Kabbalah, Magic, and Science David B. Ruderman,1988 In describing the career of Abraham Yagel a Jewish physician kabbalist and naturalist who lived in northern Italy from 1553 to about 1623 David Ruderman observes the remarkable interplay between early modern scientific thought and religious and occult traditions from a wholly new perspective that of Jewish intellectual life Whether he was writing about astronomical discoveries demons marvelous creatures and prodigies of nature the uses of magic or reincarnation Yagel made a consistent effort to integrate empirical study of nature with kabbalistic and rabbinic learning Yagel s several interests were united in his belief in the interconnectedness of all thing a belief shared by many Renaissance thinkers that turns natural phenomena into signatures of the divine unity of all things Ruderman argues that Yagel and his coreligionists were predisposed to this prevalent view because of occult strains in traditional Jewish thought He also suggests that underlying Yagel s passion for integrating and correlating all knowledge was a powerful psychological need to gain cultural respect and acceptance for himself and for his entire community especially in a period of increased anti Semitic agitation in Italy Yagel proposed a bold new agenda for Jewish culture that underscored the religious value of the study of nature reformulated kabbalist traditions in the language of scientific discourse so as to promote them as the highest form of human knowledge and advocated the legitimate role of the magical arts as the ultimate expression of human creativity in Judaism This portrait of Yagel and his intellectual world will well serve all students of late Renaissance and early modern Europe

Science and Magic in the Modern World Eugene Subbotsky,2018-10-04 Science and Magic in the Modern World is a unique text that explores the role of magical thinking in everyday life It provides an excellent psychological look at the subconscious belief in magic in both popular culture and society as well as experimental research that considers human

consciousness as a derivative of belief in the supernatural thus showing that our feelings emotions attitudes and other psychological processes follow the laws of magic This book synthesises the science of natural phenomena and the magic of the supernatural to present an interesting look at the juxtaposition of the inner and outer selves Fusing research into psychological disorders subconscious feelings as well as the rising presence of artificial intelligence this book demonstrates how an engagement with magical thinking can enhance one s creativity and cognitive skills Science and Magic in the Modern World is an invaluable resource for those studying consciousness as well as those looking at the effect of magical thinking on religion politics science and society *The Magic of Science for Young Children* Esther Gordon-Nourok,1975 Illustrated instructions for using easily available materials in a variety of simple experiments that introduce basic scientific principles

Navigating Elementary Science Teaching and Learning Sophia Jeong,Lynn A. Bryan,Deborah J. Tippins,Chelsea M. Sexton,2023-09-26 This book is a resource for both prospective and practicing elementary teachers as they learn to teach science in ways which foster the development of a community of science learners with multiple perspectives and diverse approaches to problem solving It includes cases that feature dilemmas embedded in rich narrative stories which characterize the lives of teachers of science and by extension their students and serve as tools for discussion critique and reflective practice The introduction to the book explores changing contexts for elementary science teaching and learning and describes how case based pedagogy can be used as a tool for both instruction and research Each subsequent section of the book includes cases that are organized around topics such as contemporary approaches to teaching elementary science new roles for technology and the creation of inclusive learning environments for all students in elementary science Each case is followed by reflective commentaries and concludes with questions for reflection and discussion Teachers will benefit from these cases as they explore the complexities and ambiguities of elementary science teaching and learning in today s classrooms **It's Hunky Dory in the Magic Quami Forest** , *Science, Technology and Magic in The Witcher* Kristine Larsen,2023-02-02 As Andrzej Sapkowski was fleshing out his character Geralt of Rivia for a writing contest he did not set out to write a science textbook or even a work of science fiction However the world that Sapkowski created in his series The Witcher resulted in a valuable reflection of real world developments in science and technology As the Witcher books have been published across decades the sorcery in the series acts as an extension of the modern science it grows alongside This book explores the fascinating entanglement of science and magic that lies at the heart of Sapkowski s novel series and its widely popular video game and television adaptations This is the first English language book length treatment of magic and science in the Witcher universe These are examined through the lenses of politics religion history and mythology Sapkowski s richly detailed universe investigates the sociology of science and ponders some of the most pressing modern technological issues such as genetic engineering climate change weapons of mass destruction sexism speciesism and environmentalism Chapters explore the unsettling realization that the greatest monsters are frequently human and their heinous acts often

involve the unwitting hand of science *Magic, White and Black* Franz Hartmann, 1893 Believing in Magic Stuart A. Vyse, 2013-09-01 While we live in a technologically and scientifically advanced age superstition is as widespread as ever Not limited to just athletes and actors superstitious beliefs are common among people of all occupations educational backgrounds and income levels In this fully updated edition of *Believing in Magic* renowned superstition expert Stuart Vyse investigates our tendency towards these irrational beliefs Superstitions he writes are the natural result of several psychological processes including our human sensitivity to coincidence a penchant for developing rituals to fill time to battle nerves impatience or both our efforts to cope with uncertainty the need for control and more In a new Introduction Vyse discusses important developments and the latest research on jinxes paranormal beliefs and luck He also distinguishes superstition from paranormal and religious beliefs and identifies the potential benefits of superstition for believers He examines the research to demonstrate how we can better understand complex human behavior Although superstition is a normal part of our culture Vyse argues that we must provide alternative methods of coping with life's uncertainties by teaching decision analysis promoting science education and challenging ourselves to critically evaluate the sources of our beliefs
