

THE MAGIC WINDOW

AMERICAN TELEVISION, 1939-1953

The book cover features a stylized illustration of a vintage television set. Two women in 1940s-style dresses are shown: one is leaning over the top of the TV, and the other is sitting on the floor in front of it, looking up at the screen. The TV screen displays a black and white image of a person in a field. The background is a soft-focus landscape with trees and a bright sky. The title 'THE MAGIC WINDOW' is at the top in large, bold, black letters with a white outline. Below it, the subtitle 'AMERICAN TELEVISION, 1939-1953' is in a smaller, bold, black font. The author's name 'JAMES VON SCHILLING' is at the bottom left, inside a dark, circular graphic element.

Many veterans struggled openly or privately with this transition Others in society wondered what the war had wrought in them As Erin Lee Mock shows in this insightful book the explosive potential of men became a central concern of postwar American culture This wariness of veterans settled into a generalized anxiety over men s inherent violence and hypersexuality which increasingly came to define masculinity *Changed Men* engages with studies of film media literature and gender and sexuality to advance a new perspective on the artistic and cultural output of and about the Greatest Generation arguing that depictions of men s violent and erotic potential emerged differently in different forms and genres but nonetheless permeated American culture in these years Viewing this homecoming through the lenses of war and trauma classical Hollywood pulp fiction periodical culture and early television Mock shows this history in a provocative new light

Horrocks, 2017-12-22 It is a modern activity one of the primary ways we consume information and entertainment something we ll do over dinner at a bar or even standing on the street peering into a store window watch TV Many of us spend countless hours in front of the tube and even those of us who have proudly eliminated it from our lives can probably still rattle off the names of today s most popular shows But for as crucial as television viewing is in modern culture the television set itself as a ubiquitous object in our environment rarely captures our attention turn one off and it seems to all but disappear In this book Chris Horrocks tells the story of the television set exploring its contradictory presence in our lives as both a material object and a conveyor of illusory images Horrocks begins in the nineteenth century and television s prehistory as a fantastic futuristic concept He follows the television s journey from its strange roots in spiritualism imperialism and Victorian experiments in electro magnetism to the contested accounts of its actual invention looking at the work of engineering pioneers such as Philo Farnsworth and John Logie Baird Unboxing sets all across the world he details how it arrived as an essential consumer product and began to play an extraordinary role as a bridge between public and private life Horrocks

describes how the console and cabinet themselves expressed status and good taste and how their designs drew on cultural phenomena such as the space race and the avant garde He discusses how we have both loved it for what it can provide and reviled it as a sinister object literally controlling our thoughts and he shows how it has figured in other cultural realms such as the work of artists like Wolf Vostell and Nam June Paik Finally Horrock laments the death of the cathode ray tube and the emergence of the flat screen which has reduced the presence of the television as a significant material object Altogether The Joy of Sets brings this most elusive object into crystal clear critical and historical focus **Impresario** James
