Transformation in Southeast Asia Riaz Hassan, 2021-12-28 Globalization modernization and colonialism have played a pivotal role in the social transformation of Southeast Asian societies The essays in this volume examine three aspects of this transformation social change and development the role of intellectuals religion and cultural values The volume honours the distinguished Malaysian sociologist Syed Hussein Alatas and his seminal contributions to the sociology of Southeast Asian societies They have been written by his present and former colleagues friends and students Their contributions reflect complement and extend the influence of his ideas on contemporary research and social science scholarship *China And Southeast Asia: Myths, Threats, And Culture* Gungwu Wang, 1999-05-06 The reemergence of China as a political force has triggered sharp reassessments of its future role in the Asia Pacific region There has been much hyperbole about China s economic power especially if it is linked with the entrepreneurial talents of the ubiquitous Chinese spread around the globe Some countries have been encouraged to sound warning bells about China s future ambitions to dominate the region All this is not surprising even understandable But the danger of exaggeration to the point where efforts to predict what China and the Chinese will do become merely alarmist and the predictions become self fulfilling has to be guarded against There is no easy remedy for deep seated suspicion and hostility leading to persistent attempts to mislead and provoke The recent financial crisis in East Asia has aggravated some worst case scenarios and these may bring additional worries to the region s plans for ultimate recovery The three essays in this volume focus on some areas where myths and prejudices have long survived They offer different perspectives and suggest alternative ways to approach certain problems of understanding China s relations with Southeast Asia **Governance in Pacific Asia** Peter Ferdinand, 2012-02-02 This book examines the political economy of the states of Pacific Asia stretching from Japan to Burma since the end of WWII Governance in Pacific Asia offers a comprehensive account of the diverse experiences of the states in Pacific Asia Organized thematically around government and business relations in the main sectors of the economy chapters cover the historical social and cultural contexts for such policies as well as the social and political consequences of rapid economic development They also discuss the increasing economic integration of the region as well as its impact on global affairs and the reverse effect of globalization upon particular political systems Each chapter contains case studies and examples from anywhere in the region with some countries appearing more regularly such as China Japan newly industrialized economies Thailand the Philippines Malaysia Indonesia and Vietnam Governance in Pacific Asia provides an in depth comparative survey of a key region in world politics and political economy An essential text that includes sources from the region in at least three languages Chinese Japanese and Indonesian Malay it will be of interest to students and faculty in international relations developmental politics Asian politics and political economy *Asian Security and the Rise of China* David Martin Jones, Michael Lawrence Rowan Smith, Nicholas Khoo, 2013-01-01 Khoo Jones and Smith have pulled off a remarkable balancing act crafting a well grounded and multifaceted survey of China s rise in the context of Asian security In a field which is often marked more by scholarly

effervescence than substance the authors provide a refreshingly detailed portrait of the last two decades and fair mindedly point out evidence which might support both extremes of the debates they challenge with their own third way Frank Scott Douglas US Naval War College US Congratulations to the authors for a clearly argued and comprehensive treatment of China's post Cold War rise and what it means for existing and future dynamics of the Asia Pacific region Effectively employing realist theory in a fair minded treatment of regional developments the volume shows how and why power realities are more important than non material factors in determining the region's trajectory and thereby demonstrates that China's ascendance in Asia remains complicated and conflicted Robert Sutter George Washington University US East Asia is without question a region of huge economic political and security significance Asian Security and the Rise of China offers a comprehensive overview and assessment of the international politics of the Asia Pacific since the end of the Cold War seeking to address the overarching question of how we can most convincingly explain the central dynamics of Asia's international relations Via a realist perspective on the dynamics and frictions associated with accommodating the rise of powerful states this timely book addresses the core issue in contemporary Asian politics the rise of China The contributors expertly evaluate China's rise and the impact it has had on the dynamics of regional relations in North East and South East Asia It demonstrates that China's economic development and its regional and international ambition increasingly conflict with the existing consensus based regional arrangements like the ASEAN Regional Forum and the East Asian Summit mechanism As a consequence smaller states in the region increasingly resort to hedging and balancing strategies in an attempt to mitigate Chinese hegemony This leaves the region in the grip of a complex and potentially destabilizing security dilemma The book offers a compelling analysis of the problem that China presents for its region that will enlighten undergraduate students of regional political studies and international relations Postgraduate and Master's students on courses addressing East and South East Asia will also find plenty of information in this invaluable book

**Order of East Asia** Honghua Men, 2020-06-05 This book describes the past present and future of East Asian order and analyzes how China Japan the U S and ASEAN play important roles in the transformation of East Asian order and discusses the new logic of regional order formation in the era of globalization and regional integration The book analyzes China's relationship with East Asian order great powers and regional institutions involved especially bilateral relations between China and Japan China and the U S China and ASEAN and explores how China could improve its regional strategy Addressing a hot topic in world politics from the angle of regional order and using methods such as historical analysis comparative analysis quantitative analysis and case study this readable book enables readers to develop an understanding of the history and status quo of East Asia and China's role in the region

Vladislav Inozemtsev,2017-07-12 Disparities between the economic development of nations have widened throughout the twentieth century and they show no sign of closing In the nineteenth century the economic potential of developed countries was three times that of the rest of the world Today the gap is twenty times greater and the trend is increasing In this provocative reexamination of theories of accelerated development or catching up Vladislav L Inozemtsev traces the evolution of thinking about how countries lagging behind can most swiftly move forward and assesses their prospects for success in this effort Inozemtsev reviews the experience of the Soviet Union as well as the recent experience of Japan China and Southeast Asia He finds that those countries that have moved forward most rapidly have successfully adapted new technology to old processes But even then they face daunting odds as they grapple with the need to change their population s ideas and behavior And in the 1990s their rates of development have noticeably declined Catching Up assesses prospects for successful application of theories of accelerated development in the global economy Inozemtsev s pessimistic conclusion is that rapid industrial progress is not achievable in the information society of the twenty first century Inozemtsev reaches this conclusion after reviewing theories of accelerated development thinking from the diverse viewpoints of the 1940s and 1950s to the more intensive ideological polarization of the 1960s Inozemtsev believes it will be impossible for non Western nations to catch up with the West because of their inability to generate or control information and knowledge      *Japan and China*
