Campaign Talk Roderick P. Hart, 2009-07-01 Roderick Hart may be among the few Americans who believe that what politicians say in a campaign actually matters He also believes that campaigns work Even as television coverage political ads and opinion polls turn elections into field days for marketing professionals Hart argues convincingly that campaigns do play their role in sustaining democracy mainly because they bring about a dialogue among candidates the press and the people Here he takes a close look at the exchange of ideas through language used in campaign speeches political advertising public debates print and broadcast news and a wide variety of letters to the editor In each case the participants choose their words differently and this according to Hart can be a frustrating challenge to anyone trying to make sense of the issues Yet he finds that the process is good for Americans campaigns inform us about issues sensitize us to the concerns of others and either encourage us to vote or at least heighten our sense of the political world Hart comes to his conclusions by using DICTION a computer program that has enabled him to unearth substantive data such as the many subtle shifts found in political language over the past fifty years This approach yields a rich variety of insights including empirically based explanations of impressions created by political candidates For example in 1996 Bill Clinton successfully connected with voters by using

many human interest words you us people family Bob Dole however alienated the public and even undermined his own claims of optimism by using an abundance of denial words can t shouldn t couldn t Hart also tracks issue buzzwords such as Medicare to show how candidates and voters define and readjust their positions throughout the campaign dialogue In the midst of today s increased media hype surrounding elections Americans and the candidates they elect do seem to be listening to each other as much as they did in years gone by Hart s wide ranging objective investigation upends many of our stereotypes about political life and presents a new more bracing understanding of contemporary electoral behavior

Presidential Communication and Character Stephen Farnsworth, 2018-03-09 This book traces the evolution of White House news management during America s changing media environment over the past two decades Comparing and contrasting the communication strategies of Bill Clinton George W Bush Barack Obama and Donald Trump it demonstrates the difficulty that all presidents have in controlling their messages despite a seemingly endless array of new media outlets and the great advantages of the office That difficulty is compounded by new media s amplification of presidential character traits for good or ill Facebook Twitter and YouTube notwithstanding presidential power still resides in the power to persuade and that task remains a steep challenge More than ever presidential character matters and the media presidents now employ report on the messenger as much as the message The book also looks at the media strategies of candidates during the 2016 presidential campaign puts presidential media use in global context and covers the early phase of the Trump administration the first true Twitter presidency

A Functional Analysis of Political Television Advertisements William L. Benoit, 2014-04-01 A Functional Analysis of Political Television Advertisements examines theory and research on election advertisements William Benoit employs the Functional Theory of Political Campaign Discourse to understand the nature or content of television spots in election campaigns Beginning with a look at American presidential spots from 1952 2012 Benoit investigates the three functions acclaims attacks and defenses and the topics of policy and character for these groups of political commercials The following chapters are devoted to reporting similar data on presidential primary advertisements presidential third party spots other theories including Issue Ownership Theory and Functional Federalism Theory as well as nonpresidential and non U S election advertising Benoit considers the data discusses the development of political advertising over time and finally presents areas for further research This book is a uniquely comprehensive examination of the value and use of television spots in political election rhetoric

Woman President Kristina Horn Sheeler, Karrin Vasby Anderson, 2013-08-08 What elements of American political and rhetorical culture block the imagining and thus the electing of a woman as president Examining both major party and third party campaigns by women including the 2008 campaigns of Hillary Clinton and Sarah Palin the authors of *Woman President Confronting Postfeminist Political Culture* identify the factors that limit electoral possibilities for women Pundits have been predicting women s political ascendancy for years And yet although the 2008 presidential campaign featured Hillary Clinton as an early frontrunner for the Democratic presidential nomination and Sarah Palin as the first female Republican vice presidential nominee no woman has yet held either of the top two offices The reasons for this are complex and varied but the authors assert that the question certainly encompasses more than the shortcomings of women candidates or the demands of the particular political moment Instead the authors identify a pernicious backlash against women presidential candidates one that is expressed in both political and popular culture In *Woman President Confronting Postfeminist Political Culture* Kristina Horn Sheeler and Karrin Vasby Anderson provide a discussion of US presidentiality as a unique rhetorical role Within that framework they review women s historical and contemporary presidential bids placing special emphasis on the 2008 campaign They also consider how presidentiality is framed in candidate oratory campaign journalism film and television digital media and political parody
