Sussman, C. Robert Cloninger, 2011-08-02 This book is about the evolution and nature of cooperation and altruism in social living animals focusing especially on non human primates and on humans Although cooperation and altruism are often thought of as ways to attenuate competition and aggression within groups or are related to the action of selfish genes there is increasing evidence that these behaviors are the result of biological mechanisms that have developed through natural selection in group living species This evidence leads to the conclusion that cooperative and altruistic behavior are not just by products of competition but are rather the glue that underlies the ability for primates and humans to live in groups The anthropological primatological paleontological behavioral neurobiological and psychological evidence provided in this book gives a more optimistic view of human nature than the more popular conventional view of humans being naturally and basically aggressive and warlike Although competition and aggression are recognized as an important part of the non human primate and human behavioral repertoire the evidence from these fields indicates that cooperation and altruism may represent the more typical normal and healthy behavioral pattern The book is intended both for the general reader and also for students at a variety of levels graduate and undergraduate it aims to provide a compact accessible and up to date account of the current scholarly advances and debates in this field of study and it is designed to be used in teaching and in discussion groups The book derived from a conference sponsored by N S F the Wenner Gren Foundation for Anthropological Research the Washington University Committee for Ethics and Human Values and the Anthropedia Foundation for the study of well being Performing Migrancy and Mobility in Africa Mark Fleishman, 2014-12-02 Performing Migrancy and Mobility in Africa focuses on a body of performance work the work of Magnet Theatre in particular but also work by other artists in Cape Town and other parts of the continent or the world that engages with the Cape as a real or imagined node in a complex system of migration and mobility Located at the foot of the African continent lodged between two oceans at the intersection of many of the earth s major shipping lanes Cape Town is a stage for a powerful mixing of cultures and peoples and has been an important node in a network of flows circuits of movement and exchange The performance works studied here attempt to get to grips with what it feels like to be on the move and in the spaces in between that characterises the lives now and for centuries before of multiple peoples who move around and pass through places like the Cape The contributors are a broad range of mostly African authors from various parts of the continent and as such the book offers an insight into new thinking and new approaches from an emerging and important location *Great Captains of Antiquity* Richard A.
