Longrun Dynamics

A General Economic and Political Theory

Christine Donald Snodgrass

Longrun Dynamics

Graeme Donald Snooks

Longrun Dynamics:

Longrun Dynamics G. Snooks, 1998-04-08 Longrun Dynamics is a ground breaking work that begins where the author's Economics without Time 1993 left off. It employs the inductive method proposed by J S Mill to develop a general dynamic theory that integrates the separate disciplines of economic growth, economic fluctuations and political decision making. The central feature of this general theory is dynamic demand which provides both a realist form for the model and a new explanation of macroeconomics variables. The general theory also provides an entirely new basis for policy and is designed to counter the influence of neo liberalism in economic theory.

The Dynamic Society Graeme Snooks, 2002-09-11 This book discusses the nature and process of change in human society over the past two million years. The author draws on economic, historical and biological concepts to examine the driving forces of change and looks to likely developments in the future. This analysis produces some very thought provoking and controversial conclusions.

The Ephemeral Civilization Graeme Snooks, 2002-09-11 The Ephemeral Civilization is an astonishing intellectual feat in which Graeme Snooks develops an original and ground breaking analysis of changing sociopolitical forms over the past 3 000 years. Snooks challenges the prevailing theories of social evolutionism with an innovative approach which also looks ahead to the twenty first century. The Ephemeral Civilization builds on the model of dynamic strategy outlined in the author's highly acclaimed companion volume The Dynamic Society. The Ephemeral Society is divided into three parts: theory, history and future.

Long-run Growth, Social Institutions and Living Standards Neri Salvadori, Arrigo Opocher, 2014-05-14 This engaging book contains a set of original contributions to the much debated issues of long run economic growth in relation to institutional and social progress. It explores the mutual relationships between living standards, social habits, education and

Global Transition Graeme Donald Snooks, 1999-08-31 Global Transition is an innovative study that analyses the problems and prospects of the Third World by building on the theoretical contribution the dynamic strategy model made in the author's acclaimed Longrun Dynamics. It formulates a general economic and political theory he calls the global strategic transition GST model. The central feature of this model is the global strategic demand response mechanism involving an interaction between the world's expanding strategic core and its fringe which is facilitated through strategic inflation. This model also provides the basis for a new policy approach to economic development.

Demographic Change and Long-Run Development Matteo Cervellati, Uwe Sunde, 2017-10-20 Recent approaches to economic demography investigating the effect of the transition to low mortality and low fertility on economic development. Over the last two hundred years, mortality and fertility levels in the Western world have dropped to unprecedented levels. This demographic transition was accompanied by an economic transition that led to widespread education and economic growth after centuries of near stagnation. At the same time, other changes have occurred in family structures, culture and the organization of society. Economists have only recently begun to take into account the demographic

transition from high mortality and high fertility when modeling and researching economic development This CESifo volume reviews recent approaches to economic demography considering such topics as the bio geographic origins of comparative development differences the role of health improvements and mortality decline as well as physiological familial cultural and social aspects After an overview of the study of demography and economic demography the chapters cover subjects including the Neolithic era and the period of the formation of states and social institutions longevity and economic growth household decision making and fertility land inequality education and marriage in nineteenth century Prussia and caste systems and technology in pre modern societies The book concludes with a call for further investigation of the institutional and social factors that influence demographics and economies suggesting that unified growth theory offers a potential approach to studying development Contributors Matteo Cervellati Francesco Cinnirella David de la Croix Carl Johann Dalgaard Matthias Doepke Elena Esposito Davide Fiaschi Tamara Fioroni Oded Galor Boris Gershman Erik Hornung Fabian Kindermann Nils Petter Lagerlöf Holger Strulik Uwe Sunde David N Weil *The Laws of History* Graeme Snooks, 2002-09-26 In this unorthodox and trail blazing work Graeme Snooks argues that it is possible to construct a scientific theory of human history but only if we adopt a radically materialist theory of human nature *Cycles, Growth and Structural Change* Lionello F Punzo, 2003-09-02 This volume gathers together key new contributions on the subject of the relationship both empirical and theoretical between economic oscillations growth and structural change Employing a sophisticated level of mathematical modelling the collection contains articles from amongst others William Baumol Katsuhito Iwai and William Brock *In the Long Run We Are All Dead* Geoff Mann, 2017-01-24 In the ruins of the 2007 2008 financial crisis progressives the world over clamoured to resurrect the economic theory of John Maynard Keynes The crisis seemed to expose the disaster of small state free market liberalization and deregulation Keynesian political economy in contrast could put the state back at the heart of the economy and arm it with the knowledge needed to rescue us But what it was supposed to rescue us from was not so clear Was it the end of capitalism or the end of the world For Keynesianism the answer is both Geoff Mann's *In the Long Run We are All Dead* is a thoroughgoing critique of Keynes for our post crash world and an accessible and historically grounded introduction to his masterwork *The General Theory of Employment Interest and Money* Mann argues that Keynesianism is thus modern liberalism's most persuasive internal critique meeting two centuries of crisis with a proposal for capital without capitalism and revolution without revolutionaries
