Mahler's Symphonic World Karol Berger, 2025-01-14 A new analysis of Mahler's symphonies placing each within the context of his musical way of being in and experiencing the world Between 1888 and 1909 Gustav Mahler completed nine symphonies and the orchestral song cycle *Das Lied von der Erde* his tenth symphony was left incomplete at his death in 1911 Mahler's *Symphonic World* provocatively suggests that over his lifetime the composer pursued a single vision and a single ideal symphony that strived to capture his personal outlook on human existence Writing at the turn of the twentieth century when all trust in firm philosophical and spiritual foundations had evaporated Mahler's music reflected a deep preoccupation with human suffering and transience and a search for sources of possible consolation In Karol Berger's reading each of the symphonies follows a similar trajectory with an opening quest leading to the final unveiling of a transcendent consolatory vision By juxtaposing single movements the opening Allegros the middle movements the Finales across different works Berger traces recurring plotlines and imagery and discloses the works multiple interrelationships as well as their cohesiveness around a central idea Ultimately Mahler's *Symphonic World* locates Mahler's music within the matrix of intellectual currents that defined his epoch and offers a revelatory picture of his musical way of being in the world
