Feeling Strangely in Mid-Century Spanish and Latin American Women's Fiction Tess C. Rankin, 2023-12-15 An

Open Access edition of this book is available on the Liverpool University Press website and the OAPEN library as part of the Opening the Future project with COPIM The early twentieth century was awash in revolutionary scientific discourse and its uptake in the public imaginary through popular scientific writings touched every area of human experience from politics and governance to social mores and culture Feeling Strangely argues that these shifting scientific understandings and their integration into Hispanic and Lusophone society reshaped the experience of gender The book analyzes gender as a felt experience and explores how that experience is shaped by popular scientific discourse by examining the strange femininity of young protagonists in four novels written by women in Spanish and Portuguese Rosa Chacel's *Memorias de Leticia Valle* published in Argentina in 1945 Norah Lange's *Personas en la sala* Argentina 1950 Carmen Laforet's *Nada* Spain 1945 and Clarice Lispector's *Perto do cora o selvagem* Brazil 1943 It pairs each novel with a broad scientific theme selected from those that captured the contemporary popular imagination to argue that the young female protagonists in these novels all put forth visions of young womanhood as an experience of strangeness Building on Carmen Mart n Gait e's term *chicas raras* Rankin proposes this strangeness as constitutive of a gendered experience inextricable from affective and material engagements with the world

weapons aspirations yet it cannot be disputed that the Islamic Republic has gone well beyond what is required for a civil nuclear programme based on energy production and scientific research What then is the nature and significance of Iran s nuclear behaviour Does it form part of a coherent strategy What can Iran s actions in the nuclear field tell us about Tehran s intentions And what does the Iranian case teach us about proliferation behaviour more generally This book addresses these questions by exploring the nature of nuclear hedging and how this approach might be identified before applying this logic to the Iranian case It provides fresh insights into the inherently opaque area of nuclear proliferation and a more nuanced interpretation of the Iranian nuclear challenge
