Poetter, Jennifer Pierson, Chelsea Caivano, Shawn Stanley, Sherry Hughes, 2013-12-16 This book is an attempt to show that preservice teacher knowledge is substantive and should be part of the wider database of knowledge about teaching and learning in the field of teacher education From the perspectives of five prospective teacher interns and a teacher educator this volume brings the experiences of students conducting research during preservice teacher education to life Charged to conduct a semester long study in the school the intern authors studied classroom scenes and their own work and wrote case studies depicting their experiences Their pieces in their entirety compose the central chapters of the book and serve as examples of preservice teacher research The surrounding chapters examine the interns experiences of conducting research during their preservice internship year primarily from the perspective of a teacher educator who studied them and the scene throughout the experience The teacher educator examines the interns approaches to research and the processes they employed to conduct and complete their studies the interns professional growth as a result of their participation in the study and the impact the project had on the program This book fills the gaps that exist in the present literature on the use of teacher research during preservice by including the inquiry works of preservice teachers as examples of legitimate important preliminary research in their own rights and by addressing the complex issues of conducting this type of study during preservice from multiple perspectives not just that of the university researcher While some texts include the perspectives of students and even include portions of students own work this text takes the step of co authorship sharing the academic discourse with intern teachers who have produced experience and knowledge that are informative for the field of education as a whole and specifically for teacher

education The text attempts to combine many voices into one thorough narrative approach ultimately urging the reader to consider the possibilities of teacher research for advancing knowledge in the field and for enhancing the professional development of the participants

The Dream Long Deferred Frye Gaillard,2022-11-29 A fifty year history of one community s battles with race in public education The Dream Long Deferred tells the fifty year story of the landmark struggle for desegregation in Charlotte North Carolina and the present state of the city s public school system Award winning writer Frye Gaillard who covered school integration for the Charlotte Observer updates his earlier 1988 and 1999 editions of this work to examine the difficult circumstances of the present day When the struggle to desegregate Charlotte began in the 1950s the city was much like many other New South cities But unlike peer communities that would resist federal rulings Charlotte chose to begin voluntary desegregation of its schools in 1957 Over the next decade it made consistent if slow progress toward greater integration The glacial pace of change frustrated Charlotte s black citizens prompting them to file lawsuits in federal court to seek nothing less than complete integration When the U S District Court in 1969 and subsequently the U S Supreme Court in 1971 upheld that demand in the landmark Swann v Charlotte Mecklenburg decision Charlotte became the national test case for busing Though the transition was not always peaceful within five years Charlotte was a model of successful integration North Carolinians of all races joined in public and private initiatives to make desegregation work and garnered national recognition for their achievement Based on the favorable results a powerful consensus developed in Charlotte that desegregation was morally right and educational beneficial But that opinion was not to last Charlotte s population grew rapidly in the 1990s and many new arrivals were weary of the status of the public school system In 1999 a group of white citizens reopened the case to push for a return to neighborhood schools A federal judge sided with them finding that the plans initiated in the 1971 ruling were both unnecessary and unconstitutional because they were race based Charlotte s journey had come full circle Today Gaillard explains Charlotte s schools are becoming segregated once more this time along both economic and racial lines A growing number of white students are either leaving the public school system for private institutions or converging on a few exceptional schools in affluent communities This exodus from neighborhood schools has put the future of the city s public school system in jeopardy once more In this new edition of The Dream Long Deferred Gaillard chronicles the span of Charlotte s five decade struggle with race in education to remind us that the national dilemma of equal educational opportunity remains unsettled Balanced in his treatment of all sides Gaillard gives the issue a human face so that historians educators and ordinary citizens can better glean understanding from the triumph and tragedy of one American community
