Preventing Child Maltreatment Through Social Support:

Preventing Child Maltreatment Through Social Support Ross A. Thompson, 1995-08-25 Ross A Thompson's social policy expertise illuminates the limitations of formulating a child protection policy agenda on current research without concern for the specific populations to be served Thompson details an ambitious agenda for child welfare reform by calling for a multistrategy approach with specific reference to the 1990 proposals of the U S Advisory Board on Child Abuse and Neglect with which he has been intimately connected This masterful work weaves together theory and application about how to prevent child maltreatment Good references Upper division undergraduates and above Choice Recently there has been considerable interest in providing social support to abuse prone families as a means of preventing child abuse and neglect Partly due to both reports that social support programs can indeed help parents and the theoretical underpinnings of these programs social support has become the cause celebre among those who are seeking more effective new avenues to abuse prevention However many important issues must be considered in translating this general idea into effective public policy initiatives related to abuse prevention *Preventing Child Maltreatment Through Social Support* carefully considers the various factors affecting the success of social support programs and provides the path to designing effective and enduring interventions Offering the reader a critical analysis of current research concerning social networks and functions of social support this perceptive book fosters an understanding of maltreatment socially isolated families and the dynamics of help giving and receiving Ross A Thompson moves deftly from theory to practice including detailed lessons from applications such as home visitation and other intensive family strategies This volume stimulates thinking about integrating research policy and practice and in a progressive move envisions social support within the larger context of child welfare reform Dedicated to making social support programs theoretically grounded and thus able to withstand the rigor of application this book provides a much needed resource to practitioners researchers and students in social work family studies nursing public health and clinical and counseling psychology as well as educators and policy makers I am very impressed with *Preventing Child Maltreatment Through Social Support* I think Ross A Thompson has tackled a complex and important subject producing a book that both practitioners and policymakers will find useful in their efforts to construct more effective programs to prevent child abuse This book fills a unique gap in the child abuse prevention literature Deborah Daro Director Center on Child Abuse Prevention Research Chicago This book provides a coherent road map to the role of social support in dealing with the problem of child maltreatment It is well researched and well thought out in every respect *Preventing Child Maltreatment Through Social Support* is well digested intellectually It covers the material in detail but is not overcome by detail James Garbarino Director Family Life Development Center Cornell University *Preventing Child Maltreatment* Kenneth A. Dodge, Doriane Lambelet Coleman, 2009-06-18 Many child abuse prevention programs have targeted factors within the family such as parenting skills This book describes the next wave of prevention the promotion of safer healthier

childrearing environments in entire communities The contributors are leading authorities who illuminate how contextual factors including poverty chaotic neighborhoods and lack of social supports combine with family factors to place children at risk for maltreatment They present a range of exemplary programs designed to strengthen communities while also helping individual parents to meet their children s needs Real world evaluation approaches quality control strategies and policy implications are discussed in depth Stopping Child Maltreatment Before it Starts Neil B. Guterman,2001 Early prevention of child maltreatment is most commonly delivered through home visitation services with the goal of promoting a positive start in parenting to avert potential child abuse and neglect Stopping Child Maltreatment Before It Starts introduces best practice principles for early home visiting examining the contexts from which these strategies arise Beginning with a discussion of the nature and etiology of physical child abuse and neglect Guterman then examines the mechanisms by which child protective and early home visitation services have traditionally operated The book explores best practice principles by providing a detailed inside tour of those practices that have been empirically linked with positive outcomes in serviced families Guterman also discusses in detail ways how home visitation may more adequately address the problem of family substance abuse in reducing child maltreatment risk and ways visitation can attend to social network and community influences and increase parent empowerment An essential text for child welfare courses Stopping Child Maltreatment Before It Starts will also appeal to practitioners and policy makers in the child abuse and neglect field **Developmental Psychopathology, Volume 3** Dante Cicchetti,Donald J. Child Development Laura Berk, 2015-05-20 Child Development

Neglected

Children Howard Dubowitz, 1999-01-20 Child neglect is the most common type of child maltreatment. Substantial evidence indicates that the morbidity and mortality associated with neglect are significant with enormous costs to the children involved and to society. Yet there is no major text focused exclusively on child neglect. *Neglected Children* presents a comprehensive and critical portrait of the phenomenon of neglect based on theory, research, and clinical practice experience. The editor and the contributing authors present a rich interdisciplinary conceptualization with a broad view of neglect moving far beyond the current child welfare focus on parental omissions in care. This broader view is essential to seriously addressing the complex and pervasive underpinnings of neglect.
