Long-term Unemployment Kenneth Walsh, 1987-06-18

Combating Long-Term Unemployment Kenneth

Dyson, 2023-10-20 First published in 1989 Combating Long Term Unemployment follows on from and is a companion to Local Authorities and New Technologies The book seeks to inform debate by analysing policy responses to the problem of long term unemployment and by focusing on the role of local initiatives in a European context Long term unemployment in Europe is a complicated and multifaceted problem the policy responses to which need to be studied against various contexts It is designed to appeal to all those interested in policies to combat long term unemployment local and central government officials private sector organizations whose work is relevant to locally based initiatives and interested academics

Interwar Unemployment in International Perspective Barry J. Eichengreen, T.J. Hatton, 2012-12-06 High unemployment has been one of the most disturbing features of the economy of the 1980s For a precedent one must look to the interwar period and in particular to the Great Depression of the 1930s It follows that recent years have been marked by a resurgence of interest amongst academics in interwar unemployment The debate has been contentious There is nothing like the analysis of a period which recorded rates of unemployment approaching 25 per cent to highlight the differences between competing schools of thought on the operation of labour markets Along with historians economists whose objective is to better understand the causes character and consequences of contemporary unemployment and sociologists seeking to understand contemporary society's perceptions and responses to joblessness have devoted increasing attention to this historical episode Like many issues in economic history this one can be approached in a variety of ways using different theoretical approaches tools of analysis and levels of disaggregation Much of the recent literature on the functioning of labour markets in the Depression has been macroeconomic in nature and has been limited to individual countries Debates from the period itself have been revived and new questions stimulated by modern research have been opened Many such studies have been narrowly focused and have failed to take into account the array of historical evidence collected and analysed by contemporaries or reconstructed and reinterpreted by historians

International Perspectives on the Youth Labor Market: Emerging Research and Opportunities Amine, Samir, 2020-06-26 Persistent unemployment and rising wage differences at the expense of low skilled workers has characterized the labor market in most developed countries Since the last economic crisis unemployment rates and pay inequalities have increased among workers under 25 years of age thus creating an ever widening financial gap for an entire generation Those who do not have a qualification or post secondary diploma often find themselves in precarious jobs at minimum wage Countries are now working to adopt reforms to improve the situation of young people in the labor market International Perspectives on the Youth Labor Market Emerging Research and Opportunities provides emerging research exploring the theoretical and practical aspects of financial inequality and applications within global economics Unlike literature that focuses only on developed countries this book also addresses

emerging economies whose labor market is often characterized by a dualism that makes the situation of young workers worse. Featuring coverage on a broad range of topics such as unemployment rate, labor reform, and job insecurity, this book is ideally designed for economists, government officials, policymakers, executives, managers, business professionals, researchers, academicians, and students.

International Perspectives and Strategies for Managing an Aging Workforce Ince, Fatma, 2022-03-11 Older employees are often seen as an obstacle and not as an opportunity for companies, especially regarding the transfer of knowledge and experience. Effective development and utilization of older professional and managerial employees is an important issue as most organizations are not prepared to tailor their training methods to the needs and preferences of these employees due to negative stereotypes. Managing a rapidly aging workforce and sustaining economic dynamism calls for systematic research to prevent age discrimination due to an incomplete knowledge of older workers and politically challenging policy choices that require strong political commitments, robust management leadership, and social consensus. *International Perspectives and Strategies for Managing an Aging Workforce* examines the differences in stereotypes of older employees compared to younger employees in companies, analyzes the impact of the aging workforce on retention, productivity, and well-being, and investigates organizational systems, processes, and practices for managing older workers. Covering a range of topics such as retention and retirement, this reference work is ideal for researchers, academicians, practitioners, business owners, managers, human resource workers, instructors, and students.

International Perspectives in the Early Years Linda Miller, Claire Cameron, 2013-12-05 This informative and wide-ranging book argues persuasively for the value of multiple perspectives, both international and disciplinary, in the study and practice of early childhood education because they feed our imaginations and provoke us to think. And while illustrating the many differences that exist between countries, it highlights the shared issues confronting us wherever we live. Emeritus Professor Peter Moss, Institute of Education, University of London. Stemming from original research in the field, a range of expert contributors explore the key themes and debates surrounding international perspectives on Early Childhood Education and Care (ECEC). Drawing on studies carried out in Norway, Mexico, France, Hungary, and many more countries, the book covers a wide range of topics including the relationship between early childhood and primary education, gender and play in ECEC curriculum, inclusion, early interventions, working with families, place-based learning. With case studies, detailed suggestions for further reading at different levels, and discussion points, this is a key text for students of Early Years at all levels, from Foundation Degree to Masters, as well as current early years practitioners. Linda Miller is Professor Emerita of Early Years, The Open University. Claire Cameron is Senior Reader in Education at the Thomas Coram Research Unit, Institute of Education, University of London.

At Home and Abroad Francine D. Blau, Lawrence M. Kahn, 2002-04-11 Throughout the latter part of the 20th century, the U.S. labor market performed differently than the labor markets of the world's other advanced industrialized societies. In the early 1970s, the United States had higher unemployment rates than its Western European

counterparts But after two oil crises rapid technological change and globalization rocked the world's economies unemployment fell in the United States while increasing dramatically in other nations At the same time wage inequality widened more in the United States than in Europe In *At Home and Abroad* Cornell University economists Francine D Blau and Lawrence M Kahn examine the reasons for these striking dissimilarities between the United States and its economic allies Comparing countries the authors find that governments and unions play a far greater role in the labor market in Europe than they do in the United States It is much more difficult to lay off workers in Europe than in the United States unemployment insurance is more generous in Europe and many fewer Americans than Europeans are covered by collective bargaining agreements Interventionist labor market institutions in Europe compress wages thus contributing to the lower levels of wage inequality in the European Union than in the United States Using a unique blend of microeconomic and microeconomic analyses the authors assess how these differences affect wage and unemployment levels In a lucid narrative they present ample evidence that as upheavals shook the global economy the flexible U S market let wages adjust so that jobs could be maintained while more rigid European economies maintained wages at the cost of losing jobs By helping readers understand the relationship between different economic responses and outcomes *At Home and Abroad* makes an invaluable contribution to the continuing debate about the role institutions can and should play in creating jobs and maintaining living standards

Livable Cities from a Global Perspective Roger Caves, Fritz Wagner, 2018-05-11 *Livable Cities from a Global Perspective* offers case studies from around the world on how cities approach livability They address the fundamental question what is considered livable The journey each city has taken or is currently taking is unique and context specific There is no such thing as a one size fits all approach to livability Some cities have had a long history of developing livability policies and programs that focus on equity economic and environmental concerns while other cities are relatively new to the game In some areas government has taken the lead while in other areas grassroots activism has been the impetus for livability policies and programs The challenge facing our cities is not simply developing a livability program We must continually monitor and readjust policies and programs to meet the livability needs of all people The case studies investigate livability issues in such cities as Austin Texas Helsinki Finland London United Kingdom Warsaw Poland Tehran Iran Salt Lake City United States Rio de Janeiro Brazil Sydney Australia and Cape Town South Africa The chapters are organized into such themes as livability in capital city regions livability and growth and development livability and equity concerns livability and metrics and creating livability Each chapter provides unique insights into how a specific area has responded to calls for livable cities In doing so the book adds to the existing literature in the field of livable cities and provides policy makers and other organizations with information and alternative strategies that have been developed and implemented in an effort to become a livable city
