Richard Caplan

Setting European Community Priorities 1991 9:

International Economic Policy in the 1990s William R. Cline, 1994 These eight lectures by noted economist William Cline provide a clear and concise account of some of the most important macroeconomic issues facing the world economy Designed for the nonspecialist but a source of fresh insight for the specialist as well the lectures synthesize the major trends in international economic policy for the 1990s Major themes include domestic and international economic stagnation adjustment to external imbalances trade policy including case studies of Japan and NAFTA the debt crisis reform in former communist states the economic future of Europe and environmental policy Cline who has made important contributions to the topics addressed reviews the forces that have contributed to policy problems and then evaluates the prospects for resolution He shows how an understanding of economics can help break down many policy problems into simple fundamentals and how empirical evidence is the acid test of any policy theory Cline's coverage of many of today's hot public policy issues is unique both in its accessibility and in its broadbrush approach to a set of concerns of immediate interest to economists policymakers and others concerned with international economic policy *Monetary and Exchange Rate Arrangements for Nafta* Mr. Tamim Bayoumi, Mr. Barry J. Eichengreen, 1993-03-01 This paper considers the extent to which the North American Free Trade Area NAFTA meets the criteria for a common currency area NAFTA is compared with the EC a regional grouping for which initial plans for a monetary union are already in place Most of the anticipated benefits from a monetary union in the EC apply with equal force to NAFTA However because the underlying disturbances are more diverse across members of NAFTA the costs of abandoning the exchange rate instrument are likely to be higher This is particularly true when NAFTA is compared to the EC's continental core *Europe and the Recognition of New States in Yugoslavia* Richard Caplan, 2005-09-01 Europe's recognition of new states in Yugoslavia remains one of the most controversial episodes in the Yugoslav crisis Richard Caplan offers a detailed narrative of events exploring the highly assertive role that Germany played in the episode the reputedly catastrophic consequences of recognition for Bosnia Herzegovina in particular and the radical departure from customary state practice represented by the EC's use of political criteria as the basis of recognition The book examines the strategic logic and consequences of the EC's actions but also explores the wider implications offering insights into European security policy at the end of the Cold War the relationship of international law to international relations and the management of ethnic conflict The significance of this book extends well beyond Yugoslavia as policymakers continue to wrestle with the challenges posed by violent conflict associated with state fragmentation *A Green Dimension for the European Community* David Judge, 2014-03-05 First Published in 1993 A Green Dimension for the European Community is a collection of nine essays from a range of contributors separated into two parts political issues and processes The theme discusses the idea that the introduction of the Single Market marks a particularly appropriate time to consider the political issues and processes affecting environmental policy in the European Community EC The contributors

argue that at such a time and in the face of such threats an understanding of the green dimension of the EC is more than an academic exercise This title concludes with a comprehensive index The Intergovernmental Conference on Political Union Finn Laursen, Sophie Vanhoonacker, 2023-12-11 The radical changes taking place in the international scene during the late 1980s have presented the European Communities with important new challenges The twelve Member States agreed that the only way to respond effectively to this new situation was to speed up the European integration process and in December 1990 two Intergovernmental Conferences were inaugurated focusing respectively on the development of an Economic and Monetary Union and a Political Union It was the difficult task of the Luxembourg and Dutch Presidencies to channel the often very diverging positions of the different actors in the process into one coherent set of amendments to the Treaties forming the European Communities This publication examines the positions which the different Member States the Commission and the European Parliament have been defending in the Intergovernmental Conference on Political Union and more particularly with regard to one of the most sensitive topics under discussion namely the development of a Common Foreign and Security Policy CFSP The introduction places the debate on the development of a Political Union and a CFSP in an historical perspective and gives an overview of the progression of the negotiations The concluding chapter presents a general framework for better understanding of the course and results of the negotiations and a critical evaluation of the outcome The annexes reproduce the main proposals on the development of a CFSP submitted to the Conference **European Community Law** Josephine Shaw, 1993 **The Federal Republic of Germany at Forty-Five** Peter H. Merkl, 2016-07-27 This five year review of the changing political scene in West Germany stresses interpretations and perspectives of sympathetic outside observers Given the dramatic unification of the country and its painful aftermath the emphasis is on the changing elements of German identity and on postunification problems Today s emerging perspectives are seen simultaneously in their domestic including East West German and in their international context with regard to Germany s role in Europe and the world *The Emerging European Union* David Michael Wood, Birol A. Yeşilada, 2007 Praised for its writing style organization and attention to historical detail this thoroughly updated Fourth Edition presents students with a comprehensive analysis of the history framework and agenda of the European Union Raising a variety of important issues this text focuses on the uniqueness of the European Union as an organization and helps students to critically consider its future **European Responses to Globalization and Financial Market Integration** A. Verdun, 2000-02-17 This book investigates the perceptions of political actors towards the creation of Economic and Monetary Union EMU in Europe The research is largely based on personal interviews conducted with key informants in central banks finance ministries employers organizations and trade unions in Britain France and Germany It examines why actors perceived EMU to serve or frustrate their interests It concludes that actors favoured EMU for a variety of reasons The book contributes to the literature of European integration and incorporates economic political and historical facts *International Labour Documentation*
