Flying in the Face of Criminalization Sofia Michaelides-Mateou, Andreas Mateou, 2016-04-15 Two parallel investigations take place after every aviation accident one technical one judicial The former must be conducted with the sole intention of making safety recommendations to prevent the recurrence of similar accidents The judicial investigation however has the intention of identifying those parties that have been at fault and to apportion blameworthiness for criminal and civil liability Consequently this results in a predicament for those parties that have been identified as having played a role in the accident a dilemma between not supplying information aimed at enhancing safety and preventing future accidents and on the other hand supplying such information which may possibly be used against them in subsequent criminal prosecution The situation is compounded by inconsistent approaches between different legal systems aviation professionals may find themselves faced with criminal charges in one country but not in another and they may also be unsure as to whether statements given during the technical investigation could be used against them in a court of law Aviation safety is to a large extent built upon the trust placed by pilots ATCOs and other aviation professionals in the process of accident investigation This book examines the growing trend to criminalize these same people following an accident investigation and considers the implications this has for aviation safety

User Behavior and Technology Development Peter-Paul Verbeek, Adriaan Slob, 2006-10-11 Environmental policy has long been determined by a dichotomy between technology and behavior Some approaches stress the importance of technology and technological innovation while others focus on behavioral change Each approach has its limitations however since technology and behavior often appear so closely intertwined Human behavior results not only from intentions and deliberate decisions but also from its interaction with technological artifacts In the area of traffic safety for instance people's driving behavior is determined as much by curves speed bumps and the power of their motors as by considerations of safety and responsibility How can we best describe and understand these interactions between behavior and technology What conceptual frameworks and empirical studies are available and how can they be

integrated And how can we bring these interactions to bear on product design and policy making The book User Behavior and Technology Development explores these relationships between technology and behavior from an interdisciplinary perspective This includes contributions from cognitive psychology industrial design public administration marketing sociology ergonomics science and technology studies and philosophy The book aims to create a conceptual basis for analyzing interactions between technology and behavior and to provide insights that are relevant to technology design and environmental policy

Offshore Risk Assessment Vol. 2 Jan-Erik Vinnem, Willy Røed, 2019-09-11 This is the first textbook to address quantified risk assessment QRA as specifically applied to offshore installations and operations As the second part of the two volume updated and expanded fourth edition it adds a new focus on the recent development of Normally Unattended Installations NUIs which are essentially autonomous installations that combine digitalization big data drones and machine learning and can be supported by W2W walk to work vessels These minimalistic installations with no helideck and very limited safety systems will require a new approach to risk assessment and emergency planning especially during manned periods involving W2W vessels Separate chapters analyse the main hazards for offshore structures fire explosion collision and falling objects as well as structural and marine hazards The book explores possible simplifications of risk assessment for traditional manned installations Risk mitigation and control are also discussed as well as how the results of quantitative risk assessment studies should be presented In closing the book provides an updated approach to environmental risk assessment The book offers a comprehensive reference guide for academics and students of marine offshore risk assessment and management It will also be of interest to professionals in the industry as well as contractors suppliers consultants and regulatory authorities
