What Is the Present? Michael North, 2025-06-17 A provocative new look at concepts of the present their connection to ideas about time and their effect on literature art and culture The problem of the present what it is and what it means is one that has vexed generations of thinkers and artists Because modernity places so much value on the present many critics argue that people today spend far too much time in the here and now but how can we tell without first knowing what the here and now actually is What Is the Present takes a provocative new look at this moment in time that remains a mystery even though it is always with us Michael North tackles puzzles that have preoccupied philosophy neuroscience psychology history and aesthetic theory and examines the complex role of the present in painting fiction and film He engages with a range of thinkers from Aristotle and Augustine to William James and Henri Bergson He draws illuminating examples from artists such as Fra Angelico and Richard McGuire filmmakers like D W Griffith and Christopher Nolan and novelists such as Elizabeth Bowen and Willa Cather North offers a critical analysis of previous models of the present from the experiential present to the historical period we call the contemporary He argues that the present is not a cosmological or experiential fact but a metaphor a figurative relationship with the whole of time Presenting an entirely new conception of the temporal mystery Georg Lukacs called the unexplained instant What Is the Present explores how the arts have traditionally represented the present and also how artists have offered radical alternatives to that tradition Know Your Aptitude for Class 9 (A.Y. 2023-24) Onward J. Corlett,2019-06-27 Tropical East Asia is home to over one billion people and faces massive human impacts from its rising population and rapid economic growth It has already lost more than half of its forest cover to agriculture and urbanization and has the highest rates of deforestation and logging in the tropics Habitat loss coupled with hunting and the relentless trade in wildlife products threatens all its large and many of its smaller vertebrates Despite these problems the region still supports an estimated 15 25% of global terrestrial biodiversity and a growing environmental awareness means that it is no longer assumed that economic development justifies environmental damage and no longer accepted that this trade off is inevitable Effective conservation action now depends on integrating a clear understanding of the ecological patterns and processes in the region with the varied needs of its human population This third edition continues to provide an overview of the terrestrial ecology of Tropical East Asia from southern China to Indonesia and from Bhutan and Bangladesh to the Ryukyu Islands of Japan It retains the balance between compactness and comprehensiveness of the previous editions and the even handed geographical treatment of the whole region but it updates both the contents and the perspective Approximately one third of the text is new or greatly modified reflecting the explosion of new research in the region in the last few years and the increasing use of new tools particularly from genomics and remote sensing The change in perspective largely reflects the growing realization that we are in a new epoch the Anthropocene in which human activities have at least as large an influence as natural processes and that stopping or reversing ecological change is no longer an option This does not mean that biodiversity conservation is no longer possible or worthwhile but that the biodiverse future we strive for will inevitably be very different from the past The Ecology of Tropical East Asia is an advanced textbook suitable for senior undergraduate and graduate level students taking courses on the terrestrial ecology of the East Asian tropics as well as an authoritative regional reference for professional ecologists conservationists and interested amateurs worldwide *Security and Privacy in Smart Sensor Networks* Maleh, Yassine,Ezzati, Abdellah,Belaissaoui, Mustapha,2018-05-09 Security and privacy protection within computer networks can be a challenge By examining the current problems and challenges this domain is facing more efficient strategies can be established to safeguard personal information against invasive pressures Security and Privacy in Smart Sensor Networks is a critical scholarly resource that examines recent developments and emerging trends in smart sensor security and privacy by providing new models practical solutions and technological advances related to security Featuring coverage on a broad range of topics such as cloud security encryption and intrusion detection systems this book is geared towards academicians engineers IT specialists researchers and students seeking current research on authentication and intrusion detection Annual Report of the Chamber of Commerce of the State of New York, for the Year ...
