Preventing Cardiovascular Disease In Europe:

Preventing Cardiovascular Disease in Europe Jeanette Longfield, Mike Rayner, 1993 How are our European neighbours addressing the growing incidence of cardiovascular disease What can we learn from them This survey of cardiovascular prevention in Europe gives an overview of activities being undertaken across the whole of the region It uncovers many examples of good practice and provides information to enable a sharing of knowledge and influence decision making at local national and international levels

Preventing Cardiovascular Disease in Europe, 1993

Preventing Cardiovascular Disease in Primary Care Clive Handler, Gerry Coghlan, 2018-04-19 Cardiovascular disease is the leading cause of death and disability in the world It is largely preventable and can certainly be delayed by attention to established risk factors Primary care is the natural and most appropriate location for cardiovascular prevention This accessible and practical reference and everyday manual covers the organisation of prevention services estimating risk and using guidelines and examines each key area with extensive use of clinical case studies It provides the information necessary to answer the concerns of patients on areas such as cholesterol diet exercise alcohol smoking and medication General practitioners practice nurses physiotherapists dieticians and pharmacists will find this book to be an essential aid to their daily work

Prevention of Cardiovascular Diseases Jadelson Andrade, Fausto Pinto, Donna Arnett, 2015-08-28 The present book reveals the importance of preventive medicine in cardiology and public health addressing the lack of a broad discussion of this topic in the current literature It examines the most important risk factors for different cardiovascular diseases discussing them in detail from a clinical standpoint and presenting important information from a preventive medicine perspective Further specific chapters discuss the burden of cardiologic risk factors in special contexts such as in women child and adolescents and in low income populations Lastly a number of conditions that are often overlooked in terms of their cardiological impact are discussed such as Chagas disease rheumatic cardiomyopathy and post traumatic stress disorder Cardiovascular diseases are still the major cause of death in the world even though they are considered preventable clinical conditions The increased prevalence of some risk factors for cardiovascular diseases is an important concern for cardiologists around the world On the other hand primary prevention programs have proven their efficacy concerning some known and treatable risk factors such as with hypercholesterolemia hypertension diabetes and smoking but still need to be made more of a priority in public health Prevention of Cardiovascular Diseases is a book intended for multi disciplinary audience and aimed for all professionals who are willing to face the challenge of cardiovascular prevention

Epidemiology and Prevention of Cardiovascular Diseases Darwin Labarthe, 2011 Epidemiology and Prevention of Cardiovascular Disease A Global Challenge Second Edition provides an in depth examination of epidemiologic research and prevention measures for the full range of cardiovascular diseases CVD This authoritative text on the world s leading causes of death describes in detail the nature of atherosclerotic and hypertensive diseases including their determinants prevention and control as well as

policies for intervention in community and clinical settings This Second Edition is fully updated more extensively referenced and expanded to include new information about the public health dimensions of CVD prevention exploring the basis of public health decisions and the process by which decision making bodies develop guidelines and recommendations Epidemiology and Prevention of Cardiovascular Diseases A Global Challenge Second Edition is the essential text for any student or practitioner concerned with global cardiovascular health
