**Melanesian Pidgin and the Oceanic Substrate** Roger M. Keesing, 2022 *Creoles, Their Substrates, and Language Typology* Claire Lefebvre, 2011-01-01 Since creole languages draw their properties from both their substrate and superstrate sources the typological classification of creoles has long been a major issue for creolists typologists and linguists in general Several contradictory proposals have been put forward in the literature For example creole languages typologically pair with their superstrate languages Chaudenson 2003 with their substrate languages Lefebvre 1998 or even creole languages are alike Bickerton 1984 such that they constitute a definable typological class McWhorter 1998 This book contains 25 chapters bearing on detailed comparisons of some 30 creoles and their substrate languages As the substrate languages of these creoles are typologically different the detailed investigation of substrate features in the creoles leads to a particular answer to the question of how creoles should be classified typologically The bulk of the data show that creoles reproduce the typological features of their substrate languages This argues that creoles cannot be claimed to constitute a definable typological class

Tryon, Jean-Michel Charpentier, 2011-05-12 *Pacific Pidgins and Creoles* discusses the complex and fascinating history of English based pidgins in the Pacific especially the three closely related Melanesian pidgins Tok Pisin Pijin and Bislama The book details the central role of the port of Sydney and the linguistic synergies between Australia and the Pacific islands in the late 18th and early 19th centuries the role of Pacific islander plantation labor overseas and the differentiation which has taken place in the pidgins spoken in the Melanesian island states in the 20th century It also looks at the future of Pacific pidgins at a time of increasing vernacular language endangerment

*Code-switching Between Structural and Sociolinguistic Perspectives* Gerald Stell, Kofi Yakpo, 2015-02-17 The study of code switching has been carried out from linguistic psycholinguistic and sociolinguistic perspectives largely in isolation from each other This volume attempts to unite these three research strands by placing at the centre of the enquiry the role played by social factors in the occurrence forms and outcomes of code switching The contributions in this volume are divided into three parts code switching between cognition and socio pragmatics multilingual interaction and identity and code switching and social structure The case studies represent contact settings on five continents and feature languages with diverse linguistic affiliations They are predictive and descriptive in their research goals and rely on experimental or naturalistic data But they share the common goal of seeking to explain how social structures ideologies and identity impact on the grammatical and conversational features of code switching and language mixing and on the emergence of mixed languages Given its scope this volume is a significant addition to the empirical and theoretical foundations of the study of code switching It is also of relevance to the general debate on the inter relationships between language and society

**Language Creation and Language Change** Michel DeGraff, 1999 Research on creolization language change and language acquisition has been converging toward a triangulation of the constraints along which grammatical systems develop within individual speakers and viewed externally across generations of speakers The originality of this volume is in its comparison of various sorts of language development from a number of linguistic theoretic and empirical perspectives using data from both speech and gestural modalities and from a diversity of acquisition environments In turn this comparison yields fresh insights on the mental bases of language creation The book is organized into five parts creolization and acquisition acquisition under exceptional circumstances language processing and syntactic change parameter setting in acquisition and through creolization and language change and a concluding part integrating the contributors observations and proposals into a series of commentaries on the state of the art in our understanding of language development its role in creolization and diachrony and implications for linguistic theory Contributors Dany Adone Derek Bickerton Adrienne Bruyn Marie Coppola Michel DeGraff Viviane D prez Alison Henry Judy Kegl David Lightfoot John S Lumsden Salikoko S Mufwene Pieter Muysken Elissa L Newport Luigi Rizzi Ian Roberts Ann Senghas Rex A Sprouse Denise Tangney Anne Vainikka Barbara S Vance Maaïke Verrips

**Language Evolution** Salikoko S. Mufwene, 2008-03-31 Languages are constantly changing New words are added to the English language every year either borrowed or coined and there is often railing against the decline of the language by public figures Some languages such as French and Finnish have academies to protect them against foreign imports Yet languages are species like constructs which evolve naturally over time Migration imperialism and globalization have blurred boundaries between many of them producing new ones such as creoles and driving some to extinction This book examines the processes by which languages change from the macroecological perspective of competition and natural selection In a series of chapters Salikoko Mufwene examines such themes as natural selection in language the actuation question and the invisible hand that drives evolution multilingualism and language contact language birth and language death the emergence of Creoles and Pidgins the varying impacts of colonization and globalization on language vitality This comprehensive examination of the organic evolution of language will be essential reading for graduate and senior undergraduate students

The Genesis of Grammar Bernd Heine, Tania Kuteva, 2007-10-05 This book reconstructs what the earliest grammars might have been and shows how they could have led to the languages of modern humankind Like other biological phenomena language cannot be fully understood without reference to its evolution whether proven or hypothesized wrote

Talmy Givón in 2002 As the languages spoken 8 000 years ago were typologically much the same as they are today and as no direct evidence exists for languages before then evolutionary linguists are at a disadvantage compared to their counterparts in biology Bernd Heine and Tania Kuteva seek to overcome this obstacle by combining grammaticalization theory one of the main methods of historical linguistics with work in animal communication and human evolution The questions they address include do the modern languages derive from one ancestral language or from more than one What was the structure of language like when it first evolved And how did the properties associated with modern human languages arise in particular syntax and the recursive use of language structures The authors proceed on the assumption that if language evolution is the result of language change then the reconstruction of the former can be explored by deploying the processes involved in the latter Their measured arguments and crystal clear exposition will appeal to all those interested in the evolution of language from advanced undergraduates to linguists cognitive scientists human biologists and archaeologists The Oxford Handbook of Grammaticalization Heiko Narrog, Bernd Heine, 2011-10-13 This book presents the state of the art in research on grammaticalization the process by which lexical items acquire grammatical function grammatical items get additional functions and grammars are created Leading scholars from around the world introduce and discuss the core theoretical and methodological bases of grammaticalization report on work in the field and point to promising directions for new research They represent every relevant theoretical perspective and approach Research on grammaticalization and its role in linguistic change encompasses work on languages from every major linguistic family Its results offer valuable insights for all theoretical frameworks including generative construction and cognitive grammar and relates to work in fields such as phonology sociolinguistics and language acquisition The handbook provides a full critical assessment of every aspect of this research It is divided into five parts of which the first two are devoted to theory and method the third and fourth to work in linguistic domains classes and categories and the fifth to case studies of grammaticalization in a range of languages It will be an indispensable source of information and inspiration for all those who wish to know more about this fascinating and important field Handbook of Cognitive Linguistics and Second Language Acquisition Peter Robinson, Nick C. Ellis, 2008-03-29 This cutting edge volume describes the implications of Cognitive Linguistics for the study of second language acquisition SLA The first two sections identify theoretical and empirical strands of Cognitive Linguistics presenting them as a coherent whole The third section discusses the relevance of Cognitive Linguistics to SLA and defines a research agenda linking these fields with implications for language instruction Its comprehensive range and tutorial style chapters make this handbook a valuable resource for students and researchers alike **Modality in Contact** Carmelo Alessandro Basile, 2024-09-02 This book explores the evolution of modal constructions of necessity and obligation in New Englishes Focusing on Singapore English analysis of corpus data reveals lower levels of grammaticalization compared to its lexifier British English This trend is explained through the lenses of a pan stratist model which considers a spectrum of forces

influencing the dynamics of contact On the one hand cognitive mechanisms seem to favour the selection of less grammaticalized and more transparent variants from the lexifier On the other hand the substrate is positioned as a background force actively contributing to the selection of new material to address functional gaps in the system

*Grammaticalization* Paul J. Hopper, Elizabeth Closs Traugott, 2003-07-31 This is a general introduction to grammaticalization the change whereby lexical terms and constructions come in certain linguistic contexts to serve grammatical functions and once grammaticalized continue to develop new grammatical functions The authors synthesize work from several areas of linguistics The second edition has been thoroughly revised with substantial updates on theoretical and methodological issues that have arisen in the decade since the first edition and includes a significantly expanded bibliography Particular attention is paid to recent debates over directionality in change and the role of grammaticalization in creolization
