The Bilingual Child Virginia Yip, Stephen Matthews, 2007-08-27 How does a child become bilingual The answer to this intriguing question remains largely a mystery not least because it has been far less extensively researched than the process of mastering a first language Drawing on new studies of children exposed to two languages from birth English and Cantonese this book demonstrates how childhood bilingualism develops naturally in response to the two languages in the children s environment While each bilingual child s profile is unique the children studied are shown to develop quite differently from monolingual children The authors demonstrate significant interactions between the children s developing grammars as well as the important role played by language dominance in their bilingual development Based on original research and using findings from the largest available multimedia bilingual corpus the book will be welcomed by students and scholars working in child language acquisition bilingualism and language contact

Children's Early Understanding of Mind Charlie Lewis, Peter Mitchell, 2014-03-18 A major feature of human intelligence is that it allows us to contemplate mental life Such an understanding is vital in enabling us to function effectively in social groups This book examines the origins of this aspect of human intelligence The five sections attempt firstly to place human development within an evolutionary context focusing on the possibility of innate components of understanding The second aim of the book is to examine the roles of early perception pretence and communication as precursor skills in the development of a grasp of mental states Thirdly attention is given to the possibility that children know a good deal more about the mind than is apparent from many studies designed to probe their abilities Taken together the chapters in this book mark a new focus within a theory of mind movement examining a group of skills in infancy and early childhood which culminate towards the end of the preschool period in a more mature understanding of one s and others mental states Drawing together researchers from diverse theoretical positions the aim is to work towards a coherent and unified account of this fundamental human ability This book will be of central relevance to psychologists and those in related disciplines particularly education and philosophy

The Education of d/Deaf and Hard of Hearing Children Peter V. Paul, 2020-02-12 A significant number of d/Deaf and hard of hearing d/Dhh children and adolescents experience challenges in acquiring a functional level of English language and literacy skills in the United States and elsewhere To provide an understanding of this issue this book explores the theoretical underpinnings and synthesizes major research findings It also covers critical controversial areas such as the use of assistive hearing devices language and literacy assessments and inclusion Although the targeted population is children and adolescents who are d/Dhh contributors found it necessary to apply our understanding of the development of English in other populations of struggling readers and writers such as children with language or literacy disabilities and those for whom English is not the home language Collectively this information should assist scholars in conducting further research and enable educators to develop general instructional guidelines and strategies to improve the language and literacy levels of d/Dhh students It is clear that there is not a one size fits all concept but rather research and instruction should be differentiated to meet the needs of d/Dhh students It is our hope that this book stimulates further theorizing and research and most importantly offers evidence and reason based practices for improving language and literacy abilities of d/Dhh students

Co-production Victor Pestoff, Taco Brandsen, 2013-09-13 Public management research has in recent years paid increasing attention to the third sector especially to its role in the provision of public services Evidence of this is the rising number of publications on the topic as well as a

growing number of sessions and papers on the topic in academic conferences of the EGPA and IRSPM. However, much of the discussion on its role is motivated at least as much by ideology as by fact. We still lack a proper empirical understanding of what happens when the third sector is drawn into public service provision. In this thematic presentation of Co-Production, The Third Sector and the Delivery of Public Services, we will try to enhance this understanding by presenting several new studies on the subject. We also introduce the concepts of co-production, co-management and co-governance as a conceptual framework that enables us to better understand such developments.

Around the World through a Child's Eyes Brian J. Fabbri, Sasha Fabbri, 2025-03-11

An enchanting journey of one family's world travels. Around the World through a Child's Eyes takes us along as young Sasha and her parents, Brian and Natalia, visit underground shopping centers in Singapore, vast palaces in Russia, famous theaters in Cuba, tiny churches in Spain, and many other destinations in between, showing us the wonder, joy, and challenges of exploring new cultures during childhood. With a focus on Sasha's perspective, each chapter immerses us in the vibrant experiences of living out of a suitcase and discovering the meaning of home in places far from it. A final chapter, written by Sasha now an adult, highlights the ways her family's travel and exposure to different cultures enriched her life and expanded her worldview. Interwoven with captivating photographs, this memoir is a celebration of curiosity, friendships, and the lifelong impact of a global upbringing.

Behind the Smiles Dr. Rilly Ray Rajkumar, 2016-06-15

While tourists see the beauty of Kenya, volunteers and medical health professionals often only see the poverty. With half of the country's forty-three million people living below the poverty line and unable to meet their daily nutritional requirements, not to mention not having reliable access to healthcare and sanitation facilities, many of Kenya's most vulnerable inhabitants are victims to disease and unhealthy living conditions. In *Behind the Smiles: An African Odyssey*, Dr. Rilly Ray Rajkumar provides a compelling and earnest window into her time serving as a volunteer medical doctor outside one of Kenya's most impoverished cities. Offering both a history and analysis of the poverty and plight of Kenya, as well as a collection of engaging narratives recounting her personal interactions with her most memorable patients, Dr. Rilly speaks to the heart-wrenching reality of poverty, as well as to the joy and hope that even just one person can bring to an entire village of need with their support. Dr. Rilly's story should inspire and encourage other medical health professionals to consider following her example and learn more about how they too can help. With motivated, inspired volunteers to help improve health services in these communities, the hope is that behind the rich culture and gracious smiles of the Kenyan people, we can also restore health and a sense of well-being.

Natural Behavior,2024-08-01 Natural Behavior Volume 66 highlights new advances in the field with this new volume presenting interesting chapters written by an international board of authors There is a long history of studying natural behavior in science In 1872 Charles Darwin documented his observations on the development of his children in words which was published in an article titled A Biographical Sketch of an Infant Traditionally observational studies like this had been viewed as insightful but also criticized as not objective and quantitative More recently building on advanced computation the contemporary approaches to studying natural behavior in the real world delivered quantitative results New sensing and wearable technologies allow researchers to collect high density data in everyday contexts With technological advances we can scale up and obtain quantitative results from real world data This volume contains a collection of papers on studying natural behavior of child development Those papers aim at understanding and predicting behavior and cognition as it occurs within complex real world situations Compared with findings from laboratories the results derived from natural behavior are remarkably reliable which provides an answer to the reproducibility crisis in science Moreover the findings based on natural
