**Magic Moments** Charles Barnett, 2013-04-05 Magic Moments is an eclectic assortment of short pieces that examine life and love. Most are taken from moments with one of two little poodles. Sometimes they are silent. Sometimes they talk back. Other pieces explore science and travel to faraway places like the Arctic and the Amazon without poodles, just people. Take your pick. If there's romance and wonder in your heart, you'll find something to warm the silent moments as you drift off to sleep.

**The Springboard** Stephen Denning, 2012-08-21 The Springboard: How Storytelling Ignites Action in Knowledge Era Organizations is the first book to teach storytelling as a powerful and formal discipline for organizational change and knowledge management. The book explains how organizations can use certain types of stories—springboard stories—to communicate new or envisioned strategies, structures, identities, goals, and values to employees, partners, and even customers. Readers will learn techniques by which they can help their organizations become more unified, responsive, and intelligent. Storytelling is a management technique championed by gurus including Peter Senge, Tom Peters, and Larry Prusak. Now Stephen Denning, an innovator in the new discipline of organizational storytelling, teaches how to use stories to address challenges fundamental to success in today's information economy.

**Abracadabra** Nathaniel Schiffman, 2009-09-25 Magicians use more than just mirrors, string, and sleight of hand to deceive their audience. Those who are masters at this trade have developed an arsenal of techniques to manipulate people. Every action and utterance on stage and off is precisely planned to achieve a specific effect. Abracadabra is an insider's look at what goes on at a magic show behind the scenes and in the mind of the magician. Nathaniel Schiffman explains the principles of deception, exposing those innocent-seeming motions that conceal vital actions from onlookers: how the conjurer uses misdirection of space and time to mislead the audience; how silly and simple optical illusions can fool us; and what to look for during a magic show. Also explored in detail is the world of off-stage magic. Some magicians use various techniques in life to deceive and influence you; yet these magicians don't boast of their magic talent because they are advertisers, politicians, army commanders, spies, con artists, computer programmers, movie directors, faith healers, psychics, and others. These magicians work to make you buy their product, believe in their cause, and influence your thinking from the time you get up in the morning until you go to bed at night. This is not a how-to book for aspiring magicians but a layperson's guide to methods used to mislead or fool you. Lighthearted and informal, Abracadabra will fascinate anyone interested in knowing how one person can control many. Included are hands-on experiments, magic tricks, and reader participation segments. You'll soon see that magicians don't just manipulate playing cards and animals; they manipulate you.
