of the most significant global trends and issues relating to indigenous and cross cultural social work **Political Spirituality for a Century of Water Wars** James W. Perkinson,2019-04-11 This book offers resources for re imagining the biblical vision of water for a time quickly emerging as the century of water wars It takes its urgency from the author s 5 year activist engagement with a grass roots led social movement pushing back on Detroit water shutoffs as global climate crises intensify Concerned with both white supremacist biopolitics and continuing settler colonial reliance on the Doctrine of Christian Discovery and beholden to an interreligious methodology of crossing over and coming back the text creatively re reads the biblical tradition under tutelage to the mythologies and practices of various indigenous cultures Algonquian Huron Haitian Vodouisant and Celtic Norman whose embrace of water is animate and spiritual as well as political and communal Not enough today merely to engage the political battle over water rights however indigenous wisdom and biblical prophecy alike insist that recovery of water spirituality is central to a sustainable future **Hands-On Science and Technology for Ontario, Grade 1** Jennifer E. siblings Gizhaa and Inaa accompany their father on a historic diplomatic journey to the capital they find themselves at the centre of a plot to restore an ancient government Someone doesn't want their journey to succeed however and they are soon entwined in political espionage They must decide if they will help to overthrow the Immortals or trust their own gifts which warn them of great danger ahead When it seems Inaa's heart is compromised leading her into a reckless relationship Gizhaa wonders if he will lose her But how much will it cost him and the world

Questioning the Secular State David Westerlund, 1996 Should the state be secular or religious Here the author seeks to determine the extent of the role of religion in political life

Summary of Braiding Sweetgrass SellWave Audio, 2025-09-23 In Braiding Sweetgrass botanist and plant ecologist Robin Wall Kimmerer weaves together two powerful ways of knowing the analytical lens of Western science and the wisdom of her Potawatomi heritage From her elders and family she learned to see plants and animals as our oldest teachers while her training as a scientist taught her to ask questions of nature with precision and curiosity By combining these perspectives she offers a vision of what it means to view humans as the younger brothers of creation Through lyrical storytelling and ecological insight Braiding Sweetgrass reveals that awakening to a deeper ecological consciousness requires recognizing and honoring our reciprocal relationship with the Earth Kimmerer argues that once we begin listening to the languages of other beings whether the whisper of plants the patterns of animals or the flow of water we open ourselves to understanding the countless life giving gifts the natural world provides More than a book of science Braiding Sweetgrass is an invitation to gratitude care and responsibility It encourages us to move beyond seeing the Earth only as a resource and instead as a community we are called to respect and give back to In celebrating this reciprocity Kimmerer shows how we can heal our relationship with the land and in doing so heal ourselves

Braiding Sweetgrass Robin Kimmerer, 2013-09-16 As a botanist Robin Wall Kimmerer has been trained to ask questions of nature with the tools of science As a member of the Citizen Potawatomi Nation she embraces the notion that plants and animals are our oldest teachers In Braiding Sweetgrass Kimmerer brings these two lenses of knowledge together to take us on a journey that is every bit as mythic as it is scientific as sacred as it is historical as clever as it is wise Elizabeth Gilbert Drawing on her life as an indigenous scientist and as a woman Kimmerer shows how other living beings asters and goldenrod strawberries and squash salamanders algae and sweetgrass offer us gifts and lessons even if we've forgotten how to hear their voices In reflections that range from the creation of Turtle Island to the forces that threaten its flourishing today she circles toward a central argument that the awakening of ecological consciousness requires the acknowledgment and celebration of our reciprocal relationship with the rest of the living world For only when we can hear the languages of other beings will we be capable of understanding the generosity of the earth and learn to give our own gifts in return

Coming Down from Above Lee Irwin,2014-10-20 For longer than five centuries Native Americans have struggled to adapt to colonialism missionization and government control policies This first comprehensive survey of prophetic movements in Native North America tells how religious leaders blended indigenous beliefs with Christianity s prophetic traditions to respond to those challenges Lee Irwin gathers a scattered literature to provide a single volume overview that depicts American Indians creative synthesis of their own religious beliefs and practices with a variety of Christian theological ideas and moral teachings He traces continuities in the prophetic tradition from eighteenth century Delaware prophets to Western dream dance visionaries showing that Native American prophecy was not merely borrowed from Christianity but emerged from an interweaving of Christian and ancient North American teachings integral to Native religions From the highly assimilated ideas of the Puget Sound Shakers to such resistance movements as that of the Shawnee Prophet Irwin tells how the integration of non Native beliefs with prophetic teachings gave rise to diverse ethnotheologies with unique features He surveys the beliefs and practices of the nation to which each prophet belonged then describes his or her life and teachings the codification of those teachings and the impact they had on both the community and the history of Native religions Key hard to find primary texts are included in an appendix An introduction to an important strand within the rich tapestry of Native religions *Coming Down from Above* shows the remarkable responsiveness of those beliefs to historical events It is an unprecedented encyclopedic sourcebook for anyone interested in the roots of Native theology

What Kind of Ancestor Do You Want to Be? John Hausdoerffer,,Brooke Parry Hecht,Melissa K. Nelson,Katherine Kassouf Cummings,2021-05-24 As we face an ever more fragmented world What Kind of Ancestor Do You Want to Be demands a return to the force of lineage to spiritual social and ecological connections across time It sparks a myriad of ageless yet urgent questions How will I be remembered What traditions do I want to continue What cycles do I want to break What new systems do I want to initiate for those yet to be born How do we endure Published in association with the Center for Humans and Nature and interweaving essays interviews and poetry this book brings

together a thoughtful community of Indigenous and other voices including Linda Hogan Wendell Berry Winona LaDuke Vandana Shiva Robin Kimmerer and Wes Jackson to explore what we want to give to our descendants It is an offering to teachers who have come before and to those who will follow a tool for healing our relationships with ourselves with each other and with our most powerful ancestors the lands and waters that give and sustain all life **Culturally Responsive**

Pedagogy Fatima Pirbhai-Illich,Shauneen Pete,Fran Martin,2017-03-03 This book convincingly argues that effective culturally responsive pedagogies require teachers to firstly undertake a critical deconstruction of Self in relation to and with the Other and secondly to take into account how power affects the socio political cultural and historical contexts in which the education relation takes place The contributing authors are from a range of diaspora indigenous and white mainstream communities and are united in their desire to challenge the hegemony of Eurocentric education and to create new educational spaces that are more socially and environmentally just In this venture the ideal education process is seen to be inherently critical and intercultural where mainstream and marginalized colonized and colonizer indigenous and settler communities work together to decolonize selves teacher student relationships pedagogies the curriculum and the education system itself This book will be of great interest and relevance to policy makers andresearchers in the field of education teacher educators and pre and in service teachers Drinking from the Fire Hose Christopher J Frank,Paul

Magnone,2011-09-01 You re sitting in a windowless conference room Twenty minutes into the meeting the presenter finally makes it to slide four of a thirty two slide deck At least you can read this one unlike the others which were crammed with numbers graphs and charts You look around wondering if anyone else is following the presentation Just about everyone these days suffers from information overload the 24 7 explosion from our computers smartphones media colleagues and customers Information is essential to making intelligent decisions but more often than not it simply overwhelms us It s like trying to drink from a fire hose The question isn t how to stop all those e mails meetings conference calls and fat reports that s impossible The question is what to do with them How do you find the truly essential nuggets of information and use them with confidence The solution proposed by Christopher Frank and Paul Magnone sounds deceptively simple Learn how to ask the right questions at the right time Whatever field you re in asking smarter questions will expose you to new information point you to connections between seemingly unrelated facts and open new avenues of discussion with your colleagues The authors explain the seven questions that can help you bring a big picture perspective to problems that often leave others buried in irrelevant details And they show through real life case studies including Trader Joe s Starbucks Kodak Microsoft iRobot and IBM how their method can have a dramatic impact It really is possible to convert the fire hose of information into useful insights Consider a nonbusiness example the 2010 Icelandic volcano eruption that sent a giant ash cloud toward Europe Tens of thousands of flights were canceled and five million passengers stranded leading to billions in economic losses Europe s best scientists generated oceans of data and carefully modeled the cloud s dispersion pattern But no one could

answer the essential question Was the concentration of volcanic ash in the air enough to damage a jet engine Without that key answer all the carefully gathered facts were useless to the decision makers Once you adopt the seven questions you ll start having more productive brainstorming sessions You ll answer critical questions faster and find unexpected solutions to important problems And you ll get better at communicating to your colleagues with more clarity and focus turning down the fire hose that other people have to cope with
