Membranemembrane Interactions:

Cell and Model Membrane Interactions S. Ohki, 2012-12-06 Membrane interaction is a large research area involving various disciplines A symposium entitled Cell and Model Membrane Interactions which took place in Boston MA during the 155th American Chemical Society Meeting April 25 1990 focused on membrane adhesion and fusion The topics were explored in studies involving lipids virus envelopes and cell membranes Especially discussed were the roles of polymers lipids and proteins on these membrane interactions Fusion of membrane is an important molecular event which plays a pivotal role in many dynamic cellular processes such as exocytosis endocytosis membrane genesis viral infection processes etc The process includes adhesion of the membranes fusion and finally reorganization of the components of the two membranes The basic notion shared during the symposium was that membrane hydrophobicity especially local membrane hydrophobicity is one of the important factors contributing to membrane fusion Most of the papers are collected here and they are arranged approximately in the same order as they were presented at the symposium These papers are the most up to date and representative work at the forefront in each membrane interaction field I sincerely hope the reader will gain further understanding on membrane interactions especially membrane and vesicle fusion phenomena through this symposium proceedings volume

Seydel, Michael Wiese, 2009-07-10 Barrier reservoir target site those are but some of the possible functions of biological lipid membranes in the complex interplay of drugs with the organism A detailed knowledge of lipid membranes and of the various modes of drug membrane interaction is therefore the prerequisite for a better understanding of drug action Many of today's pharmaceuticals are amphiphilic or catamphiphilic enabling them to interact with biological membranes Crucial membrane properties are surveyed and techniques to elucidate drug membrane interactions presented including computer aided predictions Effects of membrane interaction on drug action and drug distribution are discussed and numerous examples are given This unique reference volume builds on the authors long experience in the study of drug membrane interaction Recommended reading for everyone involved in pharmaceutical research

Membrane Protein - Lipid Interactions: Physics and Chemistry in the Bilayer Jordi H. Borrell, Òscar Domènech, Kevin M.W. Keough, 2016-03-15 This book has been conceived as a brief introduction to biomembranes physical chemistry for undergraduate students of sciences and it is particularly dedicated to the lipid protein membrane interactions A general introduction is presented in Chapters 1 and 2 The following Chapters 3 and 4 describe the most accepted theories on lipid membrane protein interactions as well as the new experimental approaches in particular these arose from nano sciences as atomic force microscopy and single molecule force spectroscopy The book emphasizes the relevance of physical parameters as the lateral surface pressure and the lipid curvature as actors for understanding the physicochemical properties of the biomembranes
