Presenting Science To The Public:

Presenting Science to the Public Barbara Gastel, 1983 Abstract A text for science professionals prepared by a physician who has specialized in scientific communication presents practical guidelines for conveying abstruse difficult or highly technical information to nontechnical audiences The text sets out the basic principles of communication and illustrates these principles from the author's personal experiences The material is organized into 2 principal parts the first deals with presenting science through the mass media the second considers presenting science directly to the public General principles for communicating science to the public also are discussed wz **Communicating Science to the Public** Leo Tan Wee Hin, R. Subramaniam, 2014-07-24 This book explores effective approaches for communicating science to the public in developing countries Offering multiple perspectives on this important topic it features 17 chapters that represent the efforts of 23 authors from eight countries Australia Bangladesh India Ireland New Zealand USA Singapore and South Africa Inside readers will find a diversity of approaches to communicate science to the public The book also highlights some of the challenges that science communicators science policy makers science teachers university academics in the sciences and even entrepreneurs may face in their attempts to boost science literacy levels in their countries In addition it shares several best practices from the developed world that may help readers create communication initiatives that can lead to increased engagement with science in communities in the Asia Pacific region and beyond Given the pervasive influence of science and technology in today's society their impact will only increase in the years to come as the world becomes more globalized and the economies of countries become more inter linked This book will be a useful source of reference for developing countries looking to tap into the potential of science for nation building and effectively engage their communities to better understand science and technology Supported by the Pacific Science Association Hawaii Presented Discourse in Popular Science Olga Pilkington, 2018-07-03 In Presented Discourse in Popular Science Olga A Pilkington explores the forms and functions of the voices of scientists in books written for non professionals This study confirms the importance of considering presentation of discourse outside of literary fiction popular science uses presented discourse in ways uncommon for fiction yet not conventional for non fiction either This analysis is an acknowledgement of the social consequences of popularization Discourse presentation of scientists reconstructs the world of the scientific community as a human space but also projects back into it an image of the scientist the public wants to see At the same time Pilkington's findings strengthen the view of popularization that rejects the notion of a strict divide between professional and popular science Creating Connections David Chittenden, Graham Farmelo, Bruce V. Lewenstein, 2004-05-17 Science museums are in the business of making science accessible to the public a public constantly bombarded with new information and research results How the public understands this information will affect what they expect and take away from a museum's exhibits and programs Creating Connections looks at the public understanding of research PUR and how it affects what science museums do What are the

opportunities and critical issues in PUR What strategies are working and what are some pitfalls What can be learned from the media's experiences with PUR Creating Connections will be an invaluable resource for science museum professionals who want to guide their institutions and their visitors toward a new understanding of and appreciation for current research
