners as they

confront the encroaching power of the developers This double movement of privatized living and public sphere activism Zhang finds is a distinctive feature of the cultural politics of the middle classes in contemporary China Theoretically sophisticated and highly accessible Zhang s account will appeal not only to those interested in China but also to anyone interested in spatial politics middle class culture and postsocialist governing in a globalizing world

Space and Spatial Analysis in Archaeology University of Calgary. Archaeological Association. Conference, Elizabeth C. Robertson, 2006 The archaeology of space and place is examined in this selection of papers from the 34th annual Chacmool Archaeological Conference

Protecting Suburban America Denise Lawrence-Zuniga, 2020-06-07 Protecting Suburban America explores the dynamics and conflicts inherent in preserving historic twentieth century suburban landscapes in America Bridging architecture anthropology planning and urban studies its unique approach combines a study of historic preservation with multi sited ethnographic fieldwork to shed fascinating light on issues of heritage preservation gentrification class ethnicity and contested values in suburbia These are subjects which reach far beyond the setting of the book s focus in California to touch on topical debates in cities suburbia and gentrifying neighborhoods worldwide At the heart of the book is a detailed comparative ethnography of preservation practices and the changing landscapes of five suburban cities where affluent homeowners have begun to restore their early twentieth century houses in neighborhoods once suffering from decline Not every neighbor however shares the same aesthetic values and complex dynamics can arise The study compares experiences in five different cities and in different long term immigrant and gentrifying populations Themes revealed include homeowner restoration practices aesthetic contestations local advocacy and public policy alongside an exploration of the social construction of the historic restoration process and how homeowners construct historical meaning in their homes and neighbourhoods These are themes with consequences for national and global settings of interest wherever contested preservation aesthetics and regulations are reshaping older residential neighbourhoods and their social dynamics

Public Anthropology in a Borderless World Sam Beck, Carl A. Maida, 2015-07-01 Anthropologists have acted as experts and educators on the nature and ways of life of people worldwide working to understand the human condition in broad comparative perspective As a discipline anthropology has often advocated and even defended the cultural integrity authenticity and autonomy of societies across the globe Public anthropology today carries out the discipline s original purpose grounding theories in lived experience and placing empirical knowledge in deeper historical and comparative frameworks This is a vitally important kind of anthropology that has the goal of improving the modern human condition by actively engaging with people to make changes through research education and political action
