An Introduction to International Institutional Law Jan Klabbers, 2009-05-14 International institutions are powerful players on the world stage and every student of international law requires a clear understanding of the forces that shape them For example with increasing global influence comes the need for internal control and accountability This thought provoking overview considers these and other forces that govern international institutions such as the UN EU and WTO and the complex relationship that exists between international organizations and their member states Covering recent scholarly developments such as the rise of constitutionalism and global administrative law and analysing the impact of important cases such as the ICJ s Genocide case 2007 and the Behrami judgment of the European Court of Human Rights 2007 its clarity of explanation and analytical approach allow students to understand and think critically about a complex subject **Global**

Marine Science and Carlsberg - The Golden Connections of Johannes Schmidt (1877-1933) Bo Poulsen, 2016-11-21 By accident the world famous brewery Carlsberg became a central force in global marine science during the first three decades of the 20th century Within a core group of scientists and managers Johannes Schmidt 1877 1933 was the key figure combining the efforts of the International Council for the Exploration of the Sea ICES the Danish state and several private companies Launching 26 oceangoing expeditions Schmidt made landmark discoveries such as the breeding ground for the Atlantic eel in the Sargasso Sea The scientific frontier was pushed literally kilometres into the deep sea and across the World s oceans While the formal North Atlantic Empire of the small state of Denmark was in decline an informal empire of science was erected instead Shortlisted for the Society for Nautical Research Anderson Medal for published works on Maritime History in 2016 *Science, Geopolitics and Culture in the Polar Region* Professor Sverker Sörlin, 2013-10-28 Throughout the twentieth century glaciologists and geophysicists from Denmark Norway and Sweden made important scientific contributions across the Arctic and Antarctic This research was of acute security and policy interest during the Cold War as knowledge of the polar regions assumed military importance But scientists also helped make the polar regions Nordic spaces in a cultural and political sense with scientists from Norden punching far above their weight in terms of population geographical size or economic activity This volume presents an image of Norden that stretches far beyond its conventional limits covering a vast area in the North Atlantic and the Arctic Sea as well as parts of Antarctica Rich in resources scarce in population but critically important in global and regional geopolitics these spaces were contested by major powers such as Russia the United States Canada and in the Antarctic Argentina Australia South Africa and others The empirical focus on Danish Norwegian and Swedish influence in the polar regions during the twentieth century embraces a diverse array of themes from the role of science in policy and diplomacy to the tensions between nationalism and internationalism with clear relevance to the important role science plays in contemporary discussions about Nordic engagement with the polar regions North Sea Dynamics Jürgen Sündermann, W.
