Magician From The Masses:

Jewish Magic and Superstition Joshua Trachtenberg, 2012-10-08 Alongside the formal development of Judaism from the eleventh through the sixteenth centuries a robust Jewish folk religion flourished ideas and practices that never met with wholehearted approval by religious leaders yet enjoyed such wide popularity that they could not be altogether excluded from the religion According to Joshua Trachtenberg it is not possible truly to understand the experience and history of the Jewish people without attempting to recover their folklife and beliefs from centuries past Jewish Magic and Superstition is a masterful and utterly fascinating exploration of religious forms that have all but disappeared yet persist in the imagination The volume begins with legends of Jewish sorcery and proceeds to discuss beliefs about the evil eye spirits of the dead powers of good the famous legend of the golem procedures for casting spells the use of gems and amulets how to battle spirits the ritual of circumcision herbal folk remedies fortune telling astrology and the interpretation of dreams First published more than sixty years ago Trachtenberg's study remains the foundational scholarship on magical practices in the Jewish world and offers an understanding of folk beliefs that expressed most eloquently the everyday religion of the Jewish people

Eros and Magic in the Renaissance Ioan P. Culianu, 1987-11-15 It is a widespread prejudice of modern scientific society that magic is merely a ludicrous amalgam of recipes and methods derived from primitive and erroneous notions about nature Eros and Magic in the Renaissance challenges this view providing an in depth scholarly explanation of the workings of magic and showing that magic continues to exist in an altered form even today Renaissance magic according to Ioan Couliano was a scientifically plausible attempt to manipulate individuals and groups based on a knowledge of motivations particularly erotic motivations Its key principle was that everyone and in a sense everything could be influenced by appeal to sexual desire In addition the magician relied on a profound knowledge of the art of memory to manipulate the imaginations of his subjects In these respects Couliano suggests magic is the precursor of the modern psychological and sociological sciences and the magician is the distant ancestor of the psychoanalyst and the advertising and publicity agent In the course of his study Couliano examines in detail the ideas of such writers as Giordano Bruno Marsilio Ficino and Pico della Mirandola and illuminates many aspects of Renaissance culture including heresy medicine astrology alchemy courtly love the influence of classical mythology and even the role of fashion in clothing Just as science gives the present age its ruling myth so magic gave a ruling myth to the Renaissance Because magic relied upon the use of images and images were repressed and banned in the Reformation and subsequent history magic was replaced by exact science and modern technology and eventually forgotten Couliano's remarkable scholarship helps us to recover much of its original significance and will interest a wide audience in the humanities and social sciences

Making Magic Randall Styers, 2004-01-15 Since the emergence of religious studies and the social sciences as academic disciplines the concept of magic has played a major role in defining religion and in mediating the relation of religion to science Across these disciplines magic has regularly been configured as a

definitively non modern phenomenon juxtaposed to distinctly modern models of religion and science Yet this notion of magic has remained stubbornly amorphous In Making Magic Randall Styers seeks to account for the extraordinary vitality of scholarly discourse purporting to define and explain magic despite its failure to do just that He argues that this persistence can best be explained in light of the Western drive to establish and secure distinctive norms for modern identity norms based on narrow forms of instrumental rationality industrious labor rigidly defined sexual roles and the containment of wayward forms of desire Magic has served to designate a form of alterity or deviance against which dominant Western notions of appropriate religious piety legitimate scientific rationality and orderly social relations are brought into relief Scholars have found magic an invaluable tool in their efforts to define the appropriate boundaries of religion and science On a broader level says Styers magical thinking has served as an important foil for modernity itself Debates over the nature of magic have offered a particularly rich site at which scholars have worked to define and to contest the nature of modernity and norms for life in the modern world

Magic Ernesto de

Martino, 2015-06-15 Though his work was little known outside Italian intellectual circles for most of the twentieth century anthropologist and historian of religions Ernesto de Martino is now recognized as one of the most original thinkers in the field This book is testament to de Martino's innovation and engagement with Hegelian historicism and phenomenology a work of ethnographic theory way ahead of its time This new translation of *Sud e Magia* his 1959 study of ceremonial magic and witchcraft in southern Italy shows how De Martino is not interested in the question of whether magic is rational or irrational but rather in why it came to be perceived as a problem of knowledge in the first place Setting his exploration within his wider pathbreaking theorization of ritual as well as in the context of his politically sensitive analysis of the global south's historical encounters with Western science he presents the development of magic and ritual in Enlightenment Naples as a paradigmatic example of the complex dynamics between dominant and subaltern cultures Far ahead of its time *Magia* is still relevant as anthropologists continue to wrestle with modernity's relationship with magical thinking

Secular Magic and the Moving Image Max Sexton, 2017-12-14 The power of the moving image to conjure marvelous worlds has usually been to understand it in terms of move magic On film a fascination for enchantment and wonder has transmuted older beliefs in the supernatural into secular attractions But this study is not about the history of special effects or a history of magic Rather it attempts to determine the influence and status of secular magic on television within complex modes of delivery before discovering interstices with film Historically the overriding concern on television has been for secular magic that informs and empowers rather than a fairytale effect that deceives and mystifies Yet shifting notions of the real and the uncertainty associated with the contemporary world has led to television developing many different modes that have become capable of constant hybridization The dynamic interplay between certainty and indeterminacy is the key to understanding secular magic on television and film and exploring the interstices between them Sexton ranges from the real time magic of street performers such as David Blaine Criss Angel and Dynamo to Penn and Teller's comedy magic to the hypnotic acts of Derren Brown before finally visiting the 2006 films *The Illusionist* and *The Prestige* Each example charts how the lack of clear distinctions between reality and illusion in modes of representation and presentation disrupt older theoretical oppositions *Secular Magic and the Moving Image* not only re-evaluates questions about modes and styles but raises further questions about entertainment and how the relations between the program maker and the audience resemble those between the conjuror and spectator By re-thinking these overlapping practices and tensions and the marking of the indeterminacy of reality on media screens it becomes possible to revise our understanding of inter-medial relations

Magic: A History Chris Gosden, 2020-11-10 An Oxford professor of archaeology explores the unique history of magic the oldest and most neglected strand of human behavior and its resurgence today Three

great strands of belief run through human history Religion is the relationship with one god or many gods masters of our lives and destinies Science distances us from the world turning us into observers and collectors of knowledge And magic is direct human participation in the universe we have influence on the world around us and the world has influence on us Over the last few centuries magic has developed a bad reputation thanks to the unsavory tactics of shady practitioners and to a successful propaganda campaign on the part of religion and science which denigrated magic as backward irrational and primitive In *Magic* however the Oxford professor of archaeology Chris Gosden restores magic to its essential place in the history of the world revealing it to be an enduring element of human behavior that plays an important role for individuals and cultures From the curses and charms of ancient Greek Roman and Jewish magic to the shamanistic traditions of Eurasia indigenous America and Africa from the alchemy of the Renaissance to the condemnation of magic in the colonial period and the mysteries of modern quantum physics Gosden's startling fun and colorful history supplies a missing chapter of the story of our civilization Drawing on decades of research around the world touching on the first known horoscope a statue ordered into exile and the mystical power of tattoos Gosden shows what magic can offer us today and how we might use it to rethink our relationship with the world *Magic* is an original singular and sweeping work of scholarship and its revelations will leave a spell on the reader
