Looking At Art Landscape And Nature:

Landscape and Nature in Scandinavian Art MaryClaire Pappas, Tonje Haugland Sørensen, 2025-04-16 This edited volume foregrounds new and vital scholarship shaping Scandinavian art historical research on the representations of the natural world Contributors deconstruct the interlinking of people and land through critical readings of the Scandinavian representation of nature bringing to the fore how the traditional focus on the landscape as a manifestation of temperament has tended to obfuscate critical approaches to the representation of the landscape Making interdisciplinary connections this volume redresses the imbalance in scholarship on the region that often emphasizes teleological national narratives and instead situates encounters with nature and the landscape in relationship to more interdisciplinary perspectives Each chapter serves as a specific case study on topics ranging from circumpolar exploration and colonial practices deconstructing National Romanticism myths and contemporary artistic responses to the history of the politics of land The book will be of interest to scholars working in art history visual culture nature studies and environmental history **Looking at the Landscapes** The J. "Art, Technology and Nature " Camilla Skovbjerg Paldam, 2017-07-05 Since 1900 the connections between art and technology with nature have become increasingly inextricable Through a selection of innovative readings by international scholars this book presents the first investigation of the intersections between art technology and nature in post medieval times Transdisciplinary in approach this volume's 14 essays explore art technology and nature's shifting constellations that are discernible at the micro level and as part of a larger chronological pattern Included are subjects ranging from Renaissance wooden dolls science in the Italian art academies and artisanal epistemologies in the followers of Leonardo to Surrealism and its precursors in Mannerist grotesques and the Wunderkammer eighteenth century plant printing the climate and its artistic presentations from Constable to Olafur Eliasson and the hermeneutics of bioart In their comprehensive introduction editors Camilla Skovbjerg Paldam and Jacob Wamberg trace the Kantian heritage of radically separating art and technology and inserting both at a distance to nature suggesting this was a transient chapter in history Thus they argue the present renegotiation between art technology and nature is reminiscent of the ancient and medieval periods in which art and technology were categorized as aspects of a common area of cultivated products and their methods the Latin *ars* the Greek
