*Dialogue with the Past* Glenn Whitman,2004-09-15 Oral history is a marvelous force for empowering young people with a love of history But educators today may wonder how they might use it to inspire their students while still teaching the necessary curriculum and meeting standards In Dialogue with the Past Glenn Whitman addresses these concerns from his own rich experience and that of many other teachers and students He helps readers understand the background and methodology of oral history guides them in creating and conducting an oral history project in the classroom and directly addresses the issue of meeting standards Peppered with useful tips examples from students and teachers and reproducible forms along with a comprehensive bibliography this book will be a vital and inspirational tool for anyone working with secondary students Visit the authors web page *National Standards for History for Grades K-4* National Center for History in the Schools (U.S.),Charlotte Antoinette Crabtree,Gary B. Nash,1994 Developed through a broad based national consensus building process the national history standards project has involved working toward agreement both on the larger purposes of history in the school curriculum and on the more specific history understandings and thinking processes all students should have equal opportunity to acquire over 12 years of precollege education Divided into 3 chapters this document presents the national standards developed for grades K 4 The first chapter is on developing standards in history for students in grades K 4 It discusses the significance of history for the educated citizen definition of standards basic principles in development of standards for K 4 integrating historical thinking and historical understandings in standards for grades K 4 and questions concerning these standards Policy issues discussed are 1 ensuring equity for all students 2 providing adequate instructional time for history and 3 linking history to related studies in geography civics literature and the arts in an integrated or interdisciplinary curriculum for grades K 4 The second chapter presents an overview of standards in historical thinking including chronological thinking historical comprehension historical analysis and interpretation historical research capabilities and historical issues analysis and decision making Chapter 3 surveys eight standards organized under four topics 1 living and working together in families and communities now and long ago 2 the history of students own state or region 3 U S history democratic principles and values people from many cultures who contributed to U S cultural economic and political heritage and 4 history of peoples of many cultures around the world An appendix lists contributors and participating organizations DK *Proceedings of the Annual Meeting - National Education Association of the United States* National Education Association of the United States,1907 *Whose History?* Linda Symcox,2002 In the 1990s the debate over what history and more importantly whose history should be taught in American schools resonated through the halls of Congress the national press and the nation s schools Politicians such as Lynne Cheney Newt Gingrich and Senator Slade Gorton and pundits such as Rush Limbaugh John Leo and Charles Krauthammer fiercely denounced the findings of the National Standards for History which subsequently became a major battleground in the nation s ongoing struggle to define its

historical identity To help us understand what happened Linda Symcox traces the genealogy of the National History Standards Project from its origins as a neo conservative reform movement to the drafting of the Standards through the 18 months of controversy and the debate that ensued and the aftermath Broad in scope this case study includes debates on social history world history multiculturalism established canons national identity cultural history and liberal education Symcox brilliantly illuminates the larger issue of how educational policy is made and contested in the United States revealing how a debate about our children s education actually became a struggle between competing political forces *Common Core Meets Education Reform* Frederick M. Hess,Michael Q. McShane,2014 How can the Common Core complement and not conflict with school improvement efforts already at work across the United States How can it be seamlessly integrated into accountability systems teacher preparation and development charter schools and educational technology This timely volume brings together prominent scholars and policy analysts to examine the pressing issues that will mark Common Core implementation Whether or not you agree with the standards the Common Core is coming and this book will help policymakers practitioners and other stakeholders anticipate the challenges and take steps to address them Common Core Meets Education Reform raises the hard questions about implementing and sustaining the Common Core State Standards so they don t end up in the dustbin of abandoned public education reforms These new standards can help students enormously in becoming problem solvers and critical thinkers which is essential in the 21st century but only if teachers become engaged in the rollout get the support they need and the fixation on high stakes testing gives way to a fixation on learning Randi Weingarten president American Federation of Teachers Adopting the Common Core in a mad dash for federal gold policymakers across the country blew right past critical questions about how they d implement the thing This volume in stark contrast meticulously studies the road ahead seeking out tripwires pitfalls and boulders making it a must read for anyone who hopes to avoid total Common Core disaster Neal McCluskey associate director Center for Educational Freedom Cato Institute Washington DC This balanced wide ranging and deeply informed book is certain to guide educators and reformers through a complex time of transition for U S education But it also turns out to be timely and clarifying as politicians battle over ambitious new academic standards with plenty of heat and smoke but appallingly little illumination Thanks to the authors for turning on some lights Chester E Finn Jr senior fellow Hoover Institution Stanford University and president Thomas B Fordham Institute Frederick M Hess is director of education policy studies at the American Enterprise Institute AEI and serves as executive editor of Education Next Michael Q McShane is a research fellow in education policy studies at AEI **America 2000 ,1992      Resources in Education ,2001-04      The Encyclopedia of Middle Grades Education (2nd ed.) **of Civic Education** Michael Learn,2024-09-16 Social studies is a field in crisis The crisis stems from failure to establish the very foundation of social studies purpose in public education civic education Social studies advocates have never put forth a coherent method for teaching civic education because policymakers and the public have been unable to agree upon a general definition of civic education This issue has disrupted the field since the early days As educators sought to include civic education within public schools as a dedicated field social studies evolved into a blending of history social sciences and civic education Social studies evolution never resolved the differences between the three with each discipline striving to control the narrative Instead of creating a unified field the disciplines devalued social studies and thus any discipline associated with it The Rise and Fall of Civic Education The Battle for Social Studies in a Shifting Historical Landscape investigates the changing definitions and purposes ascribed to social studies in the United States through time This result is viewed through the rising tensions from culture wars as America s divisive politics fight to control the narrative of the disciplines within social studies
