Maid of Memory Douglas Milewski, Pabi once worked for the last great hero Targa who did great deeds while wielding an amazing sword but now she s dead Unwittingly she had been Targa s final student so everyone now looked upon her as Targa s heir What are they thinking She can t even wield a sword She wanted any fate but this When Pabi meets Scarab she finds a mind unlike any that she s ever encountered He shakes her soul to its very foundations treading deep into her faulty memories He challenges her his thoughts opening new pathways a new sort of life but she can only claim this if she dares the consequences Will this psychotic save her or destroy her

Tracking Truth Sherrilyn Roush, 2005-11-10 Tracking Truth presents a unified treatment of knowledge evidence and epistemological realism and anti realism about scientific theories A wide range of knowledge related phenomena especially but not only in science strongly favour the idea of tracking as the key to what makes something knowledge A subject who tracks the truth an idea first formulated by Robert Nozick has the ability to follow the truth through time and changing circumstances Epistemologists rightly concluded that Nozick's theory was not viable but a simple revision of that view is not only viable but superior to other current views In this new tracking account of knowledge in contrast to the old view knowledge has the property of closure under known implication and troublesome counterfactuals are replaced with well defined conditional probability statements Of particular interest are the new view's treatment of skepticism reflective knowledge lottery propositions knowledge of logical truth and the question why knowledge is power in the Baconian sense Ideally evidence indicates a hypothesis and discriminates it from other possible hypotheses This is the idea behind a tracking view of evidence and Sherrilyn Roush provides a defence of a confirmation theory based on the Likelihood Ratio The accounts of knowledge and evidence she offers provide a deep and seamless explanation of why having better evidence makes one more likely to have knowledge Roush approaches the question of epistemological realism about scientific theories through the question what is required for evidence and rejects both traditional realist and traditional anti realist positions in favour of a new position which evaluates realist claims in a piecemeal fashion according to a general standard of evidence The results show that while anti realists were immodest in declaring a priori what science could not do realists were excessively sanguine about how far our actual evidence has so far taken us
