**Meeting Peace Operations' Requirements While Maintaining MTW Readiness** Jennifer M. Taw,David Persselin,Maren Leed,1998 Peace operations POs are arguably the military operations other than war most likely to stress the U S Army s ability to maintain combat readiness POs require a higher ratio of combat support combat service support units and special operations forces relative to combat arms units than do major theater wars MTWs smaller more tailored deployments training for some new tasks and more important for a more restrictive and sensitive operational environment and readier access to and more of some kinds of equipment such as crowd and riot control gear nonlethal weapons and vehicles At a time when the Army is shrinking changing its posture and participating in a rising number of both exercises and operational deployments its challenge is to both maintain MTW readiness its primary mission and meet the very different requirements of POs As long as MTWs remain the national priority and thus the Army s the Army can make some marginal changes to force structure training and doctrine that will help improve PO performance while also mitigating the effects of PO deployments on MTW readiness If POs become a higher priority and resources remain constrained the Army will have to trade off some MTW capabilities to better meet PO requirements These challenges must also be viewed in light of existing Army problems such as maintaining units at levels below normal strength and overestimating the readiness of the reserve component which transcend POs but are severely exacerbated by PO deployments

United States Army Issues Background Bibliography      **Military Agility** Meir Finkel,2020-09-01 The need to quickly enter into conflict and succeed in the initial engagements is an enduring demand on militaries around the world. Given today's dynamic geopolitical environment, the concept of successful rapid transition or organizational and mental readiness is more relevant than ever. Using the Israel Defense Forces (IDF) as a case study, Meir Finkel explores four important but generally neglected challenges of a swift transition from peace to wartime operations. He investigates the challenging mental transition from peace or routine security employment to a higher intensity mode of action in combat. Then Finkel explains that militaries must be capable of rapidly resolving debated prewar concepts and doctrine even as war breaks out. He also discusses how to integrate and employ new weapons systems delivered at the last minute or during a conflict. Lastly, he delves into methods for managing the tension between the need to win every tactical engagement in low intensity conflict and the preparation of forces for a high intensity conflict. With clear applications for the IDF and US armed services, Finkel's study offers specific examples of hard-to-accomplish rapid transitions as well as broad suggestions for how to improve readiness. *Military Agility* will appeal to military personnel and leadership strategists, historians with an interest in comparative analysis, and policymakers.

**Cops, Soldiers, and Diplomats** Tony Payan,2006-01-01 *Cops, Soldiers, and Diplomats* is an exceptionally clear exposition of bureaucratic behavior amongst various agencies as each responded to the challenges of the War on Drugs. Chapter by chapter, author Tony Payan exposes the bureaucratic imperatives of the numerous agencies waging the drug war, uncovering some of the fundamental structural reasons why this war could not succeed within the United States. Fragmentation, competition, duplication, jealousy, turf wars, information hiding, and ultimate failure. Payan's work will be certain to find an audience with politicians and policy makers, students of sociology and criminology, and anyone interested in the drug war.
