The Genetics and Biology of Sex Determination Derek J. Chadwick,Jamie A. Goode,2002-04-26 Nature employs a wide variety of sex determining mechanisms and it is only comparatively recently that the tools have become available for these to be explored at the cellular and molecular levels A major landmark was the discovery in 1990 of the SRY gene and the subsequent demonstration of its key role in triggering male sex determination in transgenic mice This book reviews and discusses our current understanding of the molecular genetic pathways of sex determination with special emphasis on vertebrates It features comparisons with other modes of sex determination consideration of the biology of sexual development and discussion of the evolution of sex determining mechanisms By bringing together an international and interdisciplinary group of experts who study many different aspects of the problem the book highlights much new and exciting work in this area and serves to identify and stimulate promising new research directions **The 7 Sexes** Elof Axel Carlson,2013-02-12 What makes us male or female A geneticist explains the history of scientific research into human sexuality and reproduction In this book geneticist and science historian Elof Carlson tells the incredible story of the difficult quest to understand how the body forms girls and boys Carlson s history takes us from antiquity to the present day to detail how each component of human reproduction and sexuality was identified and studied how this knowledge enlarged our understanding of sex determination and how it was employed to interpret such little understood aspects of human biology as the origin of intersex births Reveals the various scientific advances in both methods and understanding that allowed researchers to identify anatomical structures gametes sex hormones sex chromosomes and ultimately a firm comprehension of the genetics of sex This scientific story of discovery is quite fascinating Barbara Baumgartner Washington University St Louis *Pathology and Epidemiology of Cancer* Massimo Loda,Lorelei A.
