and Regulation of Commercial Mining of Minerals in Outer Space Ricky Lee, 2012-03-05 This monograph addresses the legal and policy issues relating to the commercial exploitation of natural resources in outer space It begins by establishing the economic necessity and technical feasibility of space mining today an estimate of the financial commitments required followed by a risk analysis of a commercial mining venture in space identifying the economic and legal risks This leads to the recognition that the legal risks must be minimised to enable such projects to be financed This is followed by a discussion of the principles of international space law particularly dealing with state responsibility and international liability as well as some of the issues arising from space mining activities Much detail is devoted to the analysis of the content of the common heritage of mankind doctrine The monograph then attempts to balance such interests in creating a legal and policy compromise to create a new regulatory regime

Public Private Partnerships in Education Susan Robertson, Karen Mundy, Antoni Verger, 2012-01-01 Far from simply being a form of cost sharing between the state and the market PPP has been celebrated by some and condemned by others as the champion of change in the new millennium This book has been written by the best minds in education policy political economy and development studies They convincingly argue that public private partnership represents a new mode of governance that ranges from covert support of the private sector vouchers subsidies to overt collaboration with corporate actors in the rapidly growing education industry The analyses are simply brilliant and indispensable for understanding how and why this particular best worst practice went global Gita Steiner Khamsi Columbia University New York US This insightful book brings together both academics and researchers from a variety of international organizations and aid agencies to explore the complexities of public private partnerships PPPs as a resurgent hybrid mode of educational governance that operates across scales from the community to the global The contributors expertly study the different types of partnership arrangements and thoroughly critique the value of PPPs Some chapters explore how PPPs as a policy idea have been constructed in transnational agendas for educational development and circulated globally whilst other chapters explores the role and implications of PPPs in developing countries providing arguments for and against an expanding reliance on PPPs in national educational systems The theoretical framing of the book draws upon leading theories of international relations to develop a unique perspective on the global governance of education It will prove insightful for both scholars and policymakers in public policy and education

Margaret Thatcher and Ronald Reagan J. Privatization Graeme Hodge, 2018-03-09 Contracting out public sector

services and divesting public enterprises are reforms that have enjoyed widespread global popularity in recent years. Better services, lower prices and greater accountability are the promises made by politicians, senior executives and investment companies when functions are moved from the public sector to private enterprise. But in Privatization Graeme A Hodge challenges these assumptions. Through an examination of hundreds of international studies on the performance of privatization activities, Hodge demonstrates that privatizing public services is often not the guaranteed panacea portrayed by its political supporters. Importantly, privatization activities can lead to modest gains, but there are also winners and losers in this reform. It therefore deserves far more care and balanced debate than it usually attracts. *Contesting World Order?* Joe Wills, 2017-04-13. Global and domestic policies and the rapid processes of economic globalisation have led to burgeoning levels of inequality. Drawing upon insights from critical international relations theory, this book explores how global justice movements use socioeconomic rights to challenge neo-liberal global governance. *National Library of Medicine Current Catalog* National Library of Medicine (U.S.), [Australian National Bibliography](#), 1996-05. [The Impact of Privatisation](#) Stephen Martin, David Parker, 1997. The penultimate chapter discusses the restructuring that has followed each company's move into the private sector and the final chapter summarises the results. **Regulating US Private Security Contractors** Jovana Jezdimirovic Ranito, 2019-01-22. This book explores different aspects of the regulation of private security contractors working for governments. The author specifically examines the US identifying the obstacles that have hindered US regulatory outcomes. Theoretical discussions supported by conceptual analysis of Bourdieu's Theory of Practice are applied to analysis based on interviews with current and former employees of key stakeholders. By analyzing the political, bureaucratic and organizational obstacles to the implementation of consistent and enforceable regulations, Jovana Jezdimirovic Ranito points to creative possibilities for future use of her conceptual framework. *Bibliographie Mensuelle. Partie I, Livres, Documents Officiels, Publications en Série* United Nations Library (Geneva, Switzerland), 1995. [The Russia-Ukraine War from an African Perspective](#) Artwell Nhemachena, 2023-09-30. In the Russia-Ukraine war, attention has been focused on the Special Military Operation. This book argues that there are many other special operations in various other arenas in the world that deserve equal and urgent attention. Connecting special military operations to what it calls special economic operations, special cultural operations, special technological operations, special sexual operations and special political operations, the book argues that special operations are not exclusive. Also drawing on topical debates about technoscience, the book critically examines invasive technologies in relation to bodily autonomy, integrity and privacy and it urges scholars and thinkers to compare these invasive technological operations to invasive special military operations. The book grapples with the future of humanity in a world where the human is decentred even as the world witnesses the proliferation of resource wars. The book is relevant for scholars in anthropology, sociology, politics, government studies, international relations, history, media studies, science and technology studies and disaster management.
