## **Presidential Power In 5th Republic France:**

**Presidential Power in Fifth Republic France** David Scott Bell, 2000-08 The French Fifth Republic Presidency has emerged as one of the most powerful executives in western society This book is a study of how the power of the Presidency was created and maintained It investigates the political skills of the office holders and the way in which the coalition supporting the Presidency has been brought together and sustained and how it has been on occasion lost The book's analysis of leadership in the Fifth Republic draws out the skills and manipulation of the successive presidents as well as the resources of the cultural and political contexts Amongst the topics considered as part of the presidential system are the Constitutions the referendum foreign policy Europe May 68 Giscard d'Estaing's centrist septennate cohabitation and neo gaullism These issues are treated as crucial elements in Presidential power and help to illustrate the foundations of Presidential authority The main contention is that the presidency has been created and sustained by political acts of a high order which have involved the mobilization of certain symbols culture and political forces *The Presidents of the French Fifth Republic* D. Bell, J. Gaffney, 2013-01-29 In the French Republic political leadership is normally provided by the presidency albeit from a very narrow constitutional base This volume examines the strengths and weaknesses of that leadership as well as the way that executive power has been established in the republican context **Fascism, Populism and the French Fifth**

**Republic** Catherine Fieschi, 2004-09-04 How can a nation associated with the Declaration of the Rights of Man serve as the context for a successful populist party of the far right This book explains how since the late 1950s French institutions have provided the Front National with ways in which to permeate national politics **The Presidentialization of Politics**

Thomas Poguntke, Paul Webb, 2007-04-27 The Presidentialization of Politics shows that the politics of democratic societies is moving towards a presidentialized working mode even in the absence of formal institutional changes These developments can be explained by a combination of long term structural changes in modern politics and societies contingent factors which fluctuate over time While these contingent short term factors relate to the personalities of office holders the overall political agenda and the majority situation in parliament there are several structural factors which are relatively uniform across modern nations First the internationalization of modern politics which is particularly pronounced within the European Union has led to an executive bias of the political process which has strengthened the role of political top elites vis vis their parliamentary groups and or their parties Their predominance has been amplified further by the vastly expanded steering capacities of state machineries which have severely reduced the scope of effective parliamentary control At the same time the declining stability of political alignments has increased the proportion of citizens whose voting decisions are not constrained by long standing party loyalties In conjunction with the mediatization of politics this has increased the capacity of political leaders to by pass their party machines and to appeal directly to voters As a result three interrelated processes have led to a political process increasingly moulded by the inherent logic of presidentialism increasing leadership power and

autonomy within the political executive increasing leadership power and autonomy within political parties and increasingly leadership centred electoral processes The book presents evidence for this process of presidentialization for 14 modern democracies including the US and Canada While there are substantial cross national differences the overall thesis holds modern democracies are increasingly following a presidential logic of governance through which leadership is becoming more central and more powerful but also increasingly dependent on successful immediate appeal to the mass public Implications for democratic theory are considered      Presidential Power in Russia Eugene Huskey,2016-09-16 This is the first major assessment of the role of the presidency in Russia s difficult transition from communist rule Huskey analyzes the establishment and functioning of the Russian presidency as an institution and in relation to the other leading institutions of state the government parliament courts and regional authorities Although this is not a biography of the first president Boris Yeltsin his allies and his rivals loom large in the study of a critical phase in the creation of a new Russian political system

*Regional Accountability and Executive Power in Europe* Marcel Morabito,Guillaume Tusseau,2024-04-09 This book discusses the major issues currently affecting the accountability of executive power in Europe The work is divided into three parts The first examines the territorial dimension including unitary regional and federal It discusses how territorial actors participate in strengthening or weakening the implementation of accountability of executive power in modern democratic States The second part explores the links between national traditions and European accountability of executive power to establish a common European culture The third and final part focuses on how to build a truly multidisciplinary approach to accountability of executive power and draws on legal historical and political approaches The volume will be an invaluable resource for researchers academics and policy makers in constitutional law and politics public law comparative law legal history and government      **Delegation and Accountability in Parliamentary Democracies** Kaare Strøm,Torbjörn Bergman,Wolfgang C. Müller,2006-01-19 Comparative Politics is a series for students and teachers of political science that deals with contemporary issues in comparative government and politics The General Editors are Max Kaase Professor of Political Science Vice President and Dean School of Humanities and Social Science International University Bremen Germany and Kenneth Newton Professor of Comparative Politics University of Southampton The series is published in association with the European Consortium for Political Research Today parliamentarism is the most common form of democratic government Yet knowledge of this regime type has been incomplete and often unsystematic Delegation and Accountability in Parliamentary Democracies offers new conceptual clarity on the topic This book argues that representative democracies can be understood as chains of delegation and accountability between citizens and politicians Under parliamentary democracy this chain of delegation is simple but also long and indirect Principal agent theory helps us to understand the perils of democratic delegation which include the problems of adverse selection and moral hazard Citizens in democratic states therefore need institutional mechanisms by which they can control their representatives The most important such control

mechanisms are on the one hand political parties and on the other external constraints such as courts central banks referendums and supranational institutions such as those of the European Union Traditionally parliamentary democracies have relied heavily on political parties and presidential systems more on external constraints This new empirical investigation includes all seventeen West European parliamentary democracies These countries are compared in a series of cross national tables and figures and seventeen country chapters provide a wealth of information on four discrete stages in the delegation process delegation from voters to parliamentary representatives delegation from parliament to the prime minister and cabinet delegation within the cabinet and delegation from cabinet ministers to civil servants Each chapter illustrates how political parties serve as bonding instruments which align incentives and permit citizen control of the policy process This is complemented by a consideration of external constraints The concluding chapters go on to consider how well the problems of delegation and accountability are solved in these countries They show that political systems with cohesive and competitive parties and strong mechanisms of external constraint solve their democratic agency problems better than countries with weaker control mechanisms But in many countries political parties are now weakening and parliamentary systems face new democratic challenges *Delegation and Accountability in Parliamentary Democracies* provides an unprecedented guide to contemporary European parliamentary democracies As democratic governance is transformed at the dawn of the twenty first century it illustrates the important challenges faced by the parliamentary democracies of Western Europe

*Foreign Policy in Comparative Perspective* Ryan K. Beasley, Juliet Kaarbo, Jeffrey S. Lantis, Michael T. Snarr, 2012-04-25 Widely regarded as the most comprehensive comparative foreign policy text *Foreign Policy in Comparative Perspective* has been completely updated in this much anticipated second edition Exploring the foreign policies of thirteen nations both major and emerging players and representing all regions of the world chapter authors link the study of international relations to domestic politics while treating each nation according to individual histories and contemporary dilemmas The book's accessible theoretical framework is designed to enable comparative analysis helping students discern patterns to understand why a state acts as it does in foreign affairs

*The Government and Politics of France* Andrew Knapp, Vincent Wright, 2006-09-27 *The Government and Politics of France* has been the leading textbook on French politics for over a generation and continues to provide students with a comprehensive and incisive introduction to the intricacies of French politics and government This edition updates every chapter with the addition of a new chapter on France and Europe Recent events necessitate a new edition particularly the 2002 elections and the growing interpenetration of France and the EU in student programmes as well as in the real world Whether covering the shifting balance within France's two headed executive the paradoxes of the French party politics the power and fragmentation of France's administration the growing assertiveness of French local government or the newly visible world of the judiciary *The Government and Politics of France* has always sought to confront established paradigms with the complex and untidy reality of French politics at the grass roots

**Democracy, social resources and political power in the European Union** Niilo Kauppi, 2018-02-28 In this book Kauppi develops a structural constructivist theory of the European Union and critically analyses through French and Finnish empirical cases the political practices that maintain the Union's democratic deficit Kauppi conceptualises the European Union as both an arena for political contention and a nascent political order In this evolving multi levelled European political field individuals and groups construct material and symbolic structures of political power grounded in a variety of social resources such as nationality culture and gender The author shows how the dominance of both executive political resources and domestic political cultures has prevented the development of European democracy Supranational executive networks have become more autonomous reinforcing the dominance of the resources they control At the same time national political cultures condition the political status of elected institutions such as the European parliament The book is particularly suited for undergraduate and graduate students in the fields of European Politics European Union Studies and International Relations

***Counterterrorism and the State*** Dorle Hellmuth, 2015-09-10 Dorle Hellmuth argues that the nature of state responses to terrorism is shaped by the particular governmental framework and process within which counterterrorism measures are decided Using four Western democracies as case studies Hellmuth measures effects of government structures on counterterrorism decision making processes and outcomes In doing so she examines how similar or different the responses have been in four parliamentary and presidential systems and clears up common misperceptions about domestic counterterrorism efforts on both sides of the Atlantic Each of Hellmuth's four case studies reviews the official constitutional powers and informal relationships between executive and legislative branches outlines decision making processes leading to counterterrorism policies and reforms since 9 11 and summarizes how structural factors influenced those processes By measuring and comparing structural effects and by going beyond the common U S and British focus to include counterterrorism decision making in Germany and France Hellmuth shows that there are important similarities between those governments designed to constrain executive power Germany and the United States and those that facilitate executive power France and Great Britain Her analysis further demonstrates that in presidential systems executive and legislative branches have incentives to produce a steady stream of reforms that presidents have more opportunities than leaders of parliamentary systems to expand their unilateral powers during times of crisis and that choices designed to strengthen presidential positions influence the direction nature and scope of institutional reform Understanding the nature scope and trends of national decision making processes in Western democracies Hellmuth contends is imperative to identifying new mechanisms for containing transnational terrorist networks beyond national borders

**Cabinets in Western Europe** Jean Blondel, Ferdinand Muller-Rommel, 1988-11-25 A presentation of the structure and workings of the national cabinets in Western European countries today based on a common framework which enables the reader to compare their origins structure composition and activities Emphasis is placed on the leadership and on the character of coalitions
