Mail Order Retailing in Britain A Business And Social History:

Mail Order Retailing in Britain Richard Coopey, Sean O'Connell, Dilwyn Porter, 2005-01-27 Since its inception in the late 19th century Britain's mail order industry both exploited and generated social networks in building its businesses. The common foundation of the sector was the agency system. Sales were made through catalogues held by agents ordinary people in families, neighbourhoods, pubs, clubs, and workplaces. Through this agency system mail order firms in Britain were able to tap social networks both to build a customer base but also to obtain vital information on creditworthiness. In this the first comprehensive history of the British mail order industry the authors combine business and social history to fully explain the features and workings of this industry. They show how British general mail order industry firms such as Kay and Co Empire Stores, Littlewoods, and Grattan grew from a range of businesses as diverse as watch sales or football pools. A range of business innovations and strategies were developed throughout the twentieth century including technological development and labour process rationalisation. Indeed the sector was in the vanguard of many aspects of change from supply chain logistics to computerization. The social and gender profile of the home shopper also changed markedly as the industry developed. These changes are charted from the male dominated origins of the industry to the growing influence of women both within the firm and more importantly as the centre of the mail order market. The book also draws parallels and contrasts with the much more widely studied mail order industry of the United States. The final section of the book examines the rise of internet shopping and the new challenges and opportunities it provided for the mail order industry. Here the story is one of continuity and fracture as the established mail order companies struggle to adjust to a business environment which they had partly created but which also rested on a new range of core competencies and technological and demographic change.

Mail Order Retailing in Britain Richard Coopey, 2007 **Mail Order Retailing in Britain** Richard Coopey, Sean O'Connell, Dilwyn Porter, 2005-01-27 This book traces the rise of firms including Kay and Co, Grattan, Empire Stores, and Littlewoods. It examines the ways in which these firms created and exploited social networks through the agency system and credit provision among the British working class. The book also traces the origins of internet based home shopping in the UK. Provided by publisher **Transformations of Retailing in Europe after 1945** Lydia Langer, 2016-02-17 After World War II structures, practices, and the culture of retailing in most West European countries went through a period of rapid change. The post war economic boom, the emergence of a mass consumer society, and the adaptation of innovations which already had been implemented in the USA during the interwar period revolutionized the world of getting and spending. But the implementation of self service and the supermarket, the spread of the department store, and the mail order business were not only elements of a transatlantic catch up process of Americanization of retailing. National patterns of the retail trade and specific cultures of consumption remained crucial and long term processes of change starting in the 1920s or 1930s also had an impact on the transformation of retailing in post war Europe. This volume presents a series of case studies looking at

transformations of retailing in several European countries offering new insights into the structural preconditions of the emerging mass consumer societies and also into the consequences consumerism had on the practices of retailing

Intrusive Interventions Graham Mooney, 2015 Intrusive Interventions is a history and critical study of public health in the Victorian and Edwardian period Drawing on an array of archival sources from across provincial England and London it investigates the emergence and

consolidation of a set of government policies that came to be known as infectious disease surveillance including compulsory infectious disease notification domestic quarantine mandatory removal to a hospital contact tracing and the disinfection of homes and belongings Although these were a set of spatialized practices implemented in diverse settings such as hospitals schools and disinfecting stations their effect was to retrain the gaze of public health onto domestic space and in the process both disrupt and reinforce the centrality of the family and domesticity in Victorian and Edwardian culture Examining political ideologies of freedom and individuality as well as social policy medical theory laboratory research material culture and public health practice author Graham Mooney argues that infectious disease surveillance reconfigured late nineteenth century hygienic norms and forms of citizenship Public health practice had to be continually reshaped in order to negate the political fallout of a tendency toward coercion and unwanted interference debates that as the author of this important study points out continue to resonate today Graham Mooney is Assistant Professor at the Institute of the History of Medicine Johns Hopkins University

Back to the Shops Rachel Bowlby, 2022-02-24 What will become of the shops More than ever the high street appears to be under mortal threat its shops boarded up as the sad bricks and mortar survivals of a pre online retail world But behind the bleak appearance there is more to see Back to the Shops offers a set of short and surprising chapters each one a window into a different shop type or mode of selling Old shopping streets are seen from new angles fast fashion shows up in eighteenth century edits Here are pedlars and pop ups mail order catalogues and mobile greengrocers shops Here too are food markets open till late on a Saturday night and tiny subscription libraries tucked away at the back of the sweet shop Over time shops have occupied radically different places in cultural arguments and in our everyday lives They are essential sources of daily provisions but they are also the visible evidence of consuming excess They are local community hubs and they are dreamlands of distraction Shops are inherently spaces of imagination as well as of practicality They belong with their own surrounding streets and town they bring back the times and places of our lives They linger in stories of all kinds whether far fetched or round the corner From butcher to baker and from markets to motor vans after reading this book you will want to go back to the shops
