Sex Drugs And The Continuing Spread Of Aids:

Sex, Drugs, and the Continuing Spread of AIDS Clyde B. McCoy, James A. Inciardi, 1995 The book covers the nature and origins of AIDS its social dimensions and impact on people and institutions and alternatives for reducing the continuing spread of the disease McCoy and Inciardi offer a breadth of perspectives on important issues from a wide array of sources without pitting these viewpoints against each other The chapters largely follow the chronology of the AIDS epidemic Written in plain English the book's direct illustrative style bridges the gap between scholarly literature and the literate lay reader with a tasteful synthesis of information research and themes in popular culture It brings students directly to grips with the AIDS epidemic illustrating that AIDS is not someone else's problem One of the book's strengths is that it not only presents material but actively helps the student make sense of it Sex Drugs and the Continuing Spread of AIDS offers an alternative to existing books many of which are edited collections It covers previously ignored topics and includes original field research In the United States men who have sex with men and injection drug users represent the vast majority of individuals with AIDS while other members of the HIV AIDS caseload reflect relatively small numbers However the heterosexual spread of HIV in the U S is increasing particularly in those cities and communities where rates of injection drug use are high Elsewhere in the world especially in developing nations heterosexual spread is the major route of transmission At issue is the extent to which heterosexual transmission has an impact on the general spread of AIDS During the past decade there have been conflicting arguments in this regard Sex Drugs and the Continuing Spread of AIDS addresses this ongoing debate *Global Virology II - HIV and NeuroAIDS* Paul Shapshak, Andrew J. Levine, Brian T. Foley, Charurut Somboonwit, Elyse Singer, Francesco Chiappelli, John T. Sinnott, 2017-10-07 This book on NeuroAIDS a collection of chapters written by experts and specialists from around the world provides a global perspective on HIV and NeuroAIDS in the field clinic and laboratory The chapters address the comorbidity of HIV and other infectious agents including Zika virus Ebola Chagas disease TB and HCV Also discussed are key topics such as Molecular socioepidemiology Global HIV and NeuroAIDS Neuropathology cART and blood brain barrier penetration HIV replicative oscillations HIV and SIV evolution Psychiatric comorbidities Neurosyphilis The examination of current and innovative models of translational research to translational effectiveness *Safer Sex in Personal Relationships* Tara M. Emmers-Sommer, Mike Allen, 2004-12-13 This book focuses on safer sex discussion and practice in close personal relationships emphasizing research on individuals in personal relationship types that are experiencing a rise in HIV infection and AIDS Moving beyond studies of gay adult males and IV drug users this work paints a clear picture of the very real risk that exists for these less studied more general populations so individuals may better personalize the risk and engage in more preventative measures Authors Tara M Emmers Sommer and Mike Allen examine issues surrounding safer sex utilizing research that focuses on how individuals struggle with personalizing the HIV and AIDS risk and how they cope with safer sex issues Safer Sex in Personal Relationships takes readers on a journey through a variety

of close relationship types It begins by highlighting awareness to the global enormity of HIV and AIDS and providing a link between the global and personal and the need to make HIV and AIDS awareness part of everyday talk and personal relationship structure It then focuses on safer sex in close relationships both heterosexual and homosexual marital relationships and the importance of safe sex discussion and awareness in marriages HIV and AIDS from a multicultural perspective HIV and AIDS in aged populations and increasing awareness understanding and compassion of those living with HIV and AIDS This book will appeal to scholars and students concerned with HIV and AIDS in personal relationships It will be an invaluable text for courses on interpersonal communication and relationships family marital human sexuality sex and gender gay and lesbian relationships and sexual education and relational conflict across communication psychology and sociology disciplines The Prevention Pipeline ,1994 **Current Perspectives on Sex Crimes** Ronald M.

Preventing HIV Infection Among Injecting Drug Users in High-Risk Countries Institute of Medicine, Board on Global Health, Committee on the Prevention of HIV Infection Among Injecting Drug Users in High-Risk Countries, 2006-12-20 Drug dependence is a complex chronic relapsing condition that is often accompanied by severe health psychological economic legal and social consequences Injecting drug users are particularly vulnerable to HIV and other bloodborne infections such as hepatitis C as a result of sharing contaminated injecting equipment All drug dependent individuals including injecting drug users IDUs may be at increased risk of HIV infection because of high risk sexual behaviors There are an estimated 13.2 million injecting drug users IDUs world wide 78 percent of whom live in developing or transitional countries The sharing of contaminated injecting equipment has become a major driving force of the global AIDS epidemic and is the primary mode of HIV transmission in many countries In some cases epidemics initially fueled by the sharing of contaminated injecting equipment are spreading through sexual transmission from IDUs to non injecting populations and through perinatal transmission to newborns Reversing the rise of HIV infections among IDUs has thus become an urgent global public health challenge one that remains largely unmet In response to this challenge the Institute of Medicine convened a public workshop in Geneva in December 2005 to gather information from experts on IDU driven HIV epidemics in the most affected regions of the world with an emphasis on countries throughout Eastern Europe the Commonwealth of Independent States and significant parts of Asia Experts from other regions also provided information on their experiences in preventing HIV infection among IDUs This report provides a summary of the workshop discussions Preventing HIV Infection among Injecting Drug Users in High Risk Countries describes the evidence on the intermediate outcomes of drug related risk and sex related risk prior to examining the impact on HIV transmission This report focuses on programs that are designed to prevent the transmission of HIV among injecting drug users These programs range from efforts to curtail non medical drug use to those that encourage reduction in high risk behavior among drug users Although the report focuses on HIV prevention for IDUs in high risk countries the Committee considered evidence from countries around the world The findings and recommendations of this report are also applicable to countries where injecting drug use is not the primary driver but in which injection drug use is nevertheless associated with significant HIV transmission

Drug Trafficking, Organized Crime, and Violence in the Americas Today Bruce M. Bagley, Jonathan D. Rosen, 2017-07-25 An extensive overview of the drug trade in the Americas and its impact on politics economics and society throughout the region Highly recommended Choice A first rate update on the state of the long fought hemispheric war on drugs It is particularly timely as the perception that the war is lost and needs to be changed has never been stronger in Latin and North America Paul Gootenberg author of Andean Cocaine The Making of a Global Drug A must read volume for policy makers concerned citizens and students alike in the current search for new approaches to forty year old policies largely considered to have failed David Scott Palmer coauthor of Power Institutions and Leadership in War and Peace A very useful primer for anyone trying to keep up with the ever evolving relationship between drug enforcement and drug trafficking Peter Andreas author of Smuggler Nation How Illicit Trade Made America In 1971 Richard Nixon declared a war on drugs Despite foreign policy efforts and attempts to combat supply lines the United States has been for decades and remains today the largest single consumer market for illicit drugs on the planet This volume argues that the war on drugs

has been ineffective at best and at worst has been highly detrimental to many countries. Leading experts in the fields of public health, political science, and national security analyze how U.S. policies have affected the internal dynamics of Mexico, Colombia, Bolivia, Peru, Brazil, Argentina, Central America, and the Caribbean islands. Together, they present a comprehensive overview of the major trends in drug trafficking and organized crime in the early twenty-first century. In addition, the editors and contributors identify emerging issues and propose several policy options to address them. This accessible and expansive volume provides a framework for understanding the limits and liabilities in the U.S. championed war on drugs throughout the Americas.

Interventions to Prevent HIV Risk Behaviors Pegg S. Tillman, 1996 Neighborhoods and Health Ichiro Kawachi, Lisa F. Berkman, 2003-03-20

Do places make a difference to people's health and well-being? The authors of this groundbreaking textbook demonstrate convincingly how the physical and social characteristics of a neighborhood can shape the health of its residents. Drawing on the expertise of a renowned cast of researchers, this book presents a state-of-the-art account of the theories, methods, and empirical evidence linking neighborhood conditions to population health. Represented in the volume are contributions from the world's leading investigators in the field, including social epidemiologists, demographers, medical geographers, sociologists, and medical practitioners. This comprehensive textbook lays out for the first time the methodological approaches to conducting neighborhood research, including multi-level and contextual analysis, geocoding, and the use of small area-based measures of deprivation, as well as the evolving science of ecometrics. Substantive chapters present the case for the relevance of neighborhood effects on health outcomes throughout the life cycle, from infant mortality and low birthweight to childhood asthma, adult infectious diseases, and disability in old age. The approaches covered in the book range from testing the linkages between community-level variables such as social capital and residential segregation and population health to designing and implementing community interventions and policies to improve the health of the public. The book is a timely companion volume to *Social Epidemiology* (Oxford University Press, 2000), edited by the same authors, and an indispensable manual on neighborhood research for students, researchers, and practitioners.

NIDA Notes, 1991 Federal Probation, 2003 *Encyclopedia of Applied Developmental Science* Celia B. Fisher, Richard M. Lerner, 2004-10-16

The most comprehensive one-stop source for the latest in applied developmental science. Don Floyd, President and CEO, National 4-H Council.

The *Encyclopedia of Applied Developmental Science* is an important and timely contribution to this burgeoning field. This four-volume set is the authoritative source that

encompasses the entire range of concepts and topics involved in the study of applied developmental science. Its contents and levels have broad appeal for those interested in how the application of knowledge about human development can be used to enhance the lives of individuals, families, and communities. The breadth of activity in applied developmental science makes adequate representation of its concepts and topics a daunting challenge. To this end, the encyclopedia seeks to answer the following questions: How may information about this field be integrated in a manner accessible, meaningful, and useful to the next generation of the leaders of our nation and world? How may we best convey the knowledge necessary for them to understand the nature of their development and the way that they may contribute positively to their own lives, to their families and communities, and to the designed and natural environments of which they will be stewards? The Encyclopedia of Applied Developmental Science provides the most effective way to address these questions. It includes entries written in an authoritative but not overly technical manner by the broad range of scholars and practitioners involved in applied developmental science. In addition to an alphabetical table of contents, there is a readers guide that organizes the entries into 30 content categories to help the reader locate similarly themed entries with ease. The encyclopedia is ideal for libraries serving those with interests in psychology, human development, human ecology, education, sociology, family and consumer sciences, and nursing, as well as social work and other human services disciplines. The entries are written to be accessible to not only professionals but also to policy makers and other potential consumers of applied developmental science scholarship. This includes young people and their parents, teachers, and counselors.
