The Ethnobotany of Eden Robert A. Voeks, 2018-06-27 In the mysterious and pristine forests of the tropics a wealth of ethnobotanical panaceas and shamanic knowledge promises cures for everything from cancer and AIDS to the common cold To access such miracles we need only to discover and protect these medicinal treasures before they succumb to the corrosive forces of the modern world A compelling biocultural story certainly and a popular perspective on the lands and peoples of equatorial latitudes but true Only in part In The Ethnobotany of Eden geographer Robert A Voeks unravels the long lianas of history and occasional strands of truth that gave rise to this irresistible jungle medicine narrative By exploring the interconnected worlds of anthropology botany and geography Voeks shows that well intentioned scientists and environmentalists originally crafted the jungle narrative with the primary goal of saving the world's tropical rainforests from destruction It was a strategy deployed to address a pressing environmental problem one that appeared at a propitious point in history just as the Western world was taking a more globalized view of environmental issues And yet although supported by science and its practitioners the story was also underpinned by a persuasive mix of myth sentimentality and nostalgia for a long lost tropical Eden Resurrecting the fascinating history of plant prospecting in the tropics from the colonial era to the present day The Ethnobotany of Eden rewrites with modern science the degradation narrative we've built up around tropical forests revealing the entangled origins of our fables of forest cures

Books for Children, Preschool Through the Middle Grades Christine Bell Gilbert, 1981 Beyond Buds Ed

Rosenthal, 2015-01-19 Beyond Buds is a handbook to the future of marijuana. Prohibition's end has led to a technological revolution that's generated powerful medicines and products containing almost zero carcinogens and little smoke. Marijuana icon Ed Rosenthal and leading cannabis reporter David Downs guide readers through the best new consumer products and demonstrate how to make and use the safest, cleanest extracts. Beyond Buds details how award-winning artisans make hash and concentrates and includes modern techniques utilizing dry ice and CO2. The book is a primer on making kief, water hash, tinctures, topicals, edibles, and other extracts from cannabis leaves, trim, and bud bits, and it goes on to explore and simplify the more exotic and trendy marijuana-infused products such as butane hash oil (BHO), shatter, wax, and budder. More complex than lighting a joint, these innovative products call for new accessories: special pipes, dabbing tools, and vaporizers, all of which are reviewed and pictured in the book. Beyond Buds expands on Rosenthal's previous book, Ask Ed: Marijuana, Gold, Trash to Stash. Completely updated with full-color photographs that are both how-to guides and eye candy, this book enables not only the health-conscious toker but also the bottom-line-driven cultivator.
