Cultural Constructions of Gender

## Sex and Temperament in Three Primitive Societies

---

We have now considered in detail the approved personalities of each sex among three primitive peoples. We found the Arapesh—both men and women—displaying a personality that, out of our historically limited preoccupations, we would call maternal in its parental aspects, and feminine in its sexual aspects. We found men, as well as women, trained to be co-operative, unaggressive, responsive to the needs and demands of others. We found no idea that sex was a powerful driving force either for men or for women. In marked contrast to these attitudes, we found among the Mundugumor that both men and women developed as ruthless, aggressive, positively sexed individuals, with the maternal cherishing aspects of personality at a minimum. Both men and women approximated to a personality type that we in our culture would find only in an undisciplined and very violent male. Neither the Arapesh nor the Mundugumor profit by a contrast between the sexes; the Arapesh ideal is the mild, responsive man married to the mild, responsive woman; the Mundugumor ideal is the violent aggressive man married to the violent aggressive woman. In the third tribe, the Tchambuli, we found a genuine reversal of the sex attitudes of our own culture, with the woman the dominant, impersonal, managing partner, the man the less responsible and the emotionally dependent person. These three situations suggest, then, a very definite conclusion. If those temperamental attitudes which we have traditionally regarded as feminine—such as passivity, responsiveness, and a willingness to cherish children—can so easily be set up as the masculine pattern in one tribe, and in another be outlawed for the majority of women as well as for the majority of men, we no longer have any basis for regarding such aspects of behaviour as sex-linked. And this conclusion becomes even stronger when we consider the actual reversal in Tchambuli of the position of dominance of the two sexes, in spite of the existence of formal patrilineal institutions.

The material suggests that we may say that many, if not all, of the personality traits which we have called masculine or feminine are as lightly linked to sex as are the clothing, the manners, and the form of head-dress that a society at a given period assigns to either sex. When we consider the behaviour of the typical Arapesh man or woman as contrasted with the behaviour of the typical Mundugumor man or woman, the evidence is overwhelmingly in favour of the strength of social conditioning. In no other way can we account for the almost complete uniformity with which Arapesh children develop into contented, passive, secure persons, while Mundugumor children develop as characteristically into violent, aggressive, insecure persons. Only to the impact of the whole of the integrated culture upon the growing child can we lay the formation of the contrasting types. There is

*Sex and Temperament* Margaret Mead, 2016-05-10 A precursor to Mead's illuminating *Male Female Sex Temperament* lays the groundwork for her lifelong study of gender differences First published in 1935 *Sex Temperament* is a fascinating and brilliant anthropological study of the intimate lives of three New Guinea tribes from infancy to adulthood Focusing on the gentle mountain dwelling Arapesh the fierce cannibalistic Mundugumor and the graceful headhunters of Tchambuli Mead advances the theory that many so called masculine and feminine characteristics are not based on fundamental sex differences but reflect the cultural conditioning of different societies This edition prepared for the centennial of Mead's birth features introductions by Helen Fisher and Mead's daughter Mary Catherine Bateson **Advanced Educational**

**Psychological Aspects of Foreign Policy** United States. Congress. Senate. Foreign Relations, 1969 *Sexual Science* Cynthia Russett, 1991-03-01 One scarcely knows whether to laugh or cry The spectacle presented in Cynthia Russett's splendid book of nineteenth century white male scientists and thinkers earnestly trying to prove women inferior to men thereby providing along with savages and idiots an evolutionary buffer between men and animals is by turns appalling amusing and saddening Surveying the work of real scientists as well as the products of more dubious minds Russett has produced a learned yet immensely enjoyable chapter in the annals of human folly At the turn of the century science was successfully challenging the social authority of religion scientists wielded a power no other group commanded Unfortunately as Russett demonstrates in Victorian sexual science empiricism tangled with prior belief and scientists delineation of the mental and physical differences between men and women was directed to show how and why women were inferior to men These men were not necessarily misogynists This was an unsettling time when the social order was threatened by wars fierce economic competition racial and industrial conflict and the failure of society to ameliorate poverty vice crime illnesses Just when men needed the psychic lift an adoring dependent woman could give she was demanding the vote higher education and the opportunity to become a wage earner No other work has treated this provocative topic so completely nor have the various scientific theories used to marshal evidence of women's inferiority been so thoroughly delineated and debunked Erudite enough for scholars in the history of science intellectual history and the history of women this book with its stylish presentation will also attract a large nonspecialist audience **The Politics of Human Nature** Thomas Fleming, 1988-01-01 The effort to understand human nature in a political context is a daunting challenge that has been undertaken in a variety of ways and by a myriad of disciplines through the ages From Plato to Hobbes and Burke to Wallas and Oakeschott in our era efforts have been made to provide some organic framework for the political study of mankind What has added greatly to the complexity of the task is the increasing denial even rejection in the positivist and behaviorist traditions of the very notion of a human nature The work can be described as a series of interlocking propositions the proverbial view of human nature can be

explained by evolutionary theory Biological differences between men and women are responsible for family community and group life Social evolution goes through stages which are recapitulated in the moral life of individuals A well defined federal system mirrors human development And finally for Fleming most problems in social and political life stem from violations of this federalist system Fleming s volume takes up a variety of issues sex and gender differences democracy and dictatorship individual and familial patterns of association He does so in the context of showing how forms of legitimate authority such as families communities and nations establish such authority by appeals to human nature and that these appeals while presumably resting on empirical evidence also confirm the existence of normative structures Fleming s work is an effort of synthesis that is sure to arouse discussion and debate It represents a serious addition to a literature retrieved from the historical dustbins to which it has been repeatedly consigned

**The Freudian Mystique** Samuel Slipp, 1995-03 Sigmund Freud was unquestionably one of the most influential thinkers of the twentieth century yet over the last few decades his theory about women has suffered severe criticism from feminists and many psychoanalysts How could this great genius have been so wrong about women In *The Freudian Mystique* Samuel Slipp a training and supervising analyst offers an explanation of how such a remarkable and revolutionary thinker for his time could formulate such incorrect theories about female development Tracing the gradual evolution of patriarchy and phallocentrism in Western society Slipp examines the stereotyped attitudes toward women that were taken for granted in Victorian culture and strongly influenced Freud s thinking on feminine psychology Of even greater importance was Freud s relationship with his mother who emotionally abandoned him the loss of his nanny and the death of his brother Julius all before the age of three These losses occurred during the separation individuation phase disrupting the normal differentiation from his mother and consolidation of his gender identity Slipp examines not only Freud s preoedipal but also the continuing postoedipal conflicts with his mother from both an object relations and family therapy perspective He shows how Freud s unconscious ambivalence toward his mother influenced his personal relationships with women and shaped his theory of child development Freud emphasized the role of the father and the oedipal period while excluding the mother and the preoedipal and postoedipal periods Not limited to one perspective *The Freudian Mystique* analyzes how the entire contextual framework of his family relations anti-Semitism politics economics science and culture affected Freud s work in feminine psychology The book not only looks backward but also looks forward to formulating a modern biopsychosocial framework for female gender development

*What it Means to be a Man* Rafael L. Ramírez, 1999 *What It Means to Be a Man* begins with a discussion of machismo set in the context of the social construction of masculinity Ram rez presents his interpretation of what it means to be a Puerto Rican man discussing the attributes and demands of masculinity and pointing out the ways in which strength competition and sexuality are joined with power and pleasure He examines the erotic relationships between men as part of the expressions of masculinity and analyzes how the homosexual experience reproduces the dominant masculine ideology

**Primitive Societies** Margaret Mead (Anthropologist, USA), 1962      *Why So Slow?* Virginia Valian, 2025-01-21 Virginia Valian uses concepts and data from psychology sociology economics and biology to explain the disparity in the professional advancement of men and women Why do so few women occupy positions of power and prestige Virginia Valian uses concepts and data from psychology sociology economics and biology to explain the disparity in the professional advancement of men and women According to Valian men and women alike have implicit hypotheses about gender differences gender schemas that create small sex differences in characteristics behaviors perceptions and evaluations of men and women Those small imbalances accumulate to advantage men and disadvantage women The most important consequence of gender schemas for professional life is that men tend to be overrated and women underrated Valian's goal is to make the invisible factors that retard women's progress visible so that fair treatment of men and women will be possible The book makes its case with experimental and observational data from laboratory and field studies of children and adults and with statistical

documentation on men and women in the professions The many anecdotal examples throughout provide a lively counterpoint

Reading Benedict / Reading Mead Dolores Janiewski, Lois W. Banner, 2004 Publisher Description      Anthropologists and the Rediscovery of America, 1886–1965 John S. Gilkeson, 2010-09-20 This book examines the intersection of cultural anthropology and American cultural nationalism from 1886 when Franz Boas left Germany for the United States until 1965 when the National Endowment for the Humanities was established Five chapters trace the development within academic anthropology of the concepts of culture social class national character value and civilization and their dissemination to non anthropologists As Americans came to think of culture anthropologically as a complex whole far broader and more inclusive than Matthew Arnold's the best which has been thought and said so too did they come to see American communities as stratified into social classes distinguished by their subcultures to attribute the making of the American character to socialization rather than birth to locate the distinctiveness of American culture in its unconscious canons of choice and to view American culture and civilization in a global perspective      **Margaret Mead** Joan Gordan, 2015-06-03 No detailed description available for Margaret Mead
