Several Lives Of Chester Himes:

The several lives of Chester Himes, 1997 The Writings of Chester Himes are colored by a fascinating blend of hatred and tenderness of hard boiled realism and generous idealism His life was complex his relationships complicated How did this gifted son of a respectable southern black family become a juvenile delinquent How did he acquire self esteem and a new sense of identity by writing short stories while in the Ohio state penitentiary Drawn from his letters notebooks memoirs and fiction this straightforward account of Himes's varied episodic life attempts to trace the origins of his significant literary gift It details the socioeconomic familial and cultural background that fed his ambivalent views on race in America His Deep South childhood his adolescence in the Midwest his young manhood in prison his years as a menial laborer his struggle as an author in California and New York City and finally his glory days as an expatriate and celebrity in France and Spain are plumbed deeply for their effects upon his creative urges and his works In his native country Himes is recalled more as the author of successful detective novels such as *Cotton Comes to Harlem* than as a practitioner of the art of fiction In France and Spain his adopted countries he is regarded as a literary master This critical biography is the bittersweet story of a troubled man who found salvation in writing

colleague of Richard Wright Eventually he settled in Spain and died there in 1984 This critical biography is the bittersweet story of a troubled man who found salvation in writing Edward Margolies is Professor Emeritus English and American Studies College of Staten Island City University of New York Michel Fabre deceased was Professor Emeritus American Studies Universite de la Sorbonne *Archives of Flesh* Robert Reid-Pharr,2016-12-13 Enlists the principles of post humanist critique in order to investigate decades of intimate dialogues between African American and Spanish intellectuals In *Archives of Flesh* Robert Reid Pharr reveals the deep history of intellectual engagement between African America and Spain Opening a fascinating window onto black and anti Fascist intellectual life from 1898 through the mid 1950s Reid Pharr argues that key institutions of Western Humanism including American colleges and universities developed in intimate relation to slavery colonization and white supremacy This retreat to rigidly established philosophical and critical traditions can never fully address or even fully recognize the deep seated hostility to black subjectivity underlying the humanist ideal of a transcendent Manhood Calling for a specifically anti white supremacist reexamination of the archives of black subjectivity and resistance Reid Pharr enlists the principles of post humanist critique in order to investigate decades of intimate dialogues between African American and Spanish intellectuals including Salaria Kea Federico Garcia Lorca Nella Larsen Langston Hughes Richard Wright Chester Himes Lynn Nottage and Pablo Picasso In the process Reid Pharr takes up the African American Spanish Archive in order to resist the anti corporeal anti black anti human biases that stand at the heart of Western Humanism **Ghetto Images in Twentieth-Century American Literature** Tyrone R. Simpson II,2012-01-30 This book explores how six American writers have artistically responded to the racialization of U S frostbelt cities in the twentieth century Using the critical tools of spatial theory critical race theory urban history and sociology Simpson explains how these writers imagine the subjective response to the race making power of space **Romance and Rights** Alex Lubin,2009-07 A study of the tensions between the private and public realms of interracial relationships **The Black Cultural Front** Brian Dolinar,2012-07-09 The Black Cultural Front describes how the social and political movements that grew out of the Depression facilitated the left turn of several African American artists and writers The Communist led John Reed Clubs brought together Black and white writers in writing collectives The efforts of the Congress of Industrial Organizations CIO to recruit Black workers inspired growing interest in the labor movement One of the most concerted efforts was made by the National Negro Congress NNC a coalition of civil rights and labor organizations which held cultural panels at its national conferences fought segregation in the culture industries promoted cultural education and involved writers and artists in staging mass rallies during World War II The formation of a black cultural front is examined by looking at the works of poet Langston Hughes novelist Chester Himes and cartoonist Ollie Harrington While none of them were card carrying members of the Communist Party they all participated in the Left at one point in their careers Interestingly they all turned to creating popular culture in order to reach the black masses who were captivated by the movies radio newspapers and detective novels

There are chapters on the Hughes Simple stories Himes detective fiction and Harrington's Bootsie cartoons Collectively the experience of these three figures contributes to the story of a long movement for African American freedom that flourished during the 1930s 1940s and 1950s Yet this book also stresses the impact that McCarthyism had on dismantling the Black Left and how it affected everyone involved Each was radicalized at a different moment and for varied reasons Each suffered for their past allegiances whether fleeing to the haven of the Black Bank in Paris or staying home and facing the House Un American Activities Committee HUAC Yet the lasting influence of the Depression in their work was evident for the rest of their lives

"Born in a Mighty Bad Land" Jerry H. Bryant, 2003-04-03 The figure of the violent man in the African American imagination has a long history He can be found in 19th century bad man ballads like Stagolee and John Hardy as well as in the black convict recitations that influenced gangsta rap Born in a Mighty Bad Land connects this figure with similar characters in African American fiction Many writers McKay and Hurston in the Harlem Renaissance Wright Baldwin and Ellison in the 40s and 50s Himes in the 50s and 60s saw the bad nigger as an archetypal figure in the black imagination and psyche Blaxploitation novels in the 70s made him a virtually mythical character More recently Mosley Wideman and Morrison have presented him as ghetto philosopher and cultural adventurer Behind the folklore and fiction many theories have been proposed to explain the source of the bad man's intra racial violence Jerry H Bryant explores all of these elements in a wide ranging and illuminating look at one of the most misunderstood figures in African American culture

The Lever of Riches Joel Mokyr, 1992-04-09 In a world of supercomputers genetic engineering and fiber optics technological creativity is ever more the key to economic success But why are some nations more creative than others and why do some highly innovative societies such as ancient China or Britain in the industrial revolution pass into stagnation Beginning with a fascinating concise history of technological progress Mokyr sets the background for his analysis by tracing the major inventions and innovations that have transformed society since ancient Greece and Rome What emerges from this survey is often surprising the classical world for instance was largely barren of new technology the relatively backward society of medieval Europe bristled with inventions and the period between the Reformation and the Industrial Revolution was one of slow and unspectacular progress in technology despite the tumultuous developments associated with the Voyages of Discovery and the Scientific Revolution What were the causes of technological creativity Mokyr distinguishes between the relationship of inventors and their physical environment which determined their willingness to challenge nature and the social environment which determined the openness to new ideas He discusses a long list of such factors showing how they interact to help or hinder a nation's creativity and then illustrates them by a number of detailed comparative studies examining the differences between Europe and China between classical antiquity and medieval Europe and between Britain and the rest of Europe during the industrial revolution He examines such aspects as the role of the state the Chinese gave up a millennium wide lead in shipping to the Europeans for example when an Emperor banned large ocean going vessels the

impact of science as well as religion politics and even nutrition He questions the importance of such commonly cited factors as the spill over benefits of war the abundance of natural resources life expectancy and labor costs Today an ever greater number of industrial economies are competing in the global market locked in a struggle that revolves around technological ingenuity The Lever of Riches with its keen analysis derived from a sweeping survey of creativity throughout history offers telling insights into the question of how Western economies can maintain and developing nations can unlock their creative potential

From the Plantation to the Prison Tara T. Green, 2008 According to George Jackson black men born in the US are conditioned to accept the inevitability of being imprisoned Being born a slave in a captive society and never experiencing any objective basis for expectation had the effect of preparing me for the progressively traumatic misfortune that led so many black men to the prison gate I was prepared for prison It required only minor psychic adjustments As Jackson writes from his prison cell his statement may seem to be only a product of his current status However history proves his point Indeed some of the most well known and respected black men have served time in jail or prison Among them are Martin Luther King Jr Malcolm X Marcus Garvey and Frederick Douglass This book is an examination of the various forms that imprisonment as a social historical and political experience of African Americans has taken Confinement describes the status of individuals who are placed within boundaries either seen or unseen but always felt A word that suggests extensive implications confinement describes the status of persons who are imprisoned and who are unjustly relegated to a social status that is hostile rendering them powerless and subject to the rules of the authorities Arguably confinement appropriately describes the status of African Americans who have endured spaces of confinement which include but are not limited to plantations Jim Crow societies and prisons At specific times these spaces of confinement have been used to oppress African Americans socially politically and spiritually Contributors examine the related experiences of Malcolm X Bigger Thomas of Native Son and Angela Davis
