Sex Love Race Crossing Boundaries In North American History:

Sex, Love, Race Martha Hodes, 1999 Since the colonial era North America has been defined and continually redefined by the intersections of sex violence and love across racial boundaries Motivated by conquest economics desire and romance such crossings have profoundly affected American society by disturbing dominant ideas about race and sexuality Sex Love Race provides a historical foundation for contemporary discussions of sex across racial lines which despite the numbers of interracial marriages and multi racial children remains a controversial issue today The first historical anthology to focus solely and widely on the subject Sex Love Race gathers new essays by both younger and well known scholars which probe why and how sex across racial boundaries has so threatened Americans of all colors and classes Traversing the whole of American history from liaisons among Indians Europeans and Africans to twentieth century social scientists fascination with sex between Asian Americans and whits the essays cover a range of regions and of racial ethnic and sexual identities in North America Back cover

Beyond Black and White Stephanie Cole, Alison Marie Parker, 2004 This work brings up to date perspectives to the oversimplification of racial categories and new insight into the complexity of social relationships in these two important regions It should be of use to those interested in social activism directed toward racial ethnic and gender issues

Dangerous Liaisons Charles Frank Robinson, 2006-01-01 In the South after the Civil War segregation and race itself was based on the idea that interracial sex posed a biological threat to the white race In this groundbreaking book Charles Robinson examines how white southerners enforced antimiscegenation laws His findings challenge conventional wisdom documenting a pattern of selective prosecutions under which interracial domestic relationships were punished even more harshly than transient sexual encounters

Race, Religion, Region Fay Botham, Sara M. Patterson, 2022-08-23 Racial and religious groups have played a key role in shaping the American West yet scholars have for the most part ignored how race and religion have influenced regional identity In this collection eleven contributors explore the intersections of race religion and region to show how they transformed the West From the Punjabi Mexican Americans of California to the European American shamans of Arizona to the Mexican Chinese of the borderlands historical meanings of race in the American West are complex and are further complicated by religious identities This book moves beyond familiar stereotypes to achieve a more nuanced understanding of race while also showing how ethnicity formed in conjunction with religious and regional identity The chapters demonstrate how religion shaped cultural encounters contributed to the construction of racial identities and served as a motivating factor in the lives of historical actors The opening chapters document how religion fostered community in Los Angeles in the first half of the twentieth century The second section examines how physical encounters such as those involving Chinese immigrants Hermanos Penitentes and Pueblo dancers shaped religious and racial encounters in the West The final essays investigate racial and religious identity among the Latter day Saints and southern California Muslims As these contributions clearly show race religion and region are as critical as gender sexuality and class

in understanding the melting pot that is the West By depicting the West as a unique site for understanding race and religion they open a new window on how we view all of America

Communication in History Peter Urquhart, Paul Heyer, 2024-01-26 This updated eighth edition provides a thorough and engaging history of communication and media through a collection of essential field defining essays The collection reveals how media has been influential in both maintaining social order and enabling social change Contributions from a wide range of voices offer instructors the opportunity to customize their courses while challenging students to build upon their own knowledge and skill sets From stone age symbols and early writing to the internet and social media readers are introduced to an expansive intellectually enlivening study of the relationship between human history and communication media New case studies explore the Black Press the impact of photography on journalism gender and civil rights discourses in the media and the effects of algorithmic data on modern social media platforms This book can be used as a core text or supplemental reader for courses in communication history communication theory and introductory courses in communication and media studies

Litigating Across the Color Line Melissa Lambert Milewski, 2018 In a largely previously untold story from 1865 to 1950 black litigants throughout the South took on white southerners in civil suits Drawing on almost a thousand cases Milewski shows how African Americans negotiated the southern legal system and won suits against whites after the Civil War and before the Civil Rights struggle

Revolutionizing Romance Nadine T Fernandez, 2010-02-18 Scholars have long heralded mestizaje or race mixing as the essence of the Cuban nation Revolutionizing Romance is an account of the continuing significance of race in Cuba as it is experienced in interracial relationships This ethnography tracks young couples as they move in a world fraught with shifting connections of class race and culture that are reflected in space racialized language and media representations of blackness whiteness and mixedness As one of the few scholars to conduct long term anthropological fieldwork in the island nation Nadine T Fernandez offers a rare insider s view of the country s transformations during the post Soviet era Following a comprehensive history of racial formations up through Castro s rule the book then delves into more intimate and contemporary spaces Language space and place foreign tourism and the realm of the family each reveal through the author s deft analysis the paradox of living a racialized life in a nation that celebrates a policy of colorblind equality

Race in America Patricia Reid-Merritt, 2017-01-23 Focusing on the socially explosive concept of race and how it has affected human interactions this work examines the social and scientific definitions of race the implementation of racialized policies and practices the historical and contemporary manifestations of the use of race in shaping social interactions within U S society and elsewhere and where our notions of race will likely lead More than a decade and a half into the 21st century the term race remains one of the most emotionally charged words in the human language While race can be defined as a local geographic or global human population distinguished as a more or less distinct group by genetically transmitted physical characteristics the concept of race can better be understood as a socially defined construct a system of

human classification that carries tremendous weight yet is complex confusing contradictory controversial and imprecise This collection of essays focuses on the socially explosive concept of race and how it has shaped human interactions across civilization The contributed work examines the social and scientific definitions of race the implementation of racialized policies and practices and the historical and contemporary manifestations of the use of race in shaping social interactions primarily in the United States a nation where the concept of race is further convoluted by the nation s extensive history of miscegenation as well as the continuous flow of immigrant groups from countries whose definitions of race ethnicity and culture remain fluid Readers will gain insights into subjects such as how we as individuals define ourselves through concepts of race how race affects social privilege color blindness as an obstacle to social change legal perspectives on race racialization of the religious experience and how the media perpetuates racial stereotypes

The American South William J. Cooper Jr., Thomas E. Terrill, Christopher Childers, 2016-11-17 In *The American South A History* Fifth Edition William J. Cooper Jr and Thomas E. Terrill demonstrate their belief that it is impossible to divorce the history of the South from the history of the United States The authors analysis underscores the complex interaction between the South as a distinct region and the South as an inescapable part of America Cooper and Terrill show how the resulting tension has often propelled section and nation toward collision In supporting their thesis the authors draw on the tremendous amount of profoundly new scholarship in Southern history Each volume includes a substantial bibliographical essay completely updated for this edition which provides the reader with a guide to literature on the history of the South This volume contains updated chapters and tables
