## **Megalithic Remains In Britain And Brittany:**

Megalithic Remains in Britain and Brittany Alexander Thom, Archibald Stevenson Thom, 1978 Megalithic Remains in Britain and Brittany **Orientation of Prehistoric Monuments in Britain: A Reassessment** Alistair Marshall, 2021-07-08 Reassesses major axial alignment at many megalithic ritual and funerary monuments Neolithic to Bronze Age in Britain and Ireland not in terms of abstract astronomical concerns but as an expression of repeated seasonal propitiation involving community agrarian economy and ancestry in an attempt to mitigate variable environmental conditions

**The Megaliths of Vera Island in the Southern Urals** Stanislav Grigoriev, Yulia Vasina, 2019-07-11 The largest and brightest megalithic complex in Russia's Ural Mountains is located on Vera Island represented by three chambered megaliths and sanctuaries of the Eneolithic period mid 4th 3rd millennium BC The oldest samples of stone sculpture in the Urals have been revealed within this complex **British and Irish Archaeology**, 1994 *Inside the Neolithic Mind: Consciousness, Cosmos, and the Realm of the Gods* David Lewis-Williams, David Pearce, 2005-10-01 An exploration of how brain structure and cultural content interacted in the Neolithic period 10 000 years ago to produce unique life patterns and belief systems What do the headless figures found in the famous paintings at Catalhoyuk in Turkey have in common with the monumental tombs at Newgrange and Knowth in Ireland How can the concepts of birth death and wild cast light on the archaeological enigma of the domestication of cattle What generated the revolutionary social change that ended the Upper Palaeolithic David Lewis Williams's previous book *The Mind in the Cave* dealt with the remarkable Upper Palaeolithic paintings carvings and engravings of western Europe Here Dr Lewis Williams and David Pearce examine the intricate web of belief myth and society in the succeeding Neolithic period arguably the most significant turning point in all human history when agriculture became a way of life and the fractious society that we know today was born The authors focus on two contrasting times and places the beginnings in the Near East with its mud brick and stone houses each piled on top of the ruins of another and western Europe with its massive stone monuments more ancient than the Egyptian pyramids They argue that neurological patterns hardwired into the brain help explain the art and society that Neolithic people produced Drawing on the latest research the authors skillfully link material on human consciousness imagery and religious concepts to propose provocative new theories about the causes of an ancient revolution in cosmology and the origins of social complexity In doing so they create a fascinating neurological bridge to the mysterious thought lives of the past and reveal the essence of a momentous period in human history 100 illustrations 20 in color *Early Astronomy* Hugh Thurston, 2012-12-06 People must have watched the skies from time immemorial Human beings have always shown intellectual curiosity in abundance and before the invention of modern distractions people had more time and more mental energy to devote to stargazing than we have Megaliths Chinese oracle bones Babylonian clay tablets and Mayan glyphs all yield evidence of early peoples' interest in the skies To understand early astronomy we need to be familiar with various phenomena that could and still can be seen in the sky For instance it

seems that some early people were interested in the points on the horizon where the moon rises or sets and marked the directions of these points with megaliths These directions go through a complicated cycle much more complicated than the cycle of the phases of the moon from new to full and back to new and more complicated than the cycle of the rising and setting directions of the sun Other peoples were interested in the irregular motions of the planets and in the way in which the times of rising of the various stars varied through the year so we need to know about these phenomena i e about retrogression and about heliacal rising to use the technical terms The book opens with an explanation of these matters Early astronomers did more than just gaze in awe at the heavenly bodies they tried to understand the complex details of their movements By 300 H C

**Knowledge and Power in Prehistoric Societies** Lynne Kelly, 2015-05-19 In this book Lynne Kelly explores the role of formal knowledge systems in small scale oral cultures in both historic and archaeological contexts In the first part she examines knowledge systems within historically recorded oral cultures showing how the link between power and the control of knowledge is established Analyzing the material mnemonic devices used by documented oral cultures she demonstrates how early societies maintained a vast corpus of pragmatic information concerning animal behavior plant properties navigation astronomy genealogies laws and trade agreements among other matters In the second part Kelly turns to the archaeological record of three sites Chaco Canyon Poverty Point and Stonehenge offering new insights into the purpose of the monuments and associated decorated objects This book demonstrates how an understanding of rational intellect pragmatic knowledge and mnemonic technologies in prehistoric societies offers a new tool for analysis of monumental structures built by non literate cultures

Archaeoastronomy in the Old World D. C. Heggie, 1982-08-05 The papers in this book summarising the proceedings of a conference at the University of Oxford in September 1981 are concerned with shedding light on a controversial aspect of European prehistory was astronomy practised in the late Neolithic and bronze ages This volume will be of interest to prehistorians professionals with pure and applied sciences background and statisticians

*Sacred Geometry of the Earth* Mark Vidler, Catherine Young, 2016-01-22 Identifies the patterns of our planet s design within the natural landscape Explains the geometry inherent in the mountains and coasts on all continents Reveals how ancient monuments were built to reflect and enhance the Earth s design often connecting sites around the world Includes detailed maps that show the simple geometrical relationships among the world s mountains coastlines islands and ancient monuments From continent to continent across the globe Mark Vidler and Catherine Young reveal that order is everywhere on Earth On remote islands soaring summits and level deltas they unveil natural topographic patterns related to pi the golden ratio and right triangle geometry And as the planet s design emerges it becomes clear that this hidden order in nature decided the location of ancient monuments the world over Through detailed maps Vidler and Young show how the locations of megalithic monuments reflect and enhance a natural pattern on the Earth that connects its major features The rows of standing stones at Carnac in France for example point to the summits of Mount Everest and K2 and Angkor Wat in

Cambodia is on a straight line joining Mount Kilimanjaro in Africa and the tip of Cape Comorin in India The authors examine the geography of many islands and each continent including Antarctica to show how the highest peak on each landmass falls on a line connecting coastal extremes They reveal how circles of standing stones and man made mounds mark intersections of these lines They explore the connection between the Nazca lines in Peru and the Amazon Nile and Ganges deltas and explain how the locations of the Giza pyramids Stonehenge and Machu Picchu are integrated into the natural design on Earth As they uncover geometric patterns on the Earth line by line point by point the authors reveal how the world's ancient monuments represent a form of transglobal communication that far predates the written word **Professor Challenger**

**and his Lost Neolithic World: The Compelling Story of Alexander Thom and British Archaeoastronomy** Euan W.

MacKie, 2021-02-04 This book combines the two great passions of the author's life reconstructing the Neolithic mind and constructively challenging consensus in his professional domain Semi autobiographical it charts his investigation of

Alexander Thom's theories regarding the alignment of prehistoric monuments in the landscape across several key Neolithic sites **The Archaeology of Darkness** Marion Dowd, Robert Hensey, 2016-05-31 Through time people have lived with

darkness Archaeology shows us that over the whole human journey people have sought out dark places for burials for votive deposition and sometimes for retreat or religious ritual away from the wider community Thirteen papers explore Palaeolithic use of deep caves in Europe and the orientation of mortuary monuments in the Neolithic and Bronze Age It examines how the senses are affected in caves and monuments that were used for ritual activities from Bronze Age miners in Wales working in dangerous subterranean settings to initiands in Italian caves to a modern caver's experience of spending time in the one of the world's deepest caves in Russia We see how darkness was and is viewed at northern latitudes where parts of the year are spent in eternal night and in Easter Island where darkness provided communal refuge from the pervasive sun We know that spending extended periods in darkness and silence can affect one physically emotionally and spiritually How did interactions between people and darkness affect individuals in the past and how were regarded by their communities And how did this interaction transform places in the landscape As the ever increasing electrification of the planet steadily minimizes the amount of darkness in our lives curiously darkness is coming more into focus This first collection of papers on the subject begins a conversation about the role of darkness in human experience through time **The Book of Unconformities** Hugh

Raffles, 2022-04-18 From the author of Insectopedia a powerful exploration of loss grief endurance and the absences that permeate the present Unconformities are gaps in the geological record physical evidence of breaks in time For Hugh Raffles these holes in history are also fissures in feeling knowledge memory and understanding In this endlessly inventive riveting book Raffles enters these gaps drawing together threads of geology history literature philosophy and ethnography to trace the intimate connections between personal loss and world historical events and to reveal the force of absence at the core of contemporary life Through deeply researched explorations of Neolithic stone circles Icelandic lava mica from a Nazi

concentration camp petrified whale blubber in Svalbard the marble prized by Manhattan's Lenape and a huge Greenlandic meteorite that arrived in New York City along with six Inuit adventurers in 1897 Raffles shows how unconformities unceasingly incite human imagination and investigation yet refuse to conform heal or disappear A journey across eons and continents The Book of Unconformities is also a journey through stone this most solid ancient and enigmatic of materials it turns out is as lively capricious willful and indifferent as time itself *Skywatchers* Anthony F. Aveni, 2001-08-15

*Skywatchers of Ancient Mexico* helped establish the field of archaeoastronomy and it remains the standard introduction to this subject Combining basic astronomy with archaeological and ethnological data it presented a readable and entertaining synthesis of all that was known of ancient astronomy in the western hemisphere as of 1980 In this revised edition Anthony Aveni draws on his own and others' discoveries of the past twenty years to bring the *Skywatchers* story up to the present He offers new data and interpretations in many areas including The study of Mesoamerican time and calendrical systems and their unprecedented continuity in contemporary Mesoamerican culture The connections between Precolumbian religion astrology and scientific quantitative astronomy The relationship between Highland Mexico and the world of the Maya and the state of Pan American scientific practices The use of personal computer software for computing astronomical data With this updated information *Skywatchers* will serve a new generation of general and scholarly readers and will be useful in courses on archaeoastronomy astronomy history of astronomy history of science anthropology archaeology and world religions

**The Living Goddesses** Marija Gimbutas, 2001-01-12 Presents evidence to support the author's woman-centered interpretation of prehistoric civilizations considering the prehistoric goddesses gods and religion and discussing the living goddesses deities which have continued to be venerated through the modern era *Bretons and Britons* Barry Cunliffe, 2021-05-13 What is it about Brittany that makes it such a favourite destination for the British To answer this question *Bretons and Britons* explores the long history of the Bretons from the time of the first farmers around 5400 BC to the present and the very close relationship they have had with their British neighbours throughout this time More than simply a history of a people *Bretons and Britons* is also the author's homage to a country and a people he has come to admire over decades of engagement Underlying the story throughout is the tale of the Bretons' fierce struggle to maintain their distinctive identity As a peninsula people living on a westerly excrescence of Europe they were surrounded on three sides by the sea which gave them some protection from outside interference but their landward border was constantly threatened not only by succeeding waves of Romans Franks and Vikings but also by the growing power of the French state It was the sea that gave the Bretons strength and helped them in their struggle for independence They shared in the culture of Atlantic facing Europe and from the eighteenth century when a fascination for the Celts was beginning to sweep Europe they were able to present themselves as the direct successors of the ancient Celts along with the Cornish Welsh Scots and Irish This gave them a new strength and a new pride It is this spirit that is still very much alive today *Under Ancient Skies* Paul

Dunbavin,2005-01-01 In all of the world's myths and religions we find traditions of a Great Flood There are stories too of a Golden Age the antediluvian paradise that it destroyed Might these be real memories of the ancient world And how can we analyze the subject scientifically The key to unlock these ancient myths lies in astronomy Under Ancient Skies will examine the astronomical evidence for a prehistoric cataclysm and in the process will explore a number of related anomalies in prehistory including Was there a single great flood in human prehistory or have there been many Could the workings of ancient calendars and the records of ancient eclipses give us clues about the Flood and the antediluvian world Did the Celtic Druids use a calendar based on the orbit of Saturn and is this the same antediluvian calendar that is described in Plato's myth of Atlantis Do Hindu Chinese and Mayan cosmology myths recall the years after the Flood when our world wobbled on its axis Did these same events trigger the building of astronomically aligned monuments such as Stonehenge and the pyramids Was the Atenist religion of the heretic Egyptian Pharaoh Akhenaten inspired by a series of eclipses during his lifetime Do the seven good years and the seven bad years of the Joseph story recall a time when a comet struck the Earth Did the British Druids use astronomy to calculate the size of the Earth and could they have used this knowledge to navigate to America Why were the ancient Celts so afraid that the sky would one day fall on their heads Are comets and asteroids the only danger lurking in the cosmos or could there be other dangers as yet unknown to science In 1994 we watched as a comet struck the giant planet Jupiter Geologists have recently discovered the crater in Yucatan where an asteroid impact destroyed the world of the dinosaurs Scientists and astronomers have stopped dismissing the theory that asteroids and comets could have struck the Earth during prehistory but any suggestion that a comet impact just a few thousand years ago might have caused the Biblical Flood remains the last taboo It is time for this prejudice too to be washed away The reader is promised a real book a fully referenced textbook with original content in every chapter and a bibliography of over 300 sources If you have read Paul Dunbavin's other books then you will know what to expect First published in 2005 and for a long time out of print this new edition will make the author's unique research available again to anyone who is interested in mythology astronomy and ancient mysteries Now also available in Kindle hard and soft editions *Frame of the Universe* Frank Durham,Robert D. Purrington,1985-11-15 Durham and Purrington approach the history of the universe by exploring the frontiers of physics while maintaining a long standing interest in astronomy and cosmology They stress that man can not fully understand himself until he understands the universe of which he is a part Encyclopedia of Pseudoscience William F. Williams,2013-12-02 The Encyclopedia of Pseudoscience is the first one volume A to Z reference that identifies defines and explains all of the terms and ideas dealing with the somewhat murky world of the almost sciences Truly interdisciplinary and multicultural in scope the Encyclopedia examines how fringe or marginal sciences have affected people throughout history as well as how they continue to exert an influence on our lives today This comprehensive reference brings together superstitions and fads that are part of popular culture such as fortune telling healing practices once thought marginal that

are now become increasingly accepted such as homeopathy and acupuncture frauds and hoaxes that have occurred throughout history such as UFOs mistaken theories first put forward as serious science but later discarded as false such as phrenology and racial typing etc More than 2000 extensively cross referenced and illustrated entries cover prominent phenomena major figures events topics places and associations

### **Stonehenge and Other British Stone Monuments**

**Astronomically Considered** Sir Norman Lockyer, 1909      Information Technologies and Social Orders Carl J.

Couch, 2017-07-12 The history of human society as Carl Couch recounts it in his speculative final book is a history of successive sometimes overlapping information technologies used to process the varied symbolic representations that inform particular social contexts Couch departs from earlier media theorists who ignored these contexts in order to concentrate on the technologies themselves Here instead he adopts a consistent theory of interpersonal and intergroup relations to depict the essential interface between the technologies and the social contexts He emphasizes the dynamic and formative capacities of such technologies and places them within the major institutional relations of societies of any size Social orders are viewed in these pages as inherently and reflexively shaped by the information technologies that participants in the institutions use to carry out their work The manuscript was nearly complete in draft at the time of Couch's death He has left a bold synthetic statement reclaiming the common ground of sociology and communication studies and articulating the indispensability of each for the other With admirable scope across historical epochs and cultures he shows in detail the transformative power of information technologies While the author hopes that a humane vision comes with each technological advance he nonetheless describes the numerous instances of mass brutality and oppression that have resulted from the oligarchic control of those technologies Couch's theory and substantive analysis speak directly to the interests of historians sociologists and communication scholars
