The Role of Member States in the European Union Stephanie Rada, 1995

The State of the European Union Vol. 7 Nicolas Jabko, Craig Parsons, 2005-08-04 Twenty first century Europeans are suddenly confronting new choices about their place in the world The most immediate challenges reflect tensions in the transatlantic partnership long the keystone of European worldviews In the Iraqi conflict President Bush posed a blunt general question to the world Are you with us or against us and much of Europe chose the latter More than at any time since 1945 Europeans are uncertain about the future of transatlantic cooperation Internal European developments combine with this external shift to create the impression of a continental turning point The fifty year project of the European Union is entering a new phase The Single Market program and monetary union realized the most ambitious visions of the EU's founding fathers Most thinking about further integration is exceedingly vague Simultaneous EU enlargement to the east and beyond to Turkey may create opportunities to reopen the Union's basic bargains This book proposes to help students and scholars understand the many trends of change that have brought Europe to these crossroads Its approach is novel in two ways First most similar

scholarship either seeks a single grand theory of European change or implies that European politics is too complex to map change broadly This book takes a middle ground position positing several distinct mechanisms of change and tracing them across policies and institutional settings Second it uses the United States as a reference point to chart European change The aim is not comparative the focus remains on Europe but the volume maps out EU trends against American policy positions and institutional patterns thus providing a useful comparative anchor for complex patterns This is the seventh volume in the biennial series State of the European Union launched in 1991 and produced under the auspices of the European Union Studies Association EUSA

The European Union Walter van Gerven, 2005-03-21 This book provides a general introduction to the European Union EU as an ever closer union of states and peoples It describes how from its origin in 1958 as an economic community of six states the EU has grown into a political entity of 25 states with a population of more than 450 million It also explains the constitution making process that is currently taking place with a draft constitution now being submitted for ratification by the 25 member states The book shows how the distinctive features of a democratic polity that characterize the separate EU member states are gradually replicated in the European Union and how the Union is on its way to becoming a democratic polity of its own kind Van Gerven writes from a legal perspective with an eye to political theory and recent American and European history and with a diverse readership from both sides of the Atlantic in mind
