50 Popular Beliefs That People Think Are True Guy P. Harrison,2012-01-03 What would it take to create a world in which fantasy is not confused for fact and public policy is based on objective reality asks Neil deGrasse Tyson science popularizer and author of *Astrophysics for People in a Hurry* I don't know for sure But a good place to start would be for everyone on earth to read this book Maybe you know someone who swears by the reliability of psychics or who is in regular contact with angels Or perhaps you're trying to find a nice way of dissuading someone from wasting money on a homeopathy cure Or you met someone at a party who insisted the Holocaust never happened or that no one ever walked on the moon How do you find a gently persuasive way of steering people away from unfounded beliefs bogus cures conspiracy theories and the like This down to earth entertaining exploration of commonly held extraordinary claims will help you set the record straight The author a veteran journalist has not only surveyed a vast body of literature but has also interviewed leading scientists explored the most haunted house in America frolicked in the inviting waters of the Bermuda Triangle and even talked to a contrite Roswell alien He is not out simply to debunk unfounded beliefs Wherever possible he presents alternative scientific explanations which in most cases are even more fascinating than the wildest speculation For example stories about UFOs and alien abductions lack good evidence but science gives us plenty of reasons to keep exploring outer space for evidence that life exists elsewhere in the vast universe The proof for Bigfoot or the Loch Ness Monster may be nonexistent but scientists are regularly discovering new species some of which are truly stranger than fiction Stressing the excitement of scientific discovery and the legitimate mysteries and wonder inherent in reality this book invites readers to share the joys of rational thinking and the skeptical approach to evaluating our extraordinary world Some Wine and Honey for Simon A. dimension this prior inscription of potential which gives rise to profoundly unforeseen forms of being necessarily invokes an a priori ethical demand that is common to biological and technological systems alike This ethical demand transforms the rules of critical and ethical engagement not simply with other inhuman forms of being but with the future itself Indeed this ethical demand requires us to pose serious questions about the legitimacy and usefulness of any decisions made today on the back of predicted futures that erroneously presume the absolute determinability of all beings lacking the alchemical privilege definitive of life As the exemplary figure of unfounded privilege it is with Hamlet that the question of life ultimately ends replaced instead by the extremophile as the figure of unforeseen futures that simply cannot be imagined in the present To be is the potential to be otherwise that is to say to not be that which a given being is **The UFO Singularity** Micah

Hanks,2025-09-12 At the forefront of a new generation of UFOlogists Micah Hanks is someone who isn't afraid to tackle new paradigms ideas and theories The future of flying saucer seeking is in good hands Nick Redfern author of The NASA Conspiracies Why and how are past unexplained phenomena changing our future Where will transcending the bounds of current thinking lead How near is the singularity The UFO Singularity finally reveals what UFO phenomena can tell us about greater than human intelligence and offers provocative theories of where such intelligence might originate You'll explore the most challenging metaphysical questions and the latest scientific thoughts about them including What is the singularity and how does it relate to UFOs Could some UFOs be from our plane Could they actually be time travelers from our future What current scientific trends are leading us to the kinds of advanced technology we've observed in various UFO reports Are there other ways in which UFOs could be considered extraterrestrial visitors in our midst even if they didn't get here in the way that most people think via interplanetary space flight **Adam to Apophis** Nicholas Costa,2013 Who or what were Adam Noah and Elijah Where they real or imaginary What exactly was Creation Did something really happen sometime around 4 000 BC as the Bible tells us What exactly was leprosy Why is the Islamic world in turmoil after centuries of quiescence Are the mass uprisings democratic movements against tyrannical regimes or fanatical drives to promote the spread of Islam or is there something else far more sinister at play Adam to Apophis provides answers to all of these questions For millennia major religions have held the unflinching belief that at some future point the world will once more enter an end time phase According to Islamic Hindu Buddhist Jewish and Mayan reckoning that end time phase is this current century Christianity also holds the same belief During such phases the earth has been subjected to airbursts and meteoric impacts which in turn have spawned decades long sequences of major environmental traumas in the form of extreme weather volcanic eruptions massive earthquakes and tsunamis This future phase is itself part of a larger cycle to which the Earth has been subjected a number of times during the past 6 000 years resulting each time in worldwide societal collapse Religious or mythological texts exist which feature fantastic creatures and long lived superhuman beings The records have been fastidiously preserved for millennia Jewish and Chinese texts have preserved associated chronologies However these ancient chronologies have

been repeatedly discounted or ignored by modern scholarship. In the past few decades, science has built up its own independent chronology of the earth's recent past by means of dendrochronology, ice cores, ice rafting, sedimentology, volcanology, and astronomical retro calculations. These now provide us with a tangible record of climatic and terrestrial traumas stretching back thousands of years. At first sight, the two disciplines would appear to be in total opposition: the one seemingly relying on faith and fabricated evidence, and the other on scientific reason and hard fact. Given therefore the seeming polarity, one would therefore expect to find little if any synchronicity between the two. What happens if we overlay the templates? Modern science has recently discovered an important earthly traumatic cycle known as Bond Events, which occur every 1400-1500 years. The religious texts also clearly display knowledge of this cycle. Islam, for example, holds the belief that it will only last some 1400-1500 years. Adam to Apophis demonstrates that the concept of millenarianism is no idle fantasy but ultimately rests upon a firm foundation of real physical traumas. The book traces this primary cycle in stages back from the present day to Bond Event 1, the advent of Islam in the 6th century AD, when there was massive terrestrial and social upheaval worldwide. Bond Event 2, the 9th century BC, where we discover the same pattern. In the Bible, this is represented by the Elijah cycle of stories, which focus upon a hitherto unidentified massive volcanic eruption in Arabia, but with clear evidence from regions as far afield as China that the trauma was worldwide. Bond Event 3, Noah's Flood, his true identity, and the real location of the Ark, still a major religious site comprising the largest cemetery in the world, with millions of bodies buried there. The identities of the Chinese Emperors Yao, Shun, and Yu, and a second impact site, Piora. Oscillation, Death of Adam, The Nephilim, The Chinese Flame Emperors, The Mahabharata, and Krishna. Bond Event 4, 5, 9 Kiloyear Event. The true nature of Creation, the identity of Adam, the Ramayana, and the Burckle Crater. Adam to Apophis is an original and compelling work. It will be of indispensable interest not only to scientists and academics in a variety of disciplines, but also to the layman of whatever or no religious persuasion.

A Theory of Environmental Leadership Mark Manolopoulos, 2021-03-15

In *A Theory of Environmental Leadership*, Mark Manolopoulos draws on his original model of leadership outlined in his cutting-edge book *Following Reason* to derive and develop the first properly systematic model of eco leadership. Suppose humanity's relation with the Earth may be described in terms of leadership stages or modalities: once upon a time, the Earth led or ruled humanity, and now we humans rule or lead the Earth. When the Earth led, the Earth flourished; now that humankind leads the Earth, it flounders: ecological crises multiply and intensify. However, there might be a third stage or modality of leadership: humanity leading for the Earth, leading in a way that allows the world, including humans, to re-flourish. What would be the nature of this truly environmental form of leadership? *A Theory of Environmental Leadership* identifies and critically analyzes the two basic and incompatible positions associated with the way we construe and interact with the non-human: anthropocentrism/human supremacism and ecocentrism/ecological egalitarianism. By rigorously analyzing and leveraging this polarity, this book outlines an innovative theory of eco leadership, together with some of its confronting but necessary

measures Expansive and incredibly timely A Theory of Environmental Leadership is ideal for a range of audiences from scholars and students of environmental leadership studies to activists and policymakers The book s remarkable clarity and engaging character also makes it suitable for the general public
