Preventive Psychiatry G. N. Christodoulou, V. Kontaxakis, 1994-08-23 *Unmet Need in Psychiatry* Gavin Andrews, Scott Henderson, 2000-01-06 This book considers ways to resolve the imbalance between the demand and supply of mental health services Treatment services in most countries reach only a minority of people identified as suffering from a mental disorder Few countries can provide adequate health services for all the mentally ill yet none has developed a rational system to decide who should be treated The questions are clear Could we develop a staged treatment process to reach all in need If not how do we decide who to treat What should the criteria be for deployment of scarce treatment resources How do we determine such criteria What are the ethical implications of applying such criteria In this pioneering work an international team of eminent psychiatrists epidemiologists health administrators economists and health planners examine these questions The result will inform and encourage all concerned with the equitable provision of mental health care **Youth Mental Health**
