Setting The Table Investment Decisions For Sponsors Of Employee-directed Retirement Plans:

Setting the Table Keith Hoyer, 2002-07 The retirement dreams of Americans increasingly rest on defined contribution plans including 401 k 403 b 457 and similar programs They are incredibly popular with employers and employees More employees are covered by these plans than traditional pensions especially in the vast segment of smaller employers Probably more than any other factor the growth of employee directed plans has converted millions of savers into investors All defined contribution plans pass investment risk on to the employees and the vast majority allow employees to direct their own investment strategy Investment decision making is a shared responsibility between the plan sponsor and employees participants Being a plan sponsor is a tough job you have to make decisions affecting other people's retirement savings comply with various laws and fiduciary duties manage plan administration and investments simultaneously and be prepared to be second guessed by employees with incredibly sharp hindsight Who sets the table for employees Who sifts through 10 000 mutual funds and picks a dozen or so products on which participants will bet their future Most likely a small number of HR and finance professionals who have many other things to do with their time Excellent plan sponsors get results from their plan without sinking large amounts of time into running the plan They have the best of all worlds they run cost effective plans that require minimal attention from management and generate happy employees In my experience a solid governance process over investment matters does more than protect the sponsor from lawsuits it saves time saves money and increases employee satisfaction This book starts by walking the plan sponsor through a prudent and efficient governance process designing an investment policy based on scientific and human principles to meet employee needs We then go through the process of selecting investment products monitoring performance dealing with recordkeepers and bundled providers and communicating effectively with participants Throughout the book sponsors will pick up concise and practical advice on everyday management and special hot topics including company stock self directed brokerage investment advice lifestyle funds and much more If you're already running a plan with a strong investment program perhaps you'll pick up a few tips from this book to make improvements on the edges or save yourself some time If you are running a plan with less than adequate investments or with outright investment problems you should find the answers you need here Finally if your job is to manage assets or provide service to a plan sponsor I hope you'll gain some insight into the issues they face the unlikely unsung heroes that set the table for us and make possible our retirement dreams Click here to learn more at the Bellwether Consulting website

ERISA Principles Peter J. Wiedenbeck, Brendan S. Maher, 2024-02-22 ERISA the detailed and technical amalgam of labor law trust law and tax law directly governs trillions of dollars spent on retirement savings health care and other important benefits for more than 100 million Americans Despite playing this central role in the US economy and social insurance systems the complexities of ERISA are often understood by only a few specialists ERISA Principles elucidates employee benefit law from a policy perspective concisely explaining how common themes apply across a wide range of

benefit plans and factual contexts The book's non technical language and cross cutting conceptual organization reveal latent similarities and rationalize differences between the regulatory treatment of apparently disparate programs including traditional pensions 401 k and health care plans Important legal developments whether statutory judicial or administrative are framed and analyzed in an accessible principles centric manner explaining how ERISA functions as a coherent whole
