Williams, Laura Seiverling, 2024-10-01 Broccoli Boot Camp is a comprehensive guide for parents of children who are selective or picky eaters

and can be used with children with or without special needs e.g. autism or Down syndrome. It presents commonsense behavioral interventions to successfully expand children's diet variety and preferences for healthy foods. The book starts with the simple premise that when children are encouraged to taste and consume tiny portions of new foods repeatedly and with lessening resistance, they learn to accept and enjoy the foods as part of their regular diets. Real life compelling case studies and abundant research findings support the authors' advice on how to overcome a child's selective eating. It describes ways to increase compliance factors to consider when choosing an intervention and strategies to shape behavior. Finally, five intervention plans are presented with step-by-step procedures, modifications, and tips on maximizing success. Parents can choose the intervention which works best for their family's circumstances. The book also contains forms to track data, incentives, and meals, and a behavior contract to use with older children. Broccoli Boot Camp gives parents the tools they need to promote healthy eating for their child as well as improve the family mealtime experience. This second edition includes updated references, two new intervention plans, and an expanded discussion of nutrient deficiencies along with recommendations for preventing and treating them. Other updates include clarifications on modeling. There is also a guide for clinicians at the end of the book.
