David,T.A.Jr. Johnson,D.M. Phillips,J.E. Scherger,Robert B. Taylor,2013-06-29 Much is new in Family Medicine since the last edition of our textbook For example not only is the therapy of human immunodeficiency virus HIV disease and the acquired immunodeficiency syndrome AIDS much different than a few years ago the epidemiology of the disease has also changed and more than half of the family physicians in a rural state such as Oregon have already managed patients with HIV disease or AIDS 1 There are new immunization recommendations for children and new antibiotics for the treatment of bacterial infections Computers are bringing medical informatics and on line consultation into office practice Medicare physician payment reform is underway and the reality of rationing medical care has been recognized There has been a recent increase in student interest in a family practice career 2 coincidental with a Council on Graduate Medical Education COGME recommendation that at least 50 percent of all residency graduates 3 should enter practice as generalists Also there is increasing awareness of the need for a 4 Center for Family Practice and Primary Care at the National Institutes of Health This all new fourth edition is intended to present the scientific and practical basis of family medicine with special attention to what's new in family medicine The emphasis is on how the physician provides continuing and comprehensive care for persons of all ages with clinical content selected from the perspective of family physicians The format of the book like the practice of family medicine continues to change *Bioinformatics Methods and Protocols* Stephen Misener,Stephen A. Krawetz,2008-02-02 Computers have become an essential component of modern biology They help to manage the vast and increasing amount of biological data and continue to play an integral role in the discovery of new biological relationships This in silico approach to biology has helped to reshape the modern biological sciences With the biological revolution now among us it is imperative that each scientist develop and hone today's bioinformatics skills if only at a rudimentary level Bioinformatics Methods and Protocols was conceived as part of the Methods in Molecular Biology series to meet this challenge and to provide the experienced user with useful tips and an up to date overview of current developments It builds upon the foundation that was provided in the two volume set published in 1994 entitled Computer Analysis of Sequence Data We divided Bioinformatics Methods and Protocols into five parts including a thorough survey of the basic sequence analysis software packages that are available at most institutions as well as the design and implementation of an essential introductory

Bioinformatics course In addition we included sections describing specialized noncommercial software databases and other resources available as part of the World Wide Web and a stimulating discussion of some of the computational challenges biologists now face and likely future solutions
