## **Mekong River:**

**The Mekong** Hiroshi Hori, 2000 Hori a consulting engineer describes the ecosystem flow and water quality along the Mekong River basin as well as current conditions and future possibilities for development He then relates what water management has been done in the Mekong and why demonstrating how international thinking and action have evolved since 1958 Over the years more attention has been given to the social and economic condition of the indigenous people investigations into the relationships between human activity and the quality of ecosystem processes has changed and methods of assessing the need for hydroelectric power and the consequences of proposed reservoirs has evolved c Book News Inc Mekong—The Occluding River Ngo The Vinh, 2010-07-14 Part travelogue part history and part environmental treatise Mekong The Occluding River is above all else an urgent warning that factors such as pollution ecological devastation and the depletion of natural resources are threatening the very existence of the Mekong River Author Ngo The Vinh combines his vivid travel notes and collection of photographs with a meticulously researched history of the environmental degradation of the Mekong River Translated from Vietnamese the best selling treatise outlines the myriad threats facing the river today From oil shipments feeding the industrial cities of southwestern China to gigantic hydroelectric dams known as the Mekong Cascades in Yunnan province China is the worst environmental offender though the other nations along Mekongs banks behave no better From Thailand to Laos to Vietnam hydroelectric dams that threaten the Mekong and its inhabitants are being built at an alarming rate To save the Mekong Ngo The Vinh calls upon all the nations that benefit from its life giving water to observe the Spirit of the Mekong in the implementation of all future development projects To achieve this end there must be a concerted and sustained commitment to cooperation and sustainability At this critical cross roads we should remind ourselves of the mantra from Sea World San Diego Extinction is forever Endangered means we still have time

**The Mekong River Basin** Hong Quan Nguyen, Heiko Apel, Quang Bao Le, Minh Tu Nguyen, Venkataramana Sridhar, 2024-04-22 The Mekong River Basin Ecohydrological Complexity from Catchment to Coast Volume Three presents real facts data and predictions for quantifying human induced changes throughout the Mekong watershed including its estuaries and coasts and proposes solutions to decrease or mitigate the negative effect and enable sustainable development This is the first work to link socio ecological interaction study over the whole Mekong River basin through the lens of ecohydrology Each chapter is written by a leading expert with coverage on climate change groundwater land use flooding drought biodiversity and anthropological issues Human activities are enormous in the whole watershed and are still increasing throughout the catchment with severe negative impacts on natural resources are emerging Among these activities hydropower dams especially a series of 11 dams in China are the most critical as they generate massive changes throughout the system including in the delta and to the livelihoods of millions of people and they threaten sustainability Presents an extensive collection of eco hydrological changes in the river basin driven by both nature and anthropological factors Provides

state of the art modeling data analysis methodologies for complex socio ecological complexity applied in the Mekong river basin Includes specific cases of ecohydrology in the river basin especially from the Mekong delta *The Mekong* Ian Charles Campbell, 2009-11-20 The Mekong is the most controversial river in Southeast Asia and increasingly the focus of international attention It flows through 6 countries China Myanmar Laos Thailand Cambodia and Viet Nam The 4 downstream countries have formed the Mekong River Commission to promote sustainable development of the river and many of their people depend on it for their subsistence it has possible the largest freshwater fishery in the world and the Mekong waters support rice agriculture in the delta in Viet Nam which produces about 40% of that country s food as well as in Cambodia Laos and Thailand China is now building the first large mainstream dam on the river and has proposals for several more These dams are likely to affect the downstream countries Several of the downstream countries also have plans for large scale hydropower and irrigation development which could also impact the river This book will provide a solid overview of the biophysical environment of the Mekong together with a discussion of the possible impacts biophysical economic and social of some possible development scenarios It is intended to provide a technical basis which can inform the growing political and conservation debate about the future of the Mekong River and those who depend on it It is aimed at river ecologists geographers environmentalists and development specialists both in the basin and especially outside for whom access to this material is most difficult This book will be the first comprehensive treatment of the Mekong system The first comprehensive overview of all aspects of the Mekong River system Deals with a regionally critical ecosystem and one under threat The Mekong supports the world s largest freshwater fishery and provides water underpinning a major regional rice paddy system Presents the authoritative findings of the Mekong River Commission s research for a wider audience for the first time outside of limited distribution reports **The Mekong River** Kim Dramer, 2001-09-01 Describes the changing nature of the river as it flows through different regions people and animals living along the river farming and political development The Governance Regime of the Mekong River Basin Rémy Kinna, Alistair Rieu-Clarke, 2017-05-08 Entry into force of the UN Watercourses Convention in August 2014 and the opening of the UNECE Water Convention to all states in March 2016 are significant milestones in international water law A comparative analysis of these two global water conventions and the 1995 Mekong Agreement reveals that all three instruments are generally compatible Nonetheless the international legal principles and processes set forth in the two conventions can render the Mekong Agreement more up to date robust and practical The Governance Regime of the Mekong River Basin Can the Global Water Conventions Strengthen the 1995 Mekong Agreement contends that strengthening the Agreement would be timely given the increasing pressures associated with the rapid hydropower development within the basin and the gradually emerging disputes therein Due to these fast moving developments Kinna and Rieu Clarke strongly recommend that the Mekong states should seriously consider joining both conventions in order to buttress and clarify key provisions of the 1995 Mekong Agreement The Mekong Milton

Osborne,2007-12-01 A remarkable history of the great river of Southeast Asia Jill Ker Conway author of The Road from Coorain The Mekong River runs over nearly three thousand miles beginning in the mountains of Tibet and flowing through China Burma Laos Thailand Cambodia and Vietnam before emptying into the China Sea Its waters are the lifeblood of Southeast Asia and first begot civilization on the fertile banks of its delta region at Oc Eo nearly two millennia ago This is the story of the peoples and cultures of the great river from these obscure beginnings to the emergence of today s independent nations Drawing on research gathered over forty years Milton Osborne traces the Mekong s dramatic history through the rise and fall of civilizations and the era of colonization and exploration He details the struggle for liberation during a twentieth century in which Southeast Asia has seen almost constant conflict including two world wars the Indochina War the Vietnam War and its bloody aftermath and explores the prospects for peace and prosperity as the region enters a new millennium Along the way he brings to life those who witnessed and shaped events along the river including Chou Ta kuan the thirteenth century Chinese envoy who recorded the glory of Angkor Wat the capital of the Khmer Empire the Iberian mercenaries Blas Ruiz and Diego Veloso whose involvement in the intrigues of Cambodia s royal family shook Southeast Asia s politics in the sixteenth century and the revolutionaries led by Ho Chi Minh whose campaigns to liberate Vietnam from the French and unify the nation under communism changed the course of history A pathbreaking ecologically informed chronicle A pulsating journey through the heart of Southeast Asia Publishers Weekly Values of Inland Fisheries in the Mekong River Basin Eric Baran,Teemu Jantunen,Chiew Kieok Chong, **A Procedural Framework for Transboundary Water Management in the Mekong River Basin** Qi Gao,2014-03-13 In A Procedural Framework for Transboundary Water Management in the Mekong River Basin Shared Mekong for a Common Future Qi Gao explores procedural implications of integrated water resources management and its application in the Mekong River Basin As a problem based study enlightening conclusions are made based on the increasingly polycentric nature of transboundary cooperation in the Mekong region The procedural requirements in the Mekong context both the ideal and practical scenarios are considered combined with selected case studies Qi Gao convincingly asserts the necessity to enhance decision making processes and suggests procedural legal mechanisms to institutionalize sustainability concepts in transboundary cooperation **Song of the Mekong River** Na-mi Choi,2015-08-01 The Mekong River is called the lifeline of Vietnam The Vietnamese people s lives are dependent on the river This book is about Tui who lives in a water village **Flood Prevention and Drought Relief in Mekong River Basin** Hui Liu,2020-06-29 This book provides an overview of flood and drought in the Lower Mekong Basin reviews the characteristics of flood and drought and details structural and non structural measures for flood and drought mitigation employed in the basin countries as well as their flood and drought mitigation capacity Given its scope the book offers a valuable resource for researchers and engineers in the field of transboundary rivers especially those with an interest in the Lower Mekong River **China's Hydro-politics in the Mekong** Sebastian Biba,2018-03-05 China s Hydro politics in the Mekong explores the

intricate processes of conflict and cooperation over the use of water resources in the Mekong river basin between upstream China and the downstream countries of Laos Thailand Cambodia and Vietnam The book tackles two gaps in the empirical literature first the neglect of international hydro politics as one specific and increasingly important issue area of China s foreign policy behavior especially its neighborhood diplomacy and second the disregard of China s role in Mekong River politics In particular this book scrutinizes the spring 2010 Mekong crisis and the events surrounding it which led to a series of complex multi level security related interactions among various state and non state actors in the region with China at the center Analyzing this crisis the book not only employs securitization theory as its theoretical framework and adds a couple of innovations to this theory but also gives a detailed account of China s hydro political behavior in one specific and particularly revealing case study Moreover the book embeds China s Mekong hydro politics in the bigger picture of its sub regional international affairs as the former does not take place in a vacuum but rather is a part of China s overall foreign relations with its neighbors The book acknowledges this link and provides new insights into the role of hydro politics and its relationship vis vis other issue areas of China s foreign policy

A River's Tale Edward A. Gargan, 2002 The River s Tale is a deeply informed personal chronicle of a remarkable journey down the Mekong River as it runs through China Tibet Burma Laos Thailand Cambodia and Vietnam In it Edward A Gargan tells a stirring tale of adventure that reveals the Mekong s many worlds Beginning in 1998 Gargan was at last able to pursue his long held dream of traveling the three thousand miles of the river and lingering where he wished He was in a sense coming to terms with places and peoples with which he had already linked his life His youthful opposition to the Vietnam War had been the first manifestation of his passionate interest in Asia where he subsequently spent much of his career as a New York Times correspondent His travels show us a kind of modernity settling uneasily on regions still mired in backwardness and poverty and shadows that linger so many years after the end of the Vietnam War We visit Internet cafes in dirt streeted towns near thatched hut villages without electricity The magnificent Angkor Wat a hub of tourism is surrounded by the ruins

engendered by Pol Pot's genocidal reign We see plodding mule trains caravanning sacks of opium through Burma on their way to China to be processed and distributed to the West Tibetan horsemen adorned in silver and amber jewelry herd yaks across endless grasslands as their ancestors did though their culture is under siege by the Chinese Vietnamese salesmen scooter around Saigon hawking American soaps passing by outcast children fathered by American soldiers and left behind Buddhism flowers in a Laos ravaged by communism Sex tourism thrives in prosperous Thailand a trade chiefly involving teenagers who pay a deadly price And throughout there is the Mekong shaping landscapes linking cultures sustaining populations showcasing spectacular beauty Edward Gargan is an acutely observant sympathetic guide to a fascinating world and he has written a powerful and lyrical book Last Days of the Mighty Mekong Brian Eyler,2019-02-15 Celebrated for its natural beauty and its abundance of wildlife the Mekong river runs thousands of miles through China Myanmar Laos Thailand Cambodia and Vietnam Its basin is home to more than 70 million people and has for centuries been one of the world's richest agricultural areas and a biodynamic wonder Today however it is undergoing profound changes Development policies led by a rising China in particular aim to interconnect the region and urbanize the inhabitants And a series of dams will harness the river's energy while also stymieing its natural cycles and cutting off food supplies for swathes of the population In Last Days of the Mighty Mekong Brian Eyler travels from the river's headwaters in China to its delta in southern Vietnam to explore its modern evolution Along the way he meets the region's diverse peoples from villagers to community leaders politicians to policy makers Through conversations with them he reveals the urgent struggle to save the Mekong and its unique ecosystem **The Mekong** Milton E.
