Origin of Life via Archaea Richard Gordon, 2024-08-26 This book surveys the models for the origin of life and presents a new model starting with shaped droplets and ending with life as polygonal Archaea it collects the most published micrographs of Archaea discovered only in 1977 which support this conclusion and thus provides the first visual survey of Archaea Origin of Life via Archaea's purpose is to add a new hypothesis on what are called shaped droplets as the starting point for flat polygonal Archaea supporting the Vesicles First hypothesis The book contains over 6000 distinct references and micrographs of 440 extant species of Archaea 41% of which exhibit polygonal phenotypes It surveys the intellectual battleground of the many ideas of the origin of life on earth chemical equilibrium autocatalysis and biotic polymers This book contains 17 chapters some coauthored on a wide range of topics on the origin of life including Archaea's origin patterns and species It shows how various aspects of the origin of life may have occurred at chemical equilibrium not requiring an energy source contrary to the general assumption For the reader's value its compendium of Archaea micrographs might also serve many other interesting questions about Archaea One chapter presents a theory for the shape of flat polygonal Archaea in terms of the energetics at the surface edges and corners of the S layer Another shows how membrane peptides may have originated The book also includes a large table of most extant Archaea that is searchable in the electronic version It ends with a chapter on problems needing further research Audience This book will be used by astrobiologists origin of life biologists physicists of small systems geologists biochemists theoretical and vesicle chemists

How Molecular Forces and Rotating Planets Create Life Jan Spitzer, 2021-02-09 A reconceptualization of origins research that exploits a modern understanding of non covalent molecular forces that stabilize living prokaryotic cells Scientific research into the origins of life remains exploratory and speculative Science has no definitive answer to the biggest questions What is life and How did life begin on earth In this book Jan Spitzer reconceptualizes origins research by exploiting a modern understanding of non covalent molecular forces and covalent bond formation a physicochemical approach propounded originally by Linus Pauling and Max Delbrück Spitzer develops the Pauling Delbrück premise as a physicochemical jigsaw puzzle that identifies key stages in life's emergence from the formation of first oceans tidal sediments and proto biofilms to progenotes proto cells and the first cellular organisms

Conflicting Models for the Origin of Life Stoyan K. Smoukov, Joseph Seckbach, Richard Gordon, 2023-03-14 Conflicting Models for the Origin of Life Conflicting Models for the Origin of Life provides a forum to compare and contrast the many hypotheses that have been put forward to explain the origin of life There is a revolution

brewing in the field of Origin of Life in the process of trying to figure out how Life started many researchers believe there is an impending second creation of life not necessarily biological Up to date understanding is needed to prepare us for the technological and societal changes it would bring Schrodinger s 1944 What is life included the insight of an information carrier which inspired the discovery of the structure of DNA In *Conflicting Models of the Origin of Life* a selection of the world s experts are brought together to cover different aspects of the research from progress towards synthetic life artificial cells and sub cellular components to new definitions of life and the unexpected places life could have emerge d Chapters also cover fundamental questions of how memory could emerge from memoryless processes and how we can tell if a molecule may have emerged from life Similarly cutting edge research discusses plausible reactions for the emergence of life both on Earth and on exoplanets Additional perspectives from geologists philosophers and even roboticists thinking about the origin of life round out this volume The text is a state of the art snapshot of the latest developments on the emergence of life to be used both in graduate classes and by citizen scientists Audience Researchers in any area of astrobiology as well as others interested in the origins of life will find a modern and current review of the field and the current debates and obstacles This book will clearly illustrate the current state of the art and engage the imagination and creativity of experts across many disciplines

The Emergence of Life on Earth Iris Fry,2000 How did life emerge on Earth Is there life on other worlds These questions until recently confined to the pages of speculative essays and tabloid headlines are now the subject of legitimate scientific research This book presents a unique perspective a combined historical scientific and philosophical analysis which does justice to the complex nature of the subject The book s first part offers an overview of the main ideas on the origin of life as they developed from antiquity until the twentieth century The second more detailed part of the book examines contemporary theories and major debates within the origin of life scientific community Topics include Aristotle and the Greek atomists conceptions of the organism Alexander Oparin and J B S Haldane s 1920s breakthrough papers Possible life on Mars

How Blind is the Watchmaker? Neil Broom,2019-01-15 First published in 1998 this book shows that modern materialistic science for all its ability to analyse in truly impressive detail the workings of the living world remains powerless to explain the phenomenon of life itself Drawing on a variety of examples from experience of the biological world as a practising scientist the author shows that the qualities of purpose intentionality and mind suffuse almost every aspect of the living realm yet these same qualities remain totally unaccounted for by science itself The author argues that the all too common humanistic dismissal of these crucial components of reality undermines the integrity of science itself and is intellectually perverse He argues that scientific materialism despite its enormous influence in shaping today s high tech world actually presents a gross trivialization of the concept of life Further while unable of itself to provide ultimate answers to the mystery of life this science uncovers facts that point beyond these to a transcendent theistic dimension or in the words of the title to a Watchmaker who indeed is not blind

Genesis - In The Beginning Joseph Seckbach,2012-03-21 Genesis In The

Beginning deals with the origin and diversity of Life and early biological evolution and discusses the question of where hot or cold sources and when the beginning of Life took place Among the sections are chapters dealing with prebiotic chemical processes and considering self replication of polymers in mineral habitats One chapter is dedicated to the photobiological regime on early Earth and the emergence of Life This volume covers the role of symmetry information and order homochiral biomolecules in the beginning of Life The models of protocells and the genetic code with gene transfer are important topics in this volume Three chapters discuss the Panspermia hypothesis to answer Are we from outer Space Other chapters cover the Astrobiological aspects of Life in the Universe in extraterrestrial Planets of the Solar System and deal with cometary hydrosphere and its connection to Earth We conclude with the history and frontiers of Astrobiology *Taphonomy* Peter A. Allison, David J. Bottjer, 2010-11-03 Taphonomic bias is a pervasive feature of the fossil record A pressing concern however is the extent to which taphonomic processes have varied through the ages It is one thing to work with a biased data set and quite another to work with a bias that has changed with time This book includes work from both new and established researchers who are using laboratory field and data base techniques to characterise and quantify the temporal and spatial variation in taphonomic bias It may not provide all the answers but it will at least shed light on the right questions

Intracellular Calcium Anthony K. Campbell, 2014-10-14 Thousands of imaginative scientists over more than a century have revealed the fascinating story of intracellular calcium through a pathway of ingenious invention and discovery Intracellular Calcium the definitive book on this topic reveals The pathway of discovery and invention of intracellular calcium over more than 100 years The evidence for intracellular calcium as a universal switch in all animal plant fungal and microbial cells How the components required for calcium signalling are named and classified The ingenious technology which has been developed to study intracellular calcium How calcium is regulated inside cells and how it works to trigger an event The role of intracellular calcium in disease cell injury and cell death How many drugs work through the calcium signalling system How intracellular calcium is involved in the action of many natural toxins How the intracellular calcium signalling system has evolved over 4000 million years showing why it was crucial to the origin of life A key principle presented throughout the book is the molecular variation upon which the intracellular calcium signalling system depends This variation occurs within the same cell type and between cells with different functions providing the invisible matrix upon which Darwin and Wallace's Natural Selection depends Featuring more than 100 figures including detailed chemical structures as well as pictures of key pioneers in the field a bibliography of more than 1500 references as well as detailed subject and organism indices this definitive work provides a unique source of scholarship for teachers and researchers in the biomedical sciences and beyond Geology of Fossil Fuels - Oil and Gas Zhaocai Sun, 1997 **Creating Scientific Controversies** David Harker, 2015-10-01 For decades cigarette companies helped to promote the impression that there was no scientific consensus concerning the safety of their product The appearance of controversy however was misleading designed to confuse the public

and to protect industry interests Created scientific controversies emerge when expert communities are in broad agreement but the public perception is one of profound scientific uncertainty and doubt In the first book length analysis of the concept of a created scientific controversy David Harker explores issues including climate change Creation science the anti vaccine movement and genetically modified crops Drawing on work in cognitive psychology social epistemology critical thinking and philosophy of science he shows readers how to better understand evaluate and respond to the appearance of scientific controversy His book will be a valuable resource for students of philosophy of science environmental and health sciences and social and natural sciences

The Incredible Human Journey Alice Roberts, 2010-04-05 Alice Roberts has been travelling the world from Ethiopian desert to Malay peninsula and from Russian steppes to Amazon basin in order to understand the challenges that early humans faced as they tried to settle continents On her travels she has witnessed some of the daunting and brutal challenges our ancestors had to face mountains deserts oceans changing climates terrifying giant beasts and volcanoes But she discovers that perhaps the most serious threat of all came from other humans When our ancestors set out from Africa there were already two other species of human on the planet Neanderthal in Europe and Homo erectus in Asia Both contrary to popular perception were intelligent adept at making tools and weapons and were long adapted to their environments So Alice asks why did only Homo sapiens survive Part detective story part travelogue and drawing on the latest genetic and archaeological discoveries Alice examines how our ancestors evolved physically in response to these challenges finding out how our colour shape size diet disease resistance and even athletic ability have been shaped by the range of environments that our ancestors had to survive She also relates how astonishingly closely related we all are As a lecturer in Anatomy at Bristol University Alice Roberts is eminently qualified to write this book As a talented artist she is perfectly qualified to illustrate it and dotted throughout this lively book are many of the sketches and photographs from her travels

Woven Arch Bridge LIU Yan, 2020-11-30 This book focuses on the woven arch bridge an arch shaped structure that is one of the most extraordinary timber building traditions of the world The woven arch bridge exists widely in different cultures and its specific nature is conceptualized by the author as a kind of universal uniqueness challenging widespread viewpoints on its origin and genealogy Taking this argument as its main thread the book traces the histories of different woven arch bridge cultures and investigates in particular the woven arch bridge in the mountains of Southeast of China from three angles using both archaeological and

anthropological methods Resting upon these case studies a definition of typology and a new theory of structural evolution are established while the book also draws comparisons between western and eastern timber building cultures and offers new insights on the differences between East Asia and Europe The book also provides a large number of examples and illustrations of the bridge and will be of great value and inspiration for architects and scholars studying the history of architecture bridges and construction while also appealing to general readers interested in historical bridges and traditional construction technology *The New Larned History for Ready Reference, Reading and Research* Josephus Nelson

Larned,1924 **The Hippocratic Treatises "On Generation", On the Nature of the Child, "Diseases IV"** Iain M. Lonie,2011-09-12 No detailed description available for The Hippocratic Treatises On Generation On the Nature of the Child Diseases IV **Charged Particles in Oncology** Marco Durante,Francis A. Cucinotta,Jay S. Loeffler,2018-01-31 High energy charged particles represent a cutting edge technique in radiation oncology Protons and carbon ions are used in several centers all over the world for the treatment of different solid tumors Typical indications are ocular malignancies tumors of the base of the skull hepatocellular carcinomas and various sarcomas The physical characteristics of the charged particles Bragg peak allow sparing of much more normal tissues than it is possible using conventional X rays and for this reason all pediatric tumors are considered eligible for protontherapy Ions heavier than protons also display special radiobiological characteristics which make them effective against radioresistant and hypoxic tumors On the other hand protons and ions with high charge Z and energy HZE particles represent a major risk for human space exploration The main late effect of radiation exposure is cancer induction and at the moment the dose limits for astronauts are based on cancer mortality risk The Mars Science Laboratory MSL measured the dose on the route to Mars and on the planet s surface suggesting that a human exploration missions will exceed the radiation risk limits Notwithstanding many studies on carcinogenesis induced by protons and heavy ions the risk uncertainty remains very high In this research topic we aim at gathering the experiences and opinions of scientists dealing with high energy charged particles either for cancer treatment or for space radiation protection Clinical results with protons and heavy ions as well as research in medical physics and pre clinical radiobiology are reported In addition ground based and spaceflight studies on the effects of space radiation are included in this book Particularly relevant for space studies are the clinical results on normal tissue complications and second cancers The eBook nicely demonstrates that particle therapy in oncology and protection of astronauts from space radiation share many common topics and can learn from each other
